RAILROAD COMMISSIONERS' REPORT.
BOARD OF RAILROAD COMMISSIONERS

OLIN MERRILL, Chairman, Enosburgh Falls.
ORION M. BARBER, Arlington.
CHARLES J. BELL, Walden.

FULLER C. SMITH, Clerk, St. Albans.
The Vermont Statutes, Chapter 172, Section 3996, provides as follows:

"The Commissioners shall report biennially to the general assembly, giving their proceedings under this chapter, and include therein such statements, facts and explanations as will disclose the actual working of the system of railroad transportation in its bearing upon the business and prosperity of the state, and such suggestions in respect thereto, or to the condition, affairs or conduct of any of said railroads, or the general railroad policy of the state, or the amendment of its laws, or any new legislation as they deem appropriate; also statements showing the receipts and expenditures of each railroad in this state for the two preceding years, from what source such receipts were derived, and for what such expenditures were made; also the condition of such road and its equipment and such other matters as the Commissioners deem appropriate and important for the information of the general assembly."

Pursuant to the foregoing statute the Board of Railroad Commissioners hereby submits its Fifth Biennial Report:

PRESENT CONDITION OF RAILROAD BUSINESS AND THE RELATIONS OF THE PUBLIC TO THE RAILROADS.

The depressed business conditions which so materially affected the finances of all railroad companies in the closing months of 1893, prevailed with increased severity during 1894 and the early months of 1895. Since that time a steady improvement in both passenger and freight traffic has been enjoyed by nearly all companies doing business within the state. The biennial returns of the seventeen operating companies which appear in Part II. of this report, furnish the financial and operating exhibits for the biennial term ending, in most instances, with June 30th, 1895. Since the latter
date, the evidences of returning prosperity have been more apparent and it is confidently expected that a complete return to the favorable conditions of 1892 will soon be achieved.

In the face of a decreasing business, and also with returning prosperity, there has been a constant lessening of the average freight and passenger rates by which shippers and the traveling public have correspondingly benefitted. These results have been accomplished by economical management and operation, rather than by any omission of needed improvements in road-bed or equipment. The physical condition of every road in the state, with the exception of the Lebanon Springs road now in the hands of a receiver, has been maintained unimpaired or been actually improved during the past biennial term, and it is believed that none have suffered materially in respect to equipment. There has been no complaint to the Board of diminished train service and the curtailment of accommodations has not been such as to seriously affect the requirements of the public. During the past two years the Board has not been called upon to adjust or change the rates of fare for transporting freight or passengers upon any railroad and no charges of unjust discrimination have been preferred.

After each annual inspection, this Board has furnished to the management of every road a report containing the suggestions and recommendations of the Commissioners relative to the physical condition of such road, its depots, bridges and other structures. It was deemed important to seasonably advise the superintendents of departments of any deficiency that might have been observed or of any lack of compliance with the provisions of law respecting the construction or operation of the road which might come to the notice of the Board. The practice of the Board heretofore has been to incorporate a report of its inspections in its biennial report, but no copy thereof has been annually and immediately after the inspection furnished to the railroad companies. By this method the especial attention of the railroad officials was only called to the recommendations and suggestions of the Board once in two years, and perhaps long after grave faults and even dangerous conditions were apparent. It is believed
that this departure from the prevailing custom of previous Boards has been of value to the public and to the various officials of each road and in nearly every instance appreciated by them. It is certain that the prompt compliance with the recommendations of the Board on the part of nearly all the operating companies has made clear the desirability of reporting inspections more often than once in two years.

The ready response to the suggestions of the Commissioners, asking for changes and improvements in the line of closer compliance with statutory provisions and alterations in the interest of greater safety to the traveling public and employees, is indicative of the concordant relations which exist between the railroad corporations and the people. It is recognized that the interests of the railroads and their patrons are becoming less and less divergent and that only the fullest co-operation of each in promoting a healthful growth will make their business relations mutually profitable.

MILEAGE OF RAILROADS AND CONSTRUCTION DURING TERM.

The railroad mileage within the state is 984.67 miles of main line, of which 12.89 miles is double track. The increase in main line mileage during the biennial term has been five miles. The Hardwick and Woodbury Railroad has completed during the present season five miles of road from a point on the St. Johnsbury and Lake Champlain Railroad called Granite Junction through the towns of Hardwick and Woodbury to the granite quarries in the latter town. The entire length of the line, when completed, will be about ten miles; the gauge is standard. It is expected that the road will be opened for traffic along the entire ten miles during the coming autumn or spring. The mileage of the Central Vermont system has been decreased 135.30 miles of main line by the surrender of the Rutland and Addison divisions to the Rutland Railroad Company, since the Central Vermont Railroad Company passed into the hands of receivers.

The table below presents the details of mileage operated in Vermont by the different systems on August 15th, 1896, and the total mileage in each system as appears by the returns for the two years ending June 30th, 1895.

RECEIVERSHIPS.

On the 20th day of March, 1896, upon the petition of the Grand Trunk Railway Company, E. C. Smith and C. M. Hays were, by the United States Circuit Court, appointed receivers of the Central Vermont Railroad system. This system included the Rutland Railroad, which was leased to the Central Vermont. On the 5th day of May, 1896, the Court ordered the receivers to surrender this leased line to the owners, and since the 8th day of May, 1896, the Rutland Railroad Company has been operating its road. The receivers are operating the remainder of the Central Vermont system.

The Lebanon Springs Railroad is still operated by William V. Reynolds, the receiver thereof.

ACCIDENTS.

There have been reported to this Board during the two years ending July 1st, 1896, one hundred and thirty-one accidents, of which fifty-two were fatal and the majority of the others of a trivial nature. It was early apparent to the Board that in many cases where the accidents were not of a serious character, an inquiry into the cause thereof would result in a determination by the Board that no public investigation was necessary; and yet to make this preliminary inquiry it was necessary that some member of the Board, or its clerk, should make personal investigation. It was found in nearly every accident that the facts relating thereto had been correctly stated by the railroad company in their report thereof to the Board. As enabling the Board to obtain the understanding of the injured party touching the matter, it was deemed best, in case the accident appeared by the report of the railroad company to be of a trivial nature, to address to the injured party a circular letter, stating in substance the facts as claimed by the railroad company and asking the person to whom such circular letter was addressed to inform the Board whether such facts were true and if he desired that any further investigation into the causes of such accident should be made by the Board. In many of these cases replies have been re-
ceived from the parties injured that warranted the Board in proceeding no further in the matter, or making public inquiry or investigation. It is confidently believed that by this method the duty cast upon the Board by the statute relating to accidents of this class has been fully performed and a considerable expense thereby saved to the state.

Tables relating to accidents, and a full report of the proceedings of the Board in such cases will be found in Chapter IV.

**PETITIONS.**

All petitions made to the Board to the date of this report have been heard and determined, and a detailed report of the proceedings relating thereto will be found in Chapter III.

**BIENNIAL RETURNS.**

Heretofore it has been the custom of the several railroad corporations to make annual returns to this Board, embodying in substance information as to the financial and physical condition, operation and management of each road, together with the rates of fare and charges for transportation. These reports, in effect, conform with those recommended by the Interstate Commerce Commission, and are in substantial uniformity with those in general use in all the states. The methods by which this uniformity has been secured are concisely stated in the last biennial report of the Vermont Railroad Commission.

In order to report to the general assembly the condition of the roads with reference to the subject matter of such annual returns, it has heretofore been deemed essential to incorporate in the biennial report of this Board such annual returns in full. The present Board, believing a large amount of space in their printed biennial report might be saved thereby, and at the same time the practical benefits thereof accrue to the state, has devised a form for the returns to be made by the railroads covering two years, instead of one, but in other respects following substantially the form heretofore adopted and in general use.
The returns therefore incorporated in Part II. are for the biennial term ending at the date nearest the date of this report, that, under the system of accounting in use by the respective roads, it is feasible to obtain.

Generally speaking these returns have been made by the railroads in the form asked for by this Board but, in some instances, certain details have been omitted, arising mainly from a defective system of keeping accounts by the road in fault. Among such omissions, is the instance of one road that was unable to report the number of passengers carried; no provision for an account thereof being made in its system of book-keeping. Such omissions detract from the statistical value of certain tables and deductions presented in this report.

RETURNS AS TO BRIDGES.

In making the annual inspection of the railroads in 1895, the Board had difficulty in getting at the exact condition of the bridges, so far as related to their age, when repairs, if any, had been made thereon, and in obtaining other data deemed necessary for accurate information upon the subject of bridges generally.

The Board had no files or records in its office, with unimportant exceptions, that afforded any satisfactory data upon this subject, and the only information obtained by it during the inspection was furnished by officers or employees of the road. While this was freely given so far as possible in the limited time allotted to the inspection, yet it was of necessity brief, incomplete, and not in proper condition to be preserved for future reference, and the Board felt that the entire subject was in a most unsatisfactory condition.

To meet this need, the Board formulated and, in the month of February, 1896, sent, to the respective corporations operating railroads in the state, blanks calling for information as to the dimensions, the material of which constructed and the particular style of construction, when and how reinforced and strengthened, and the factor of safety of each
bridge upon the line of its road. To each of these blanks the following form of oath was attached, viz:

STATE OF VERMONT, } ss.
COUNTY OF ___________________________, }

I, ____________________________, Superintendent of Bridges and Buildings on the ____________________________ R. R., on oath do say that the foregoing return has been prepared under my direction, that I have carefully examined the same and declare it to be a complete and correct statement of the description, condition and structural security of the bridges on the line of said railroad, in the State of Vermont, to the best of my knowledge, information and belief.

(Sign.) ____________________________
Supt. Bridges and Buildings.

______________________________ R. R. Co.

Subscribed and sworn to before me, this day of 18 .

______________________________
Justice of the Peace.

And the management of each road was asked to cause the blanks to be filled and the oath thereto made by some officer or employee competent so to do. Some of the railroads objected to making oath to the information asked for in these blanks, and upon application therefor a public hearing was had at Montpelier, touching this matter, at which it was alleged as a reason for not complying with the request of the Board, that it was not possible to compute or ascertain the factor of safety of the bridges.

The authority of the Board to insist upon this information being furnished and verified in this manner was also denied. After hearing, the Board declined to dispense with the formality of the oath, and insisted that the information be furnished. Subsequently the blanks were duly sworn to by some officer or employee of each road and returned to the Board. Some roads declined to state in the blank as to the factor of safety of their bridges, except to say they were unable to give the same.
As the Board understands the matter, modern railroad ing, and that regard for the safety of the public that ought to be the first care of every common carrier, both require that those operating railroads should not only carefully watch and inspect their bridges, but also should be able to determine and should determine the structural strength and the carrying capacity thereof considered with relation to the strain imposed thereon by their heaviest and fastest trains. In the opinion of the Board the management of a railroad that neglects this precaution invites accidents; to admit an inability to determine the same with approximate accuracy, is a confession of incompetency that merits criticism.

**CAPITAL STOCK AND INDEBTEDNESS.**

The following table, prepared from the biennial returns of the several railroad companies, is an exhibit of the amount of capital stock, funded debt, unfunded debt and indebtedness per mile of road of all railroad corporations operating wholly or in part within this state at the end of the fiscal year nearest June 30th, 1895.

### DIVIDENDS.

The biennial returns of the various railroad companies show that the following dividends have been paid during the two fiscal years ending June 30th, 1895:
Atlantic & St. Lawrence, *(Leased to the Grand Trunk Railroad Co.)*, 6 per cent.

Bennington & Rutland, 3 per cent. in 1894, none in 1895.

Boston & Maine, on common stock in 1893, 7 per cent., and in 1894, 6 per cent.; on preferred stock, 6 per cent.

Delaware & Hudson Canal Company, 7 per cent.

Fitchburg, on preferred stock, 3 per cent. in 1894 and 4 per cent. in 1895.

Hoosac Tunnel & Wilmington, ¼ per cent.

Maine Central, 6 per cent.

Vermont Valley *(Leased to Boston & Maine)*, 6 per cent.

Woodstock, 2 per cent.

The Boston & Maine Railroad guarantees 5 per cent. on the stock of the Connecticut & Passumpsic Rivers Railroad Company until 1897, and 6 per cent. for 89 years thereafter; the Central Vermont Railroad Company pays a yearly rental of 4 per cent. on the stock of the Missisquoi Valley Railroad Company and 5 per cent. on the stock of the Burlington & Lamoille Valley Railroad Company; the Delaware & Hudson Canal Company pays a yearly rental of 8 per cent. upon the stock of the Rensselaer & Saratoga Railroad Company, and 7 per cent. interest upon its bonds. The Central Vermont Railroad Company pays an annual rental of $210,000.00 for the New London Northern Railroad and, up to the time of the surrender of the Rutland Railroad to the Rutland Railroad Company, paid an annual rental to the latter company of $345,000.00, and in addition 5 per cent. on the total value of the improvements as they were made from year to year. The Central Vermont Railroad Company also pays a yearly rental of $9,600.00 for the Brattleboro & Whitehall narrow gauge road.

**Comparative Statement—Income Showing.**

The financial transactions of the several roads are concisely shown in the following table, compiled from the biennial returns of the railroad companies to this Board for the two fiscal years ending nearest June 30th, 1895.

AVERAGE PASSENGER FARES AND FREIGHT RATES.

The average rates for transportation of passengers and freight is a subject of interest to the people of a state so far removed from the large centers of population which provide a market for our surplus products and attract a considerable volume of passenger traffic. It is gratifying to learn from the tables which have been compiled from previous returns of the railroad companies to the Board, that the average passenger fares per mile has constantly decreased during the past nine years, and that from an average rate in cents and mills of .0309 in 1887—according to the information obtainable from the seven roads then reporting upon this subject—the charge has fallen to an average of .02542 in the years 1894 and 1895, as reported by 15 roads. To some extent these figures are misleading, because of the fact that several of the smaller roads and branch lines, penetrating sections of the state somewhat removed from the long established lines of communication, hold to a tariff much higher than that upon roads conducting both local and through business; eliminating three small branch lines from the computation, the present average rate per mile on twelve roads in cents and mills is .02294.

The same constant decrease will be noted by an inspection of the table showing the average freight rates per ton mile during the nine years from 1887 to 1895. The average tariff per ton per mile over seven roads reporting in 1887, expressed in cents and mills, was .02708. During the two years ending June 30th, 1895, the average on sixteen roads was .03345. Here, again, the figures are misleading; four of the roads are short branch lines built to facilitate the marketing of particular products and doing a very limited general freight business. The average tariff per ton mile over the twelve remaining roads in 1894 and 1895 was only .01256, a tariff that in cheapness compares favorably with that enjoyed in any other state in the Union.

The following tables present the details of average rates for the transportation of passengers and freight during the past nine years.
### Average Passenger Fares per Mile for 9 Years, 1887 to 1895, in Vermont Only.

NUMBER OF EMPLOYEES IN VERMONT.

NUMBER AND WAGES OF EMPLOYEES.

The following tables show the number of employees of the several roads from 1889 to 1895 inclusive, and the daily compensation paid by the railroad companies to employees during the fiscal year ending nearest June 30th, 1895. There has been a slight decrease from the wages paid in 1892 and 1893 upon several of the leading roads; this is attributable to some extent, to the lack of remunerative employment in other large lines of industry and the consequent increase in the number seeking employment from railroad corporations.

Number of Employees in Vermont for the Years 1889 to 1895.

SAFETY APPLIANCES.

The subject of federal legislation respecting the equipment of locomotives and cars with train brakes and automatic couplers is referred to under the head of recommendations for legislation. To show the relative proportion of locomotives and cars which were equipped with train brakes and automatic couplers on June 30th, 1895, the following table has been prepared and is submitted for consideration in connection with what is urged as proper state legislation upon this subject.

Description of Equipment.—Locomotives.

**ELECTRIC RAILWAYS.**

The subject of electric railways is one of vast and growing importance.

In 1887, there were in the United States but thirteen street railways, with scarcely 100 cars. Before the beginning of the present year there were 850 such railways, having 9000 miles of track, 23,000 cars and a capitalization of over $400,000,000. Some of these roads carry not only passengers, but baggage, mails, express and freight.* It is believed the development of this interest during the year 1896 will be no less striking.

It is perhaps unnecessary to add that so rapid a growth of an industry of this nature has given rise to a large number of questions, both legislative and judicial, a proper determination of which materially concerns every citizen.

*See report of Massachusetts Railroad Commissioners for 1896.
In Vermont there are as yet but five electric railways in operation; two more, however, are in process of construction and charters for several others have been obtained. It is reasonable to expect that the general assembly at its coming session will be asked to grant other franchises for the construction of similar roads.

It is not the purpose of the Board at this time to enter into an exhaustive discussion of this subject or to suggest in detail legislation in respect thereto, but rather to call attention to the fact that it merits careful study and well considered action. A policy should be adopted that, while it properly encourages and fosters the legitimate investment of capital in this line, thereby tending to develop the resources of the state and promote the convenience of the citizens, will, at the same time, best conserve the public weal, have regard for the rights and privileges of other corporate interests, and protect individuals in the use and enjoyment of private property.

The Board has no authority to exact from street railway companies returns showing their financial transactions or statistics of operation; but on request therefor by the Board all of the five roads now in operation have furnished certain information which is tabulated and annexed hereto. All the roads employ the trolley system.

The Hinesburgh Railway from Burlington to Hinesburgh, a distance of about 13 miles, and the Springfield Railway from the village of Springfield to a point on the Boston and Maine Railroad near Charlestown, N. H., a distance of about six miles, are each in actual process of construction. The latter has a capital stock of $175,000, and both will be thoroughly built and equipped for the transportation of passengers and freight.

The Bennington Electric Railroad Company, organized with a capital stock of $100,000, proposes soon, and perhaps the present season, to construct a trolley road in the streets of Bennington, and from the village of Bennington through North Bennington to Hoosick, N. Y.

* Reconstructed from horse railway line. The number of passengers carried was largely decreased by the obstruction to operation due to the work of equipping the horse railway with electricity.

+ For six months ending June 1st, 1896.

‡ For eleven months.

§ Two and one-half miles have been constructed in past two years, and two miles are now in process of construction. This is a summer road, and included in the plant is a power house, theatre and other buildings, with a considerable area of land, representing some $22,500 of the capitalization.
RECOMMENDATIONS FOR LEGISLATION.

SAFETY APPLIANCES.

In the three preceding biennial reports of this Board the subject of safety appliances has been discussed and the federal legislation upon the subject referred to.

The federal statute, which was enacted in March, 1893, provided as follows:

"Section 1. That from and after the first day of January, eighteen hundred and ninety-eight, it shall be unlawful for any common carrier engaged in interstate commerce by railroad to use on its line any locomotive engine in moving interstate traffic not equipped with a power driving-wheel brake and appliances for operating the train brake system, or to run any train in such traffic after said date that has not a sufficient number of cars in it so equipped with power or train brakes that the engineer on the locomotive drawing such train can control its speed without requiring brakemen to use the common hand brake for that purpose.

Section 2. That on and after the first day of January, eighteen hundred and ninety-eight, it shall be unlawful for any such common carrier to haul or permit to be hauled or used on its line any car used in moving interstate traffic not equipped with couplers, coupling automatically by impact, and which can be uncoupled without the necessity of men going between the ends of the cars.

Section 4. That from and after the first day of July, eighteen hundred and ninety-five, until otherwise ordered by the Interstate Commerce Commission, it shall be unlawful for any railroad company to use any car in interstate commerce that is not provided with secure grab-irons or hand-holds in the ends and sides of each car for greater security to men in coupling and uncoupling cars."

The Interstate Commerce Commission, by its order, extended the time when the preceding section became operative to the first day of December, 1895.

"Section 5. That within ninety days from the passage of this act, the American Railway Association is authorized
hereby to designate to the Interstate Commerce Commission the standard height of drawbars for freight cars, measured perpendicular from the level of the tops of the rails to the centers of the drawbars, for each of the several gauges of railroads in use in the United States, and shall fix a maximum variation from such standard height to be allowed between the drawbars of empty and loaded cars. Upon their determination being certified to the Interstate Commerce Commission, said commission shall at once give notice of the standard fixed upon to all common carriers, owners or lessees engaged in interstate commerce in the United States by such means as the commission may deem proper. But should said association fail to determine a standard as above provided, it shall be the duty of the Interstate Commerce Commission to do so before July first, eighteen hundred and ninety-four, and immediately give notice thereof as aforesaid. And after July first, eighteen hundred and ninety-five, no cars, either loaded or unloaded, shall be used in interstate traffic which do not comply with the standard above provided for."

The time when this section became operative was, by the order of the Interstate Commerce Commission, extended to the fifteenth day of February, 1896. (See report of Interstate Commerce Commission for 1895, pages 91 to 95.)

It is obvious that when this law is fully complied with the great number of accidents to trainmen will be very much lessened. In order to obtain the greatest immunity from accidents of the kind which this statute is designed to prevent, our general assembly should, by statutes in harmony with the federal statute referred to, require all railroads doing business in this state to which the federal statute is not applicable to use substantially the same safety appliances that are thereby required of roads doing an interstate business.

GRADE CROSSINGS.

The existence of any crossing at grade is to be deplored. Every such crossing is a continual menace to the safety of the traveling public, and the railroads and the people will welcome the time when all are abolished. The Massachusetts statute provides that proceedings may be instituted for the abolishment of a grade crossing and that when the same is
ordered the expense shall be paid, 65 per cent. thereof by the railroad, and the balance by the commonwealth and the town or city, as may be determined, but not to exceed 10 per cent. shall be paid by a town or city. This statute also provides that no more than $500,000 shall be paid by the commonwealth for this purpose in any one year, and the entire appropriation is limited to $5,000,000. The spirit of this statute is progressive and commendable. The state, the municipality, and the railroad are each interested in having all grade crossings abolished, and each should contribute thereto. In Vermont there are some crossings that are exceedingly dangerous and ought to be abolished, but to impose the expense thereof upon the town or the city and the railroad would excessively burden each. It is recommended that legislation be enacted authorizing the Board, when it orders the abolishment of a grade crossing pursuant to existing statutes, to assess not more than 35 per cent. thereof to the town or city in which the crossing is situated and the state, but limiting the cases in which the state may be assessed to not more than two crossings in any one county, on any one road in the same year and the expense thereof to the state to no more than $15,000 in any year.

Railroad companies should also be authorized to take lands adjoining their roads near highway grade crossings for the purpose of removing therefrom obstacles or obstructions that intercept the view of an approaching train by travelers.

In the judgment of the Board the law should require that the fences and approaches to all highway grade crossings be kept whitewashed. This enables both trainmen and travelers more readily to observe the proximity of the crossing and is therefore an additional safeguard against accidents at such crossings.

ACCIDENTS.

The statute requires the commissioners to inquire into the causes of any accident resulting in loss of life, and in their judgment into any accident not so resulting. Some question has been made as to the authority of a commissioner to examine witnesses under oath when such inquiry
is made. The Board believes such authority should exist without question, and recommends proper legislation to that effect. The statement so taken should, in the discretion of the commissioners, be *ex parte* and the contents thereof, when taken *ex parte*, should not be disclosed to any person, unless upon subpoena *duces tecum* properly issued. Cases frequently occur where an investigation made in the manner suggested will obviate the need of a public hearing, and the state be thereby saved large expense.

**ELECTRIC ROADS.**

The only special recommendation the Board desires to make relative to these roads is with reference to the furnishing of statistics and reports of accidents and to their general supervision.

They are common carriers, and are granted valuable franchises. Accidents to life or limb are likely to occur in their operation, as in the operation of steam roads. The Board recommends that appropriate legislation be enacted placing these roads under the same general supervision as steam roads, requiring of them like reports as to accidents, and imposing upon them the duty to furnish similar annual or biennial returns in form to be recommended by the Board.

All of which is respectfully submitted.

OLIN MERRILL,
ORION M. BARBER,
CHARLES J. BELL,

*Railroad Commissioners.*

Montpelier, VT., Sept. 1st, 1896.
In pursuance of the requirements of law, the Board has annually made an inspection of each railroad within the state, a report of which will be found in the succeeding pages of this chapter.

Preliminary to any observations upon the physical condition of the different railroads, the Board desires to make the following suggestions upon the subjects hereinafter referred to, believing the advantages to be derived therefrom are obvious, and that, where not already anticipated, their adoption will be in the line of progress and of a policy beneficial to the railroad companies and their employees and to the public.

First—That at all points where the law requires a whistle to be blown, a sign post be erected, having upon it suitable letters, words or other characters that unmistakably call the attention of the engineer to his duty at that point.

Second—That at each highway grade crossing the cattle guards and approaches thereto, including fences, be whitewashed. The Board believes this serves a double purpose, in that it calls attention of employees of the road to their duty; and warns the traveling public of the danger at such points.

Third—That standards be adopted in the construction of depots. To illustrate—Three standards might be chosen, one for that class of stations where the business is light and the requirements limited; another of higher grade, suited for the needs of fair sized villages with considerable business and traffic; and the highest grade for those places having a large and increasing business with heavy passenger traffic, including junctions with main lines of other roads. The adoption
of some standard that fairly meets these conditions would be likely to avoid the local jealousies that now sometimes hamper a road in the erection of depots, would be less expensive, on the average, and would be evidence of a practical as well as scientific treatment of a subject that will continually require the attention of the roads until suitable depots are erected at all points. The Board also believes that the adoption of such a policy would materially lessen the expense of repairs that in the future will, from time to time, be necessary, as well as remove a source of friction between the management and the public that is often annoying and sometimes productive of mischievous results.

Fourth—That all bridges and trestles be plainly numbered on each end, as a matter of convenience to all having occasion to refer to them.

BARRE RAILROAD.

The inspection of this road in 1895 was made on the first day of October, vice-president W. A. Stowell accompanying the Board; the inspection of 1896 was made by Commissioners Barber and Bell on the 2nd day of July, accompanied by vice-president Stowell and superintendent F. W. Stanyan.

This road is used mainly for transporting granite from the quarries to the city of Barre and has many steep grades and sharp curves. There are numerous side tracks and spurs entering the finishing shops and quarries. The passenger traffic and transporting of general merchandise is not an important item in the business of the road.

Road-bed.—Generally speaking the road-bed is in good condition and sufficient for the traffic passing over it. Some ten thousand new ties are being laid this season. During the biennial term, one and one-quarter miles of side track have been constructed.

Depots.—The passenger depot at Barre, while not such a convenient and commodious structure as the business of that important point would seem to demand, is in fairly good condition. Since the inspection of 1895, a new and suitable
freight depot has been constructed. The depot at East Barre is thought to be adequate to the wants of that community.

Bridges.—Most of the bridges on this road are built upon piles. No. 38, a long bridge just above the depot in the city of Barre, is being extensively repaired by substituting iron girders for piles over the river and solid abutments upon each side of the stream. Bridge No. 40 is also receiving the attention of the management in this respect; there is also need of repairs upon bridge No. 39. With this work accomplished, the bridges upon this road will be in good condition and apparently able to bear the burden imposed upon them.

Special Statutory Requirements.—Since the inspection of 1895 the law relating to the blocking of frogs, switches and guard rails has been more closely regarded. Crossing signs are in place wherever required.

BENNINGTON & RUTLAND RAILROAD.

This road extends southerly from the city of Rutland to the New York state line at White Creek, a distance of 54 miles, with a branch from North Bennington to Bennington, a distance of four and one-half miles.

The inspection of this road in 1895 was made on September 10th by Commissioners Merrill and Barber and the clerk of the Board. E. D. Bennett, general superintendent, and A. G. Coomer, road-master, accompanied the Board. The inspection of 1896 was made on the 26th day of June by Commissioner Bell and the clerk of the Board, accompanied by G. J. McMaster, road-master, and G. H. Burch, train-master.

Road-bed.—The road-bed along the entire line is generally in good condition except that there is a considerable lack of ballast in many places. The steel is of 60 pound weight to the lineal yard and is fairly well tied. The ordinary repairs upon the road-bed and the usual necessary renewals of ties have been made during the past two years. Since the inspection of 1895, whistling and mile posts have been erected, as well as many new crossing signs, and the cattle guards and approaches to grade crossings have been neatly whitewashed; the bridges have also been numbered.
Depots.—The depot at Sunderland has been repaired this season and during the biennial term ending June 30th, 1895, new stations have been erected at Cold River, Clarendon and North Dorset. At none of these new stations has any provision been made for sanitary conveniences, and there are none at Wallingford or South Wallingford; such conveniences should be supplied without delay. There is considerable need of repairs at other depots and new stations should be built to accommodate the patronage of the road at Bennington and Manchester. It is understood that the management intends to build a new station at Bennington at an early day and has secured the necessary plans, but at the time of making this report no further move in this direction has been made.

Bridges.—Since the inspection of 1895 the management has provided itself with accurate strain sheets of every bridge upon its line, a move that may be commended to every railroad in the state. Bridges Nos. 26 and 28 have been replaced this season with new iron plate girder bridges, upon the recommendation of the Board. The north abutment of bridge No. 7 should be repaired or rebuilt and repairs are also necessary upon bridge No. 30. In many instances the bridges on this line are “horsed up” to give the strength necessary to carry the fast and heavy trains moving over the road.

The practice of “horsing up” bridges to give them sufficient strength cannot be commended. High water, ice or floating logs may force these supports from their places, and unless carefully watched, serious disaster may follow. The “cob-house” bridge seats under many of the bridges should do service no longer, but be replaced with masonry.

Special Statutory Requirements.—The switches, frogs and guard rails were found to be very generally blocked and the crossing signs, tell-tale warnings and cattle guards in place wherever required. The right of way is well fenced and reasonably clear of weeds and thistles.
BOSTON & MAINE RAILROAD.

This system includes the Ashuelot Railroad from South Vernon to Keene, N. H., less than one mile of which is in Vermont; the Connecticut and Passumpsic Rivers Railroad from White River Junction to the Canadian line in the town of Derby; the Vermont Valley Railroad from Bellows Falls to Brattleboro, and the St. Johnsbury & Lake Champlain Railroad from Lunenburgh to Maquam; the latter road includes the Victory Branch from North Concord to East Haven and the Hardwick Branch of one and a half miles.

The inspection of the system was made on September 18th, 19th, 20th, and 21st, 1895, by the entire Board and clerk, accompanied by H. E. Folsom, division superintendent, road-masters Clark and Roberts, bridge-master Spaulding and assistant engineer D. Williams; and on May 20th and 21st and June 4th, 1896, by the entire Board and the clerk; accompanied by H. E. Folsom, division superintendent, assistant division superintendent H. F. Sampson, assistant division superintendent E. H. Blossom and road-master W. G. Roberts; road-master Clark and bridge-master Spaulding also accompanied the Board over portions of the road.

VERMONT VALLEY DIVISION.

Road-bed.—The road-bed of this division is relatively in excellent condition. The work of replacing the 56 pound steel rails with those weighing 75 pounds to the yard is being carried on every year and will soon be completed. The road is fairly well ballasted and the ties are closely spaced.

Depots.—The depots stand in need of repairs in order to meet the demand for modern structures; they are generally well kept. The depot at Bellows Falls, occupied jointly by the Boston & Maine, the Rutland and the Fitchburg railroad companies, has been repaired inside by sheathing the walls and ceilings. This is recognized as an improvement, but not such as should be made at this place. The present depot is entirely inadequate, both in respect of its size, location and arrangement, for the needs of this important junction point. It should be replaced by a suitable new structure, properly
located so as to lessen the danger of the present grade crossing, and better accommodate the public. The Board believes the expense of the improvements required, when apportioned among the roads, will be a burden to none. The attention of the management of each of the roads interested has been called to this depot by a special report.

*Bridges.*—No special criticism is offered respecting the bridges on this division; they are in good condition and are reported by the management to have a sufficient factor of safety. They should be numbered for reference and to facilitate the annual inspections.

*Special Statutory Requirements.*—The provisions of law relating to the blocking of switches, the erection of tell-tale warnings, crossing signs and cattle guards are fully observed. The road is well fenced and the right of way is kept comparatively clear of weeds and thistles.

**CONNECTICUT & PASSUMPSIC DIVISION.**

*Road-bed.*—The road-bed of this division has been very much improved in recent years and is now among the best in the state. During the past year 700 tons of steel rails weighing 75 pounds to the yard have been laid and 60,000 ties have been renewed; a number of miles have been newly ballasted and these improvements, if continued, will soon place the entire division in first class condition.

*Depots.*—The depot at North Thetford has been thoroughly repaired and is now entirely sufficient for the needs of the community which it serves. There are other depots along the line that need substantial repairs and it is presumed that they will in due time receive the attention of the company.

*Bridges.*—The attention of the management has been called to two or three of the bridges which, while not considered unsafe, will soon need to be rebuilt and now require more than ordinary watchfulness. All the bridges should be numbered. In two or three instances the ties upon the bridges are becoming somewhat decayed.

(3)
Special Statutory Requirements.—The raising of several bridges to the statutory height of twenty feet in the clear has done away with the necessity of tell-tale warnings in some instances. At all places where required by law these warnings are in place. On some bridges the guard rails are becoming soft from age and should be renewed. The blocking of frogs and switches and the maintenance of crossing signs and cattle guards is carefully attended to.

ST. JOHNSBURY & LAKE CHAMPLAIN DIVISION.

Road-bed.—This division is a line of numerous sharp curves and heavy grades. The road-bed is somewhat deficient in ballast and a little more care should be exercised in the work of surfacing. The expense of conducting transportation over this division leaves little to the profit of the operating company, but the physical condition of the road has not been allowed to deteriorate. The renewals of ties the past year have been upwards of 400 to the mile and other repairs have maintained the fairly good condition of the road-bed.

Depots.—There has been a marked improvement in depot buildings along this division during recent years. When the contemplated repairs of this year are completed only two depots will remain that call for improvement, viz., the depot at West Danville and that at East Hardwick. All are kept with commendable neatness. The erection of new depots at Highgate and East Highgate and thorough repairs at Johnson, Hardwick and Hyde Park are commendable improvements at these points.

Bridges.—There are a number of bridges on this division that will soon need to be replaced. The particular ones have been pointed out to the management and its quick response to the suggestions and recommendations of the Board in other matters warrants the belief that these bridges will receive prompt attention.

Special Statutory Requirements.—The guard rails on several of the bridges need to be renewed. The law requiring tell-tale warnings, crossing signs and the blocking of frogs and
switches is very fully observed. The road is fairly well fenced and the right of way is reasonably free from weeds and thistles.

BRISTOL RAILROAD.

This line extends from New Haven Junction on the Rutland Railroad through the town of New Haven to the village of Bristol, 6.26 miles. It was opened for public business in January, 1892.

The inspections were made on August 15th, 1895, and June 30th, 1896. R. S. Smith, general superintendent, accompanied the Board.

Both inspections found the road-bed to be thoroughly safe and adequate for the traffic of the road. The few openings which have been spanned with trestles are being filled from year to year; there are no bridges on the line. The depot at Bristol is a model of taste and convenience. The provisions of the statute relating to the blocking of frogs and switches and the maintenance of crossing signs are well observed. A few cattle guards are missing; the right of way is kept commendably free from weeds and thistles.

CANADIAN PACIFIC RAILWAY.

OPERATING THE MONTREAL AND ATLANTIC RAILWAY.

This road has 21 miles of track within the state, extending from the Canadian frontier just north of Richford to the village of Newport, its southern terminus.

The inspections of this road were made on Sept. 19th, 1895, by the entire board and the clerk, accompanied by general superintendent J. W. Leonard, assistant superintendent F. P. Brady, A. L. Hertzberg, engineer, and Gavin Shanks, road-master; and on June 3rd, 1896, by Commissioners Merrill and Bell, and the clerk, accompanied by assistant superintendent R. R. Jamieson, A. L. Hertzberg, engineer, and S. F. Belknap, superintendent of bridges.

Road-bed.—There has been a substantial improvement in the road-bed on this line during the past two years; five miles of new 72 pound steel have been laid, and considerable bal-
lasting done. Tie renewals have been made, about the average in number. The physical condition of the road may be said to be equal to the needs of the traffic passing over it.

Depots.—The depots, with one or two exceptions, have little to commend them to favorable mention. Most of them are small, poorly arranged, and entirely inadequate to the reasonable demands of patrons. There is a great lack of proper sanitary conveniences, and more effort should be made to keep the waiting rooms clean, wholesome and attractive. The attention of the Canadian Pacific management has been called to this matter in a special report.

Bridges.—The old "hog back" trestle that has for several years spanned the river at North Troy is being replaced with a modern steel bridge to cost $30,000. The trestle was condemned by the Board, and the company has promptly responded to the recommendation of the Commissioners that a new bridge be erected there. The new structure will be completed before this volume is in the hands of the general assembly. The bridges upon this line are now open to much less criticism than formerly.

Special Statutory Requirements.—The blocking of frogs and switches and the maintenance of cattle guards, crossing signs, tell-tale warnings, and guard rails upon bridges is fully attended to. The right of way is reasonably clear of weeds and thistles.

CENTRAL VERMONT RAILROAD.

This system now includes the Central and Southern Divisions, extending from Windsor to St. Albans; the Northern and Western Divisions, from St. Albans to Province line in the town of Highgate, and to the New York state line near Rouses Point; the Missisquoi Division, from St. Albans to Richford; the Burlington & Lamoille Division, from Essex Junction to Cambridge Junction; the Montpelier & White River Division, from Montpelier to Williamstown; the Brattleboro & Whitehall Division, a narrow gauge line from Brattleboro to Londonderry, and about ten miles of the
New London & Northern Division, from Brattleboro to the Massachusetts state line near South Vernon.

The inspection of this road in 1895 was made on August 15th, Sept. 5th, 6th, 7th, 13th and 14th by the entire Board, accompanied by F. W. Baldwin, general superintendent, J. L. Shanks, road-master, and Jesse O. Olmstead, superintendent of bridges and buildings. The inspection of 1896 was made on May 19th, June 2nd and 3rd, and July 2nd and 3rd. J. L. Shanks, road-master, and Jesse O. Olmstead, superintendent of bridges and buildings, accompanied the Board over the entire line, and division superintendents T. M. Deal and D. Mackenzie accompanied the Board over their respective divisions.

CENTRAL, SOUTHERN, NORTHERN AND WESTERN DIVISIONS.

Road-bed.—The main line of the Central Vermont system is in excellent condition. The road-bed is generally broad, well shouldered, and, excepting some few places, properly drained. A good portion of the Central Division is now 72 and 75 pound steel, carefully surfaced and aligned. Since the inspection of 1895, 1,700 tons of steel weighing 75 pounds to the lineal yard have been laid, and the usual number of ties have been renewed. The weakness of the Central Vermont system is the lack of good ties. Much more than the ordinary renewals should be annually made in order to have the road in this respect rank with the best in New England. A few switches of the stub pattern remain, but as fast as renewals become necessary these are being replaced with a more modern type.

Depots.—During the past two years many substantial improvements have been made in the depots along the line of these divisions, and there still remains much to do in order to obtain such a measure of excellence as will gain the approval of the public. A new steam heating apparatus has been placed in position and some other minor improvements made in the depot at St. Albans. A new furnace has been placed in the depot at Essex Junction. Burlington has practically a new depot, and one commodious and comfortable
enough to entirely meet the wants of that important point. A large sum of money has been expended to make this depot complete in every detail, and a great element of danger has been removed in erecting the new baggage, express and waiting rooms on the east side of the tracks, thereby largely reducing the traffic over the street crossing. The depots at Jonesville, Bolton, Montpelier and White River Junction have also been suitably repaired. A new depot has been built at North Hartland which is a model of taste and convenience except the sanitary arrangements which cannot be commended. Improvements have also been made in the depot at Northfield. The depot at Swanton is entirely insufficient for the needs of so important a point; it should be rebuilt or thoroughly repaired, and its sanitary conveniences placed in good condition. Many of the depots at the less important stations on the road lack proper sanitary arrangements, as those which they now have are far from being clean and wholesome. The Essex Junction depot should be thoroughly overhauled inside and refurnished. This is one of the most important junction points on the road, and its waiting room should be correspondingly comfortable and attractive.

Bridges.—With few exceptions the bridges upon these divisions are structures of sufficient carrying capacity to properly convey the traffic of the road. At present the management is engaged in renewing bridges No. 4 and 5 near Winooski, known as the twin bridges, and also one span of the Waterbury bridge, work upon which is now completed. These old bridges will be taken to the Brattleboro & Whitehall Division, where they will replace other and less safe structures. The attention of the management has been called to such new bridge construction as in the judgment of the board is at present needed. No. 71, the Waterbury bridge, should be entirely renewed, instead of a single span; the Harlow bridge, No. 50, should also be rebuilt, as its safety at present is insured only by the presence of "horses" underneath; No. 41 ought also to be rebuilt, and the north abutment of No. 87 should be renewed.
Special Statutory Requirements.—The inspection of 1896 disclosed an improvement in the observance of the law requiring switches, frogs and guard rails to be blocked. Occasionally, instances of neglect were seen, but the law is very well complied with. The inspection of 1895 found many of the crossing signs on these divisions illegible from age and the action of the elements. All of these have now been repainted or replaced, with the exception of a few at points north of Swanton Junction. With a comparatively few exceptions the cattle guards are all in place, and, with the approaches thereto, neatly whitewashed. The road is reasonably well fenced and the right of way generally well cared for. Upon most sections the weeds and thistles are cut in compliance with law. At all overhead obstructions, less than 20 feet in clear height above the rail, there are the protection warnings required by the statute.

MISSISQUOI DIVISION.

Road-bed.—The inspection of 1895 found this division in the most unfavorable condition. In the special report to the railroad management, its defects were pointed out and extensive improvements recommended. These improvements have been made and the road-bed is now very much improved. Four and one-half miles of 60 pound steel taken from the main line have replaced all the remaining old iron. The track is very well surfaced for the greater portion of the line, and a good number of ties have been laid. The number of section men has been largely increased, and a corresponding improvement in the condition of the track is observable. Upon a considerable portion of the road the rails have been properly spiked, and patrons now travel over it with a feeling of security. The switches are largely of the stub pattern.

Depots.—It was expected that the passenger station at North Sheldon would be rebuilt during 1896, but at the date of this report no move has been made toward this work. This station, cheaply built 25 years ago, long since became unfit for use by the patrons of the road. With the building of this depot, and the making of necessary repairs
at East Berkshire and Richford, the depots on this line will be in first-class condition. The depot at Sheldon Junction, occupied jointly by the St. Johnsbury and Lake Champlain Railroad and the Missisquoi Division, should be supplied with proper sanitary conveniences. At North Enosburgh and South Franklin, substantial repairs have been made.

_Bridges._—The Board is assured that bridge No. 23 is to be rebuilt this season, and No. 32 ought to be rebuilt or thoroughly reinforced. The other bridges upon this division are deemed sufficient for the traffic of the road and are in good condition.

_Special Statutory Requirements._—A considerable improvement in the blocking of frogs, switches and guard rails was observed. Crossing signs have been repainted and, with tell-tale warnings, are all up where required. Cattle guards are lacking in many places. The road is fairly well fenced.

**BURLINGTON AND LAMOILLE DIVISION.**

_Road-bed._—The road-bed of this division has been somewhat improved during the past two years; about two and one-half miles of 60 pound steel taken from the main line has been laid since the inspection of 1895, leaving only about one-fourth of a mile of old wrought iron, which it is expected will be replaced with steel this season. While considerable ballasting has been done, there is need of much more. The ties are in fairly good condition and the entire road-bed may be said to be safe for the traffic passing over it.

_Depots._—All the depots are in need of thorough repairs. They should be sheathed inside, hardwood floors laid, and sanitary conveniences furnished. These suggestions were made in the report of the inspection of 1895, but no repairs for any consequence have been made since that time. The need of sanitary conveniences at Underhill, Cambridge and Jeffersonville is quite imperative.

_Bridges._—The renewal of bridges Nos. 2, 5 and 6, which the board understands is to be done this season, will place the bridges on this division in very good condition. The Jericho trestle was rebuilt of Georgia pine during the season of 1895.
General Inspections.—Central Vermont R. R.

Special Statutory Requirements.—The switches were found to be properly blocked, together with the frogs and guard rails. Crossing signs and tell-tale warnings are all up where required and in good condition. The guard rails upon bridges were sufficient, and the road is reasonably well fenced.

Brattleboro and Whitehall Division.

Road-bed.—Since the inspection of 1895, the road-bed of this division has been somewhat improved. Throughout its entire length there is need of more ballast and better drainage. The gauge is only three feet, and the curves are very sharp and numerous. Some 17,000 new ties are being laid this season, but there still remains a large number that have seen too long service and ought to be immediately renewed.

Depots.—The depots on this division are nearly all in need of substantial repairs and improved sanitary conveniences; but little has been done in the past two years for improving these stations and without specifying where repairs are most urgent, it is enough to say that the attention of the management should be directed to them without delay.

Bridges.—In the matter of bridges and trestles, the improvements made since the inspection of 1895 and those contemplated during the present season merit the commendation of the Board. Nearly one thousand feet of trestles have been filled, and many others renewed or strengthened. Bridges No. 15 and 62 are this year to be replaced by iron structures taken from other divisions of the system. Bridge No. 11, although claimed to be adequate for the traffic over it, appears to be in a condition that certainly requires most careful scrutiny on the part of the management; the trestles at either end are not first-class, and the attention of the railroad officials has been called to their condition.

Special Statutory Requirements.—The law relating to the maintenance of crossing signs, tell-tale warnings and the blocking of frogs and switches is fairly well complied with. Cattle guards and fences are conspicuously absent and the right of way badly neglected. In numerous instances the
Board noted that the guard rails upon bridges were becoming soft from age and required renewals.

**Montpelier and White River Division.**

**Road-bed.**—From Montpelier to Barre the road-bed may be said to be in good condition. The Williamstown branch needs surfacing, and the ditching and drainage are bad. The old iron on the Williamstown branch should be replaced with steel; it is rough and badly worn, making a very uneven track. Good work has been done in recent years in filling nearly a thousand feet of trestle.

**Depots.**—The depots are in good condition and in all respects sufficient.

**Bridges.**—The bridges are mostly of wood. No new work has been done in the way of construction or repairs on any of the bridges during the present season. They are all estimated by the management to have a factor of safety sufficient for the traffic of the road. In some instances the guard rails and floor system are soft from age.

**Special Statutory Requirements.**—The switches, frogs and guard rails are well blocked, and tell-tale warnings and crossing signs are in place where required. The presence of cattle guards is an exception rather than a rule. The right of way is fairly free from weeds and thistles.

**Clarendon and Pittsford Railroad.**

This line extends from West Rutland through Proctor to the marble quarries in Pittsford and from Center Rutland to Rutland, a total distance of 11.78 miles.

The inspection of this road in 1895 was made by the entire Board and the clerk on August 13th, accompanied by Fletcher D. Proctor, president, and George Robinson, superintendent; the inspection of 1896 was made on the 9th day of July by Commissioner Bell.

**Road-bed.**—This road is used almost entirely for the transportation of the product of the Vermont Marble Company’s quarries and a small amount of local freight. The gauge is standard and the rails of steel weighing 56, 60 and 70 pounds
per lineal yard. The road-bed throughout the entire line is deemed to be sufficiently stable for the purposes of the road.

Bridges.—There are no through bridges on the line; nearly all of them are of comparatively short span and are of iron or steel placed upon cemented marble masonry and claimed to have a sufficient factor of safety for the traffic passing over the road.

Special Statutory Requirements.—There is lack of proper fencing all along the line. This is due, to some extent, to an arrangement between the management and the adjacent land owners. The law requiring the blocking of switches, frogs and guard rails and of placing cattle guards upon either side of grade crossings is not fully complied with and the attention of the management is directed to these faults. Crossing signs were found to be in place wherever required.

DELAWARE & HUDSON CANAL COMPANY'S RAILROAD.

RENSSELAER & SARATOGA DIVISION.

This road extends from Rutland to Rupert, some portion of which is in the State of New York, and from Castleton to the New York state line. Of this division, 36.65 miles of main line are in Vermont.

The inspection of this road in 1895 was made by the entire Board on August 14th, accompanied by R. H. Brown, engineer, and M. Dorsey, road-master; the inspection of 1896 was made by Commissioner Bell and the clerk of the Board, accompanied by assistant superintendent North and roadmaster Dorsey on the 25th day of June.

Road-bed.—The road-bed in many places is not as widely shouldered as it ought to be, but it is in very good ballast and for the most part properly drained and ditched. The steel is of 62 and 75 pounds weight to the lineal yard, tied 2,800 to the mile. It is well surfaced, and in a general way the road-bed may be said to be entirely sufficient for the traffic passing over it.
Depots.—The depot at Center Rutland, used jointly by this company and the Rutland Railroad Company, is totally unfit for service. The Board understands that the Delaware & Hudson Canal Company disclaims any interest in this depot, but the burden of providing suitable accommodations at this point rests in part on this company and should be fairly met. At West Rutland the accommodations are only fairly good, and the same may be said of the depots at Castleton, Hydeville and West Pawlet; at the latter place good sanitary conveniences should be provided.

Bridges.—The bridges on this division in Vermont are substantial structures, placed upon masonry laid in cement, and reported by the management to be of a sufficient factor of safety to safely convey the traffic of the road. All the bridge structures bear evidence of careful and thorough construction and are kept in good repair.

Special Statutory Requirements — The Board is assured that the few omissions to properly block the switches, frogs and guard rails will be attended to this season, and that tell-tale warnings will be erected at bridge No. 93. Except in isolated cases, cattle guards were all in place. Crossing signs are also in place wherever required and the road is fairly well fenced.

FITCHBURG RAILROAD.

The only mileage of this system in Vermont is that extending from the New York state line through the town of Pownal to the Massachusetts state line, about six and one-half miles of double track. The inspections were made on August 30th, 1895 and July 8th, 1896. M. P. Snyder, division superintendent, accompanied the Board on the inspection.

Road-bed.—No criticism can be offered respecting the condition of the road-bed. The steel of 65 and 75 pounds weight to the yard is well surfaced and the ties are in good condition and closely spaced.

Depots.—The depots at North Pownal and Pownal are doubtless sufficient for the needs of these small villages. The
latter station should be kept cleaner and its sanitary conveniences ought to be improved. The Fitchburg Railroad Company is a joint occupant of the depot at Bellows Falls with the Boston & Maine Railroad and the Rutland Railroad Company. The comments of the Board upon the condition of that depot will be found in the report of the inspection of the Boston and Maine Railroad.

Bridges.—There are only two bridges of considerable length and these are of iron and are model double track structures. The smaller openings are safely spanned.

Special Statutory Requirements.—The crossing signs and cattle guards are in place wherever required and the frogs and switches are properly blocked. The right of way is also kept reasonably clear of weeds and thistles.

GRAND TRUNK RAILWAY.

OPERATING THE ATLANTIC & ST. LAWRENCE RAILROAD.

This line extends from Portland, Maine, to the Canadian boundary line in the town of Norton, a distance of 171.99 miles, of which 30.56 miles are in Vermont.

The inspection of this road in 1895 was made by Commissioners Merrill and Bell and the clerk of the Board on the 25th day of September, 1895, accompanied by C. Woodman, master of transportation, and D. Stewart, road-master; the inspection of 1896 was made by Commissioner Bell and the clerk of the Board on the 9th day of June, accompanied by assistant superintendent J. M. Riddell, assistant engineer H. B. Hollinshead, and road-master Stewart.

Road-bed.—The road-bed of that portion of this line in Vermont is in excellent condition; it is widely shouldered and well ballasted. The steel is all of 65 pounds weight to the lineal yard and is well tied and the general repairs upon the road-way have been made.

Depots.—Since the inspection of 1895, the station at Island Pond has been repaired to some extent. The depot at Norton's Mills is in need of repairs and should receive the early attention of the management.
Bridges.—Several of the bridges are quite old, but are kept in an excellent state of repair, and as no heavier engines are now in use on the line than when these structures were first built, they are doubtless safe for the traffic of the road. It is understood that the two bridges located respectively 156 and 156 1/2 miles from Montreal are to be soon rebuilt. The Nulhegan bridge has been replaced with a modern structure of iron.

Special Statutory Requirements.—The switches, frogs and guard rails were found to be properly blocked, crossing signs and cattle guards in place wherever required and the right of way comparatively free from weeds and thistles.

HOOSAC TUNNEL AND WILMINGTON RAILROAD.

This line extends from Hoosac Tunnel, Massachusetts, a station on the Fitchburg railroad, to Wilmington, Vt. About sixteen miles of the line is within the state of Vermont. The gauge is three feet.

The inspection of 1895 was made on Sept. 11th, and that of 1896 on July 8th. William B. McClellan accompanied the Board as the representative of the company.

Road-bed.—The road-bed is in good repair and is constantly being improved by new ballast and the filling of small openings. Most of the steel is of 60 pounds weight to the yard and but little worn; it appears to be sufficient for many years use. There are 2,400 to 2,600 ties to the mile and they are very well preserved.

Depots.—The depots, while not modern structures in many instances, are in a very satisfactory condition. They are well supplied with sanitary conveniences and are adequate for the needs of the patrons of the road. In all cases they are kept neat and clean.

Bridges.—There are no bridges or trestles of long span, with the exception of the one at Readsboro over which passes the spur track. Some of the smaller bridges have no abutments of masonry but the wooden abutments have the appearance of strength and the timbers are in a good state of
preservation. All of them are doubtless safe for any traffic likely to pass over the road.

Special Statutory Requirements.—The switches are properly blocked and crossing signs are in place where required. The line is not fenced throughout its entire length but for the greater part of the way it passes between high bluffs and the Deerfield river and the lack of fencing is not important. The absence of cattle guards was noticed in several places.

LEBANON SPRINGS RAILROAD.

This road extends from Chatham, N. Y., to Bennington, Vt., 57.10 miles, of which 5.92 miles are in Vermont.

The inspections of this road were made on September 10th, 1895 by the entire Board and the clerk, and on July 26th, 1896 by Commissioner Bell.

Road-bed.—No particular improvements have been made upon that portion of this road which lies in Vermont for some years past, and it was found to be greatly lacking in ballast and the rails in poor alignment and of very uneven surface. The entire road-bed is in urgent need of substantial repairs. Its operation cannot be long continued in safety to the traveling public and its employees without a large expenditure of labor and money on the repair of its road-bed.

Bridges.—The trestle at Bennington, the only opening of any size within this state, is in a very unsatisfactory condition. Its floor system is very poor, ties widely spaced and more or less decayed and the stringers soft from age. The abutments also need thorough repairs and in the judgment of the Board, the whole structure should be rebuilt.

Special Statutory Requirements.—There is an entire absence of any attempt to comply with the law in respect to cattle guards; crossing signs are badly neglected, the fencing very poor and the weeds and thistles in the right of way, for the most part, uncut.

MAINE CENTRAL RAILROAD.

This line passes through a portion of the towns of Guildhall and Maidstone and, passing into New Hampshire, again enters Vermont for a short distance in the town of Canaan.
The inspection of 1895 was made Sept. 26th, by Commissioners Merrill and Bell and the clerk of the Board. Chief engineer William A. Allen, bridge-master P. N. Watson and road-master C. E. Bickford accompanied the Board. The inspection of 1896 was made by Commissioner Bell and the clerk of the Board on June 19th, accompanied by assistant superintendent Sprague, division superintendent G. F. Black and road-master C. E. Bickford.

Road-bed.—The road-bed of this line is lacking in ballast in some places, but is generally in fair condition. The usual renewals of ties are made each year and the road is fairly well surfaced and policed.

Depots.—No changes in the depots were noted, the one at Guildhall is a model structure and is neatly kept; the depot at Beechers Falls is not up to the standard of the Maine Central and should be placed in repair at an early day.

Bridges.—The bridges are all in good condition. The Guildhall trestle, 558 feet in length, is to be filled and an arched culvert built spanning the stream. It is expected that this will be completed in 1897. Pending the new work the trestle has been strengthened this season with extra stringers. Four other culverts on this line are also to be replaced by iron or steel or covered with stone in the near future.

Special Statutory Requirements.—The laws relating to the blocking of frogs, switches and guard rails, the maintaining of crossing signs and of guard rails upon bridges are very faithfully observed.

MONTPELIER & WELLS RIVER RAILROAD.

This road extends from Montpelier across the state to Wells River where it forms a junction with the Connecticut & Passumpsic Division of the Boston & Maine Railroad. The inspection of 1895 was made on September 24th by Commissioners Merrill and Bell and the clerk of the Board, accompanied by F. E. Dodge, road-master, and C. F. Robinson, bridge-master.
The inspection of 1896 was made on July 1st by Commissioners Barber and Bell, accompanied by general superintendent, W. A. Stowell, with road-master Dodge and bridge-master Robinson.

Road-bed.—Twenty miles of this line is laid with steel of 60 pounds weight to the yard, the balance being of 56 pounds weight. It is well tied and the road is fairly well ballasted. No new steel has been laid since the inspection of 1895 and only ordinary renewals of ties have been made. The physical condition of the road has not deteriorated. Only one stub switch remains on the main line.

Depots.—The depots are generally good, some of them being in all respects adequate to the business transacted. Since the inspection of 1895, the depot at South Ryegate has been repaired in response to the suggestion of the Board. In many of the depots a cold storage room has been provided for the use of the patrons of the road and is especially of service to shippers of perishable goods.

Bridges.—The bridges are nearly all of wood, resting for the most part upon fairly substantial masonry. In the special report of the road to the Board no estimate is given concerning the structural security of any bridge upon the line, except that it is stated that they are believed to be safe to carry all trains run over the road. While the bridges all have the appearance of safety, yet in the judgment of the Board, the management of the road should ascertain without delay the exact factor of safety of each bridge and by actual computation determine its carrying capacity. The Board is informed that the regular inspection of the bridges by the railroad management occurs only once in each year, except as some emergency arises and a special inspection is deemed necessary. Such infrequent examinations of bridges, the carrying capacity of which is unknown, is not sufficient to protect the traveling public, the lives of employees or property passing over the road.

The approaches to a considerable number of these bridges are narrow and not well protected. In place of masonry to
support the road-bed at these approaches, the embankment is held in place by planks, on either side, kept in place by iron rods. This should be abolished and wings of substantial masonry should be built to hold the embankment in place.

**Special Statutory Requirements.**—The blocking of switches as well as the frogs and guard rails is fairly well observed. Crossing signs and tell-tale warnings are in place wherever required. A few of the crossing signs have become weather beaten and need repainting. The fences are generally good, and the right of way generally free from weeds and thistles.

**RUTLAND RAILROAD.**

This road extends from Bellows Falls to Burlington, and includes the Addison Division from Leicester Junction to Ticonderoga, N. Y., a total distance of 135.30 miles. It was formerly operated under a lease by the Central Vermont Railroad Company, but on May 8th, 1896, under the direction of the Circuit Court, it was surrendered to the Rutland Railroad Company by which it has since been operated.

The inspection of this road was made by the entire Board and the clerk on the 22nd day of May, 1896, accompanied by superintendent J. Burdett.

**Road-bed.**—The road-bed was found to be in excellent condition; large renewals of ties have been made this season upon the southern portion of the line, but there is still need of larger renewals north of Rutland. The track is well surfaced and aligned and the cuts are well drained. The steel for the most part is of good weight and comparatively unworn.

**Depots.**—Considerable improvement has been made in the depots along this line during the past few years. There are, however, a number of old stations that need attention. The patrons of the road are entitled to comfortable, convenient and attractive waiting rooms and the management should meet these requirements as fast as practicable. New depots, or extensive improvements and repairs upon the old ones, are needed at Charlotte, Ferrisburg, Salisbury, Leicester Junction
and Center Rutland. The depot at New Haven Junction should be thoroughly repaired, new water flushed closets put in and hard-wood floors laid. This is a junction point and the need of such accommodations must be apparent to all.

Bridges.—The bridges generally are in good condition and safe for the traffic which passes over them. Nearly 90 new ones, of all lengths, have been built upon this line within the past 10 years and it is hoped that the work will continue until all are modern structures. No road in the state has so many bridges, considering its mileage, and it is important that the management be extremely vigilant in caring for its structures in order to insure the safety of passengers and property. It is understood that bridge No. 27 will be rebuilt at an early day. The attention of the management has been directed in a special report to a number of the bridges which appeared to the Board to need reinforcement or repairs.

Special Statutory Requirements.—Not all of the switches, frogs and guard rails are blocked in compliance with the law upon this subject. The Board deems this an important matter and a faithful observance of the law may prevent serious injury to employees. The attention of the management has been specially directed to the repair of a number of crossing signs that have become weather beaten and illegible. The tell-tale warnings at through bridges were all in place and the right of way was found to be clean and generally well kept. The guard rails on several of the bridges are old and tender, the location of which has been pointed out in a special report to the management. Many of the fences are out of repair, a condition which is understood to be with the consent of the land owners.

ADDISON DIVISION.

The inspection of this division was made on the 30th day of June, 1896, by Commissioner Bell and the clerk of the Board, accompanied by L. E. Roys, superintendent of bridges.

Road-bed.—The physical condition of this division of the Rutland Railroad has long been far from satisfactory. It is evident that for many years, less than the ordinary repairs
have been made upon the road-bed, bridges and buildings. There is pressing need of thorough and permanent repairs in the way of new ballast, new ties and new steel rails. The ditching and drainage is badly neglected and there are several places in the road-bed where the track is supported by ties and timbers in such a way as to suggest positive danger; these places should be filled with ballast and the road-bed made in all respects safe and stable. The traffic of this division is very light, yet, in the interest of safety to the traveling public and the employees of the road, it should be placed and kept in good condition.

**Depots.**—All of the passenger stations on this division need painting outside and better sanitary conveniences are needed at Orwell; the passenger depot at this place and the one at Shoreham have recently received repairs.

**Bridges.**—All of the bridges upon this division are reported by the management of the road to have a factor of safety of at least three, and to be safe for any traffic passing over the road. Bridge No. 22 has been reinforced and strengthened since the inspection of 1895. The Baldwin dry bridge is in much the same condition as in former years, except that the space beneath is more completely filled with supporting timbers.

**Special Statutory Requirements.**—The switches, frogs and guard rails are generally well blocked and the crossing signs and tell-tale warnings are all up in compliance with law. The cattle guards of this division are insufficient, both in number and kind and only a small part of the line is properly fenced.

**WOODSTOCK RAILROAD.**

This road extends from White River Junction to the village of Woodstock, a distance of 14 miles; the gauge is standard.

The inspections of this road were made on the 17th day of September, 1895, and on the 2nd day of July, 1896. President J. J. Dewey and general superintendent John G. Porter accompanied the Board upon these inspections.
Road-bed.—The road-bed was found to be in relatively good condition. During 1895 fifty tons of steel rails, weighing 56 pounds to the lineal yard, were laid and the management intends to lay 100 tons more this season; the old iron rails are thus being gradually replaced. The road-bed is maintained by ordinary repairs and reasonably frequent renewals of ties.

Depots.—The depots are adequate to the needs of the road and are well kept; the one at Woodstock in particular deserves notice as a model structure of its kind.

Bridges.—Since the inspection of 1895, four new steel girder bridges of about 24 feet span have been placed in position. There now remains one wooden bridge of about the same span, that ought also to be replaced with steel. The Quechee Gulf bridge of 200 feet span carries the road over a small stream at a height of 163 feet from the bed of the river. It is a Howe truss bridge and since the last inspection has been substantially reinforced and strengthened. The management does not furnish to the Board the factor of safety of this bridge, but claims, with some justification, that its structural security is entirely sufficient to carry with safety the traffic of the road.

Special Statutory Requirements.—Crossing signs, tell-tale warnings and cattle guards are usually in place where required; switches, frogs and guard rails are generally well blocked. At the date of above inspections, the weeds and thistles were not cut in compliance with law and the attention of the management is directed to this matter.
CHAPTER III.

PETITIONS AND DECISIONS.

So much of the petitions made to the Board to the date of this report, and of its proceedings thereon, as is necessary to state the questions presented and decided, is given in this chapter. In every case where decision has been made, a copy thereof has immediately been furnished to each of the parties in interest.

LOCATION OF STREET RAILWAY IN BRATTLEBORO.

In Board of Railroad Commissioners,

Montpelier, Vt., March 2, 1895.

In the matter of the petition of the Brattleboro Street Railroad Company vs. the Selectmen of Brattleboro and others.

The petition was as follows:

To the Board of Railroad Commissioners of the State of Vermont:

Your petitioner, the Brattleboro Street Railroad Company, a corporation existing under the laws of this state, and located at Brattleboro, in the county of Windham, respectfully represents that it was incorporated by an Act of the legislature of this state in the year 1888; and that it proposes to construct a street railroad in the streets and highways of said Brattleboro as hereinafter named; that heretofore, to wit, on the first day of February; A. D. 1895, it filed its statement in writing, signed by its board of directors, with the board of selectmen of said town of Brattleboro, consisting of G. A. Boyden, B. A. Clark and H. F. Weatherhead; and also filed a like statement, on the same day with the town clerk of said Brattleboro, of which the following is a true copy:
To the Board of Selectmen of the town of Brattleboro in the county of Windham in the state of Vermont:

The undersigned, the Brattleboro Street Railroad Company, a corporation existing under the laws of this state, by its board of directors, hereby files its statement, as required by Act No. 86 of the Acts of 1894, and states:

That it proposes to construct a railway in the streets and highways of said Brattleboro, as follows:—Commencing on Canal street, at the south end of Birge street, thence running easterly along the south side of Canal street, to the south end of Main street bridge across Whetstone brook, thence across said bridge in the centre thereof, and up Main street in the centre thereof, to High street, thence up High street on the north side, thence to Western avenue, thence along the south side of Western avenue to and across the bridge across Whetstone brook, at West Brattleboro, thence through the village of West Brattleboro, across the bridge near the post office to a point near the dwelling house of Mrs. Bigelow; also from the above-mentioned line at the south end of Main street bridge along the south side of Depot street, to a point near the track of the Central Vermont Railroad Company; together with all necessary switches and turnouts, to be located at convenient places, and tracks leading to car sheds; one line of poles and wires to be erected along said streets as above described except on Main street, where two lines will be erected, all to be located so as to be convenient for the purpose, and be least objectionable to abutting owners; electricity by the trolley system to be the kind of power to be used in operating said line; said bridges to be suitably and properly strengthened if found necessary; the track to be single, except turnouts and switches, and to be T rails.

Reserving the right of filing any statement hereafter as to any alteration, extension or addition to said line, as may seem expedient.

Dated at Brattleboro this 1st day of February, A. D. 1895.

Brattleboro Street Railroad Company, by

S. N. Herrick,
S. S. Hunt,
Edward C. Crosby,
E. L. Waterman,

Directors.
A statement of which the above is a duplicate has this day been filed with the town clerk of the town of Brattleboro. February 1st, 1895.

S. N. HERRICK,
S. S. HUNT,
EDWARD C. CROSBY,
E. L. WATERMAN,

Directors.

That upon filing said statement due notice was given, and after full hearing, a majority of said board of selectmen rendered their decision in writing, in the words following:

Having heard the parties interested in the subject matter of this petition, we decline to grant permission to the petitioners to locate an electric street railway over and through the streets of Brattleboro as specified and set forth in this petition.

February 1st, 1895.

G. A. BOYDEN,
BARN A. CLARK,
Selectmen of Brattleboro.

And on the same day one of said selectmen rendered his decision in writing in the words following:

I do not agree with the other selectmen in the above decision, and am in favor of permitting the location as requested.

Brattleboro, February 1st, 1895.

H. F. WEATHERHEAD,
Selectman of Brattleboro.

And your petitioner says that it has failed to agree with said board of selectmen who are the officers having charge of the streets and highways named in said statement, as to the location, manner of construction or use of such railroad.

Your petitioner therefore prays that your Board may examine the premises, hear the parties, and grant permission for the location and construction of said railroad, on the streets and highways, and according to said statement so filed with said selectmen, which is referred to and made a part of this petition for a full description of the line proposed, and to decide such questions as may legally and properly be presented to your Board.
PETITIONS AND DECISIONS.

Dated at Brattleboro, in the county of Windham, this 2nd day of February, A. D. 1895.

S. N. HERRICK,
S. S. HUNT,
EDWARD C. CROSBY,
E. L. WATERMAN.

Directors of the Brattleboro Street Railroad Company.

The provisions of the statute under which this proceeding was had are as follows:

V. S. § 3935. A person or corporation proposing to construct a railway in any of the highways or streets in this state shall file with the selectmen of the town or with the trustees or bailiffs of the village, or aldermen of the city, and with the town, village, or city clerk of the town, village, or city in which said railway is proposed to be located, a statement defining the streets and highways and the portion thereof in which said railway is to be located, the tracks, turn-outs, and switches to be placed therein, the culverts and bridges that the same is to cross, the manner of improving and strengthening the same, the location of poles or wires that are intended to be used in connection therewith and the kind of power to be used in operating the same, before beginning the construction of said railway.

V. S. § 3936. The statement referred to in the preceding section may be made with reference to sections or portions of said railway, and before beginning the construction of such railway such statement must be made and filed and the permission of the selectmen, trustees, bailiffs, or aldermen obtained for building and operating said railway in the streets and highways described in the statement.

V. S. § 3937. If such person or corporation fails to agree with the selectmen, trustees, bailiffs, or aldermen, as the case may be, as to the location, manner of construction, or use of such railway, either party may apply to the railroad commissioners. Upon such application, said commissioners, after due notice to the parties, shall examine the premises, hear the parties, decide the questions presented to them, and their decision shall be final.

The petition was filed with the Board on the 4th day of February, 1895.
The decision was as follows:

In the matter of the petition of the Brattleboro Street Railroad Company to the Board of Railroad Commissioners, under the provisions of No. 86, of the Acts of 1894.

This cause came before the Board upon the petition of the Brattleboro Street Railroad Company, dated on the 2nd day of February, A. D. 1895, and was heard at Brattleboro, Vt., on the 22nd day of February, A. D. 1895, after due notice to the petitioner and to the selectmen of the town of Brattleboro. The petition may be referred to.

The petitioner appeared by its counsel, Waterman, Martin & Hitt. The town of Brattleboro did not appear except that a majority of the board of selectmen were present at the hearing and as citizens of Brattleboro participated therein, but did not so appear in their official capacity. The Estey Organ Company, J. J. Estey, L. K. Fuller, George W. Hooker, B. D. Harris, N. F. Cabot, Francis Goodhue, O. J. Pratt, Mrs. L. K. Fuller, William F. Richardson and L. F. Adams, appeared by Haskins and Stoddard their attorneys, and opposed the petition.

It appeared that the petitioner was incorporated as stated in the petition, that $12,300 of its capital stock has been subscribed, but no part thereof has yet been called for or paid in.

It also appeared that the petitioner had failed to agree with the selectmen of the town of Brattleboro as to the location, manner of construction or use of the railroad as stated in the petition.

At the opening of the hearing, counsel for the opponents to the petition insisted that the Board had no jurisdiction, under the Act of 1894 referred to, because the permission of the selectmen of the town of Brattleboro had not been first obtained, and that the Board could only have jurisdiction when a disagreement arose as to the location, manner of construction or use of the railroad, after permission of the selectmen had been first obtained for building and operating the same. In the opinion of the Board, such is not a fair construction of the Act in question. The commissioners believe that the charter of the petitioner, and the Act of 1894, when
construed together, authorize the petitioner to build and operate its road in the town of Brattleboro, and constitute this Board a tribunal to locate the same, upon a failure of the petitioner and the proper municipal authorities to agree with reference thereto.

Later in the hearing, the opponents claimed that as to that portion of the route of the proposed railroad within the limits of the incorporated village of Brattleboro, the selectmen of the town had no jurisdiction; that their permission to build and operate the railroad therein was not necessary or a prerequisite, and conceded that as to that part of the road in the incorporated village, the bailiffs of the village were the proper officers to grant such permission.

The charter of the village of Brattleboro authorizes the incorporated village, among other things, to "direct the cleaning, repairing and improvement of streets, highways, commons or walks, and protect the same from injury," and it appeared that the village had enacted ordinances that to some extent regulated the use of the streets.

The streets of the village, in common with the other highways in the town, are kept in repair by the town road commissioner, and the selectmen have sole authority to lay out or discontinue highways in the village, and have charge of the bridges therein over which it is proposed to construct the railroad. The petitioner contended that the selectmen were the proper authority to grant permission to build and operate the railroad in the limits of the village, but to meet the contention of the opponents, introduced, nearly at the close of the hearing, and under objection from the opponents, the permission, in writing, of the bailiffs of the village for the location of the railroad in the village limits on the same route as proposed in the petition presented to this Board.

The only other question presented to the Board for determination was as to the location of the proposed railroad.

The Commissioners, after an examination of the premises and hearing the parties, decide that as to so much of said proposed railroad as is without the limits of the incorporated village of Brattleboro, it shall be located as described in the petition. As to so much of said road as is within the incor-
porated village of Brattleboro the Commissioners are of the opinion that the permission of the bailiffs of said village for its location therein, is an agreement with the proper officers as contemplated in the act of 1894. If the act of 1894 be construed as claimed by the petitioner, and as matter of law under such act the selectmen of the town are the officers who should grant permission for the location of the road in the village limits, the Commissioners, in view of the fact that the opponents of the petition failed to point out any route for the proposed road whatever, or to show wherein the route asked for by the petitioner is not proper or suitable, decide that the railroad shall be located in the limits of the incorporated village as described in the petition in this case, except that it shall not be laid from the south end of Main street along Depot street to a point near the track of the Central Vermont Railroad Company. The Commissioners do not attempt to locate the route of the road by course and distance or more definitely than as set forth in the petition, but either party may apply for further hearing, if desired, upon the question as to the precise location of the railroad.

OLIN MERRILL,
O. M. BARBER,
C. J. BELL,

Railroad Commissioners.

Street Railway Crossing at West Rutland.

In Board of Railroad Commissioners,
Montpelier, VT., May 17, 1895.

In the matter of the petition of the Selectmen of the town of West Rutland vs. The Delaware & Hudson Canal Company.

The petition is as follows:

To the Hon. Board of Railroad Commissioners of the State of Vermont:

The undersigned, selectmen of the town of West Rutland respectfully say:

That the present condition and arrangement of the crossing of the tracks of the Rutland Street Railway Company and
the Delaware & Hudson Canal Company in West Rutland, are such that the security and accommodation of the public, traveling on both of said roads, require that said crossing should be altered, improved and rendered more secure.

Wherefore, your petitioners pray that your Hon. Board may, at your earliest convenient date, inquire into the condition of said crossing, and cause such improvements and alterations thereof to be made as, in the judgment of your Hon. Board, shall best subserve the accommodation and security of the public.

Dated at West Rutland in the County of Rutland, the 9th day of March, 1895.

R. W. SMITH,
CHAS. A. PARKER.

The petition was filed with the Board on the 16th day of March, 1895.

The grade crossing referred to in the petition was in existence prior to the passage of the law (V. S. Sec. 3939) that prohibits such crossings, except upon permission of the Board.

The case is sufficiently stated in the decision.

DECISION.

In the matter of the petition of R. W. Smith and Chas. A. Parker, selectmen of the town of West Rutland, relative to the condition and alleged insufficiency of the crossing of the tracks of the Rutland Street Railroad Company and those of the Delaware & Hudson Canal Company near West Rutland, at a point where the track of the latter company crosses the highway.

Upon seasonable notice to the parties in interest, the Board met the parties at the scene of the crossing in the town of West Rutland, on the 1st day of May, 1895. The petitioners appeared for themselves, the Delaware & Hudson Canal Company was represented by its engineer, R. H. Brown, and the Rutland Street Railroad Company was represented by its attorney, F. C. Partridge.
An inspection of the crossing disclosed that since the building of the electric road the cars of the Rutland Street Railroad Company, in crossing the tracks of said Delaware & Hudson Canal Company, had passed over the tops of the rails of the latter company, no provision for a smooth and safe passage having been made by the use of a crossing frog or by notching the rails. The unevenness of the road bed of the Rutland Street Railroad Company, caused by this condition of affairs, created a jolting of the car which was liable to throw the trolley from the wire and stop the car directly upon the crossing, or to derail the car itself.

The petitioners asked that the Board direct the use, by the Rutland Street Railroad Company and the Delaware & Hudson Canal Company, of such safety appliances and safeguards against possible accidents as will effectually remove the dangers and difficulties complained of.

Said crossing is located within the limits of the highway leading from West Rutland to the city of Rutland, and has been in use by the Rutland Street Railroad Company for several years, first as a horse railroad and since the autumn of 1894 as a trolley electric road. It is decided that the present crossing of the two railroads at this point is unsafe and unfitted for the use made of it and the Board orders and directs that a Pennsylvania Railroad Standard Steam and Electric Railroad Crossing be put in at the expense of the Rutland Street Railroad Company, in such manner as shall be approved by said Delaware & Hudson Canal Company, and that the maintenance, including the necessary renewals thereof, be divided, one third to be paid by said Delaware & Hudson Canal Company and two thirds by the Rutland Street Railroad Company. The Board further orders that the Rutland Street Railroad Company maintain its wires and other overhead obstructions at that crossing at least twenty feet in clear height above the top of the rails at said crossing and that it shall erect a sign post, on either side of said crossing and at a distance of not more than fifty feet therefrom, upon which shall be painted in large and distinct letters the word "STOP," and in the operation of its road shall stop its cars at said sign post before attempting to cross; that after stop-
ping, the conductor of the electric car shall go forward on the track of said Delaware & Hudson Canal Company and ascertain if a train is approaching said crossing, and if not he shall give the motor-man the signal to cross, and said conductor shall remain on said crossing until his car has passed over.

It is further ordered that said Delaware & Hudson Canal Company shall not, in the future, run its trains over said crossing at a greater speed than twenty miles an hour.

The conditions and regulations hereinbefore specified are to be complied with and observed until the further order of the Board and while the Rutland Street Railroad Company transports passengers only over the crossing in question, not further than its present terminal in West Rutland.

OLIN MERRILL,
O. M. BARBER,
C. J. BELL,
Railroad Commissioners.

Subsequent to making the foregoing decision, the Delaware and Hudson Canal Company by H. G. Young, its 2nd Vice President and Manager, filed with the Board its written protest against the foregoing decision, which protest is as follows:

To the Railroad Commission of the State of Vermont:

Gentlemen,—The undersigned, second vice president and general manager of the Northern Railroad Department of the Delaware & Hudson Company, hereby protests against the decision made by your body March 17th, 1895, in the matter of the petition of R. W. Smith and Charles A. Parker, selectmen of the town of West Rutland, providing for the crossing of the railroad of said Delaware & Hudson Canal Company by the Rutland Street Railroad near West Rutland at grade, and bases such protest on the following grounds:

First. It is and should be the policy of the law to forbid and discourage crossings of steam railroads by electric and other surface roads at grade. Experience has demonstrated that such crossings, however ample the precautions to secure
safety, are always attended with danger. The sure and expeditious passage of electric cars over the tracks of a steam road requires that every part of the devices for moving the cars shall be in perfect order and work perfectly. This is not at all times the case, and peril is incurred. The crossings are made in all seasons and under all circumstances of weather and atmospheric conditions, and it is not infrequently the case that human foresight and care fail to secure safety. To leave or create an opportunity for misfortune when it can be avoided is not in conformity with the policy now recognized by all concerned with railroad management.

Second. In this case the situation and formation of the ground in the vicinity of this crossing is such that the tracks of the Rutland Street Railroad can be taken over the tracks of the Delaware & Hudson road without great expense. By turning from the present line where it is on high ground adjacent to the steam road, an overhead crossing can be made requiring in fact but one approach to the bridge. Such conditions should forbid a crossing at grade, as thereby absolute safety will be secured, and that should be the end sought above and beyond all others.

Third. This crossing is of no utility or value to the Delaware & Hudson road. If made as provided for in your decision it seriously interferes with the operation of its road and multiplies danger to its trains. This of itself is bad enough, but its injustice is still more apparent from the provision requiring it to bear one-third of the expense of maintaining it. Your decision fastened upon the company I represent a constant source of danger, and compels it to pay one-third of the expense of keeping it there. If you had directed an overhead crossing and called upon this company to bear some part of the expense, there would have been reason in the decision. Against your decision I respectfully and emphatically protest because it is one that should not have been made.

Dated June 3rd, 1895.

Respectfully yours,

H. G. YOUNG,
2nd Vice President.
No further order in this case has been made by the Board and at the date of this report the Board understands that neither the Rutland Street Railroad Company nor the Delaware & Hudson Canal Co. have complied with that part of the order of the Board which directs a Pennsylvania Railroad Standard Steam and Electric Crossing at the point in question, nor has any crossing or device been substituted at this point to render the passage of the electric cars across the steam road more safe or secure than at the time hearing in this case was had. In other respects the Board understands its order has been complied with.

It is claimed by the Rutland Street Railroad Company that it is perfectly willing upon its part to obey the order of the Board touching this matter, but that the Delaware & Hudson Canal Company objects and refuses to allow the Rutland Street Railroad Company so to do. The Delaware & Hudson Canal Company, on the other hand, denies that it has interfered with, or prevented the carrying out of this order of the Board on the part of the Rutland Street Railroad Company.

In due time the Board will take such further action in the matter as it is advised may be proper and make further report thereof.

Grade Crossing of Electric and Steam Railways in Essex.

In Board of Railroad Commissioners,

Montpelier, Vt., May 18th, 1895.

In the matter of the petition of the Military Post Street Railway Company vs. the Central Vermont Railroad Company.

This is a petition by the Military Post Street Railway Company for permission to construct its track at grade across a spur track of the Central Vermont Railroad Company near Fort Ethan Allen.

The spur track in question extends from the main line of the latter company into the lands belonging to the U. S. Government at Fort Ethan Allen, and the point of crossing is (5)
where said spur track crosses the highway, and is within the limits of the highway in the town of Essex.

The petition was filed with the Board on the 16th day of March, 1895.

This petition was brought under V. S. Sec. 3939, which provides as follows:

"No street railroad or other railroad shall hereafter be laid or constructed across another railroad at grade, unless permission of the railroad commissioners for such grade crossing is first obtained. Such permission shall only be granted after a public hearing before the commissioners, held in the town in which such crossing is proposed, and if granted the commissioners shall fix the terms upon which and the manner in which such crossing shall be maintained."

The case is sufficiently stated in the decision which was as follows:

In the matter of the petition of the Military Post Street Railway Company praying for permission to cross, at grade, the spur track of the Central Vermont Railroad leading from the main line into the reservation of the United States Government at Fort Ethan Allen.

On proper notice to the parties in interest the Board met on the premises of the proposed crossing in the town of Essex on the 4th day of May, 1895. The Military Post Street Railway Company was represented by its president, F. C. Kennedy, and C. W. Brownell, its attorney; the Central Vermont Railroad Company appeared by its attorneys, C. W. Witters and C. A. Prouty. The claims of both parties were heard and the premises inspected. Pending the submission of estimates of the expense of both an over-head and under-grade crossing, the petition of W. F. Chapin, I. B. Whitcomb and C. S. Atherton, selectmen of the town of Essex, and I. N. Chase, D. Yandow, H. J. Fuller, J. W. Davidson and H. D. Drury, president and trustees of the village of Essex Junction, who claim to be parties in interest, was received, praying for a re-hearing and asking the Board to sanction the establishment of said crossing at grade. Upon this petition and the assent of both the Military Post Street Railway and the Central Vermont Railroad Company, a re-hearing was
granted, and the Board again met at the office of M. A. Bingham, Esq., in the town of Essex on the 17th day of May, 1895. At this hearing the Military Post Street Railway Company was represented by its attorneys, W. P. Dillingham and C. W. Brownell; the Central Vermont Railroad Company appeared by its attorneys, C. W. Witters and C. A. Prouty; the town of Essex was represented by M. A. Bingham, and the town of Colchester was represented by H. F. Wolcott, its attorney. The parties in interest were fully heard and the premises again inspected by the Board. The location of the proposed crossing is at a point where said spur track of the Central Vermont Railroad Company crosses the highway leading from Essex Junction to Winooski, and is within the limits of said highway.

While the Board is very reluctant to permit the construction of one railroad across another at grade, yet in view of the peculiar conditions which obtain at this crossing, permission is hereby granted to the Military Post Street Railway Company to cross said spur track of the Central Vermont Railroad Company at grade, upon the following conditions, viz.—

That a Pennsylvania Railroad Standard Steam and Electric Railroad Crossing, or some other approved crossing equally as good, be put in at the expense of the Military Post Street Railway Company, in such manner as shall be approved by said Central Vermont Railroad Company, and that the maintenance, including the necessary renewals thereof, shall be borne entirely by said Military Post Street Railway Company; that the wires and other overhead obstructions of said latter company be maintained at a clear height of at least twenty feet over the top of the rails at said crossing, and that said Military Post Street Railway Company shall erect a sign post, on either side of said crossing and at a distance of thirty feet therefrom, upon which shall be painted in large and distinct letters the word "STOP," and in the operation of its road shall stop its cars at said sign post before attempting to cross; that after stopping, the conductor of the electric car shall go forward on to the spur track of said Central Vermont Railroad Company and ascer-
tain if a car or train is approaching on said spur track, and if not he shall give the motor-man the signal to cross, and said conductor shall remain on said crossing until his car has passed over. If the bank to the easterly of said crossing, and between the highway and the Central Vermont Railroad, is so removed that the conductor of the electric car can obtain an unobstructed view of said spur track to the main line, the Military Post Street Railway Company may apply to the Board of Railroad Commissioners for a modification of the condition requiring the conductor to go forward upon the spur track before crossing the same with car.

The permission hereby given to remain in force until the further order of the Board, and while said Military Post Street Railway Company transports passengers only over its road at said crossing.

OLIN MERRILL,
O. M. BARBER,
C. J. BELL,

Railroad Commissioners.

Train Service at West Danville,

In Board of Railroad Commissioners,

West Danville, Vt., July 31st, 1895.

In the matter of the petition of D. C. Harrington and 29 others vs. the St. Johnsbury & Lake Champlain Railroad Company.

The petition in substance alleged that on the 30th day of June, 1895, the St. Johnsbury & Lake Champlain Railroad Company issued an order, the terms of which directed the eastern and western bound mail trains to pass the station at West Danville without stopping; and alleged that said trains had heretofore stopped at said stations, and that by the discontinuance thereof the accommodation to the public generally, and the people of the village of West Danville and vicinity in particular, were materially lessened, and asked for an order requiring the stoppage of these trains at said station.
The petition was filed with the Board on the 16th day of July, 1895, and after seasonable notice to all parties, a hearing thereon was had at West Danville on the 31st day of July, 1895.

The decision was as follows:

In the matter of the petition of D. C. Farrington and others relative to the alleged insufficiency of train service at West Danville station on the St. Johnsbury & Lake Champlain Division of the Boston & Maine Railroad.

Pursuant to seasonable notice to all the parties in interest the Board met at West Danville on July 31st, 1895. The petitioners were represented by H. C. Bates, counsel, and the Boston & Maine Railroad Company was represented by division superintendent H. E. Folsom, assistant superintendent E. H. Blossom, and Harry Blodgett, counsel.

Evidence was introduced by the petitioners tending to show that the citizens of West Danville and vicinity were not properly accommodated by the train service at this point because of the passage of the east and west bound mail trains by this station without making any stop. This testimony was uncontradicted on the part of the railroad company. The testimony also disclosed the fact that the present train schedule went into effect July 1st, 1895, and that previous to that time said east and west bound mail trains stopped at West Danville, and further that with the present schedule there were two passenger trains each way stopping at this station. From the testimony the Board finds that the passenger traffic at this station is small in volume and that the needs of the public will be amply satisfied by the stopping of the east bound mail train due to leave West Danville at 1.46 p. m., and by furnishing accommodations for passengers on the freight train, west bound, leaving St. Johnsbury at 12.20 p. m.

It is, therefore, ordered that the Boston & Maine Railroad Company stop its east bound mail train at West Danville whenever there are passengers at said station desiring to go east as far as St. Johnsbury, and also that said railroad Company furnish accommodations for the carriage of passen-
gers on its freight train, west bound, leaving St. Johnsbury at 12.20 p.m., but whenever said railroad company stops its west bound mail train leaving St. Johnsbury at 3.20 p.m., the provision respecting the furnishing of accommodations for passengers on west bound freight train may be vacated. This order to remain in force until the further action of the Board.

O. M. BARBER,
C. J. BELL,
Railroad Commissioners.

GRADE CROSSING IN THE TOWN OF BARTON.

In Board of Railroad Commissioners,

MONTPELIER, VT., Oct. 2nd, 1895.

In the matter of the petition of the Boston & Maine Railroad vs. the town of Barton.

This is a petition by the Boston & Maine Railroad, filed with the Board on the 8th day of June, 1895, asking it to determine whether a highway recently laid out in the town of Barton should be permitted to cross the track of said railroad at grade. The petition was as follows:

To Olin Merrill of Enosburgh, O. M. Barber of Arlington and C. J. Bell of Walden, Railroad Commissioners within and for the State of Vermont:

The undersigned Boston & Maine Railroad, a corporation existing under and by virtue of the laws of the states of Maine, New Hampshire and Massachusetts, humbly represents to your Honorable Board, that it is operating the Connecticut & Passumpsic Rivers Railroad by virtue of a lease from the Connecticut and Passumpsic Rivers Railroad Company, a corporation existing under and by virtue of the laws of Vermont, and that it has been operating said last named railroad under said lease for more than seven years last past and that its said lease will not, by its terms, expire till the lapse of ninety nine years from the first day of January A. D.
PETITIONS AND DECISIONS.

1887. And that said leased road runs through Barton village in said town of Barton, county of Orleans and state of Vermont.

That the selectmen of said town of Barton on the 6th day of May, 1895, on a petition of sundry freeholders of the said town of Barton, caused a survey to be made for a highway in said Barton village as follows: "Beginning on the westerly side of High street at a point 53½ feet southerly from the center of the most southerly of the two large elm trees on lot No. 6 of O. D. Owen's addition to Barton village and running thence 84 degrees west, 18 rods and ten links to the Boston & Maine Railroad; thence south 83 degrees west across said Boston & Maine Railroad at grade, 11 rods; thence south 75 degrees west 8 rods to Main street.

And on the 23rd day of May, 1895, said selectmen ordered said highway to be laid out and then and there laid out said highway two rods wide according to the survey aforesaid and ordered that the said crossing across the railroad aforesaid be at grade, and made said survey the center line of said highway. And your petitioner further represents that though the said selectmen call the said railroad the Boston & Maine Railroad, it is in fact the same road which is owned by the said Connecticut & Passumpsic Rivers Railroad Company and the same leased to and operated by the petitioner, the Boston & Maine Railroad. And your petitioner further represents that said crossing, if allowed to be at grade will be a great injury to your petitioner and very dangerous to the traveling public. That said selectmen have fixed no time in their order laying out said highway for beginning work thereon, but they have lodged the petition on which they laid out said highway and their survey and order laying out the same for record in the town clerk's office of said town of Barton.

Your petitioner therefore humbly prays your Honorable Board to take said matter into consideration as is provided by Section 3381 of the Revised Laws of Vermont as amended by No. 20 of the Acts of 1886, and determine whether said highway crossing over said railroad ought to be at grade, and your petitioner will ever pray.
Dated at Newport in the County of Orleans the 4th day of June, 1895.

Boston & Maine Railroad,

By its attorneys,

Dickerman & Young.

The statute under which this petition was brought (Revised laws, Section 3381, amended by 1886 No. 20, Section 1, now Vermont Statutes, Sections 3838-3839) provided as follows:

Sec. 3838. "If, after laying out and constructing a railroad a turnpike or other way is so laid out as to cross said railroad, the turnpike or other way may pass over, under, or across the railroad and shall be so built as not to obstruct or injure it, but in case the turnpike or other way is laid out to cross the railroad at grade, the railroad commissioners, on application of the parties owning or operating the railroad, shall, upon notice and hearing, determine whether said crossing ought to be at grade, and if the commissioners determine that the crossing ought not to be at grade, it shall be constructed over or under the railroad.

Sec. 3839. "The application to the railroad commissioners provided in the preceding section, may be made at any time before the expiration of the time fixed in the order laying the turnpike or way for beginning work thereon."

In the matter of the petition of the Boston & Maine Railroad Company relative to the proposed new highway crossing in the town of Barton.

This is an application by said Boston & Maine Railroad Company, operating the Connecticut & Passumpsic Rivers Railroad, asking the Board to determine whether a highway laid out by the selectmen of the town of Barton across the track of the last named railroad ought to be at grade.

The application to the Board is made under the provisions of Revised Laws, Sec. 3381, as amended by Sec. 1 of No. 20, Acts of 1886; the provisions of these two sections are embodied in Vermont Statutes, Sec. 3838.

After due notice the Board met the parties and their counsel at Barton, Vermont, on the 30th day of July, 1895, examined the premises and heard the evidence. The Boston
PETITIONS AND DECISIONS.

& Maine Railroad Company appeared by H. E. Folsom, division superintendent, and Dickerman & Young, counsel. The town of Barton appeared by its selectmen and W. W. Miles, its counsel.

It appeared that the highway in question was laid out at grade across the track of the Connecticut & Passumpsic Rivers Railroad Company by the selectmen of the town of Barton on the 23rd day of May, 1895, and that the order so laying out said highway was properly filed in the office of the town clerk of said town of Barton, but no time was fixed in such order for beginning work on said highway. The application to this Board was made on the 8th day of June, 1895.

Such highway is laid out from High street to Main street in the village of Barton and the proposed grade crossing is at the point where it crosses the track of said Connecticut & Passumpsic Rivers Railroad Company. This point is between a grade crossing at the depot in said village and an under-grade crossing about nineteen hundred feet northerly from the depot, and is located about thirteen hundred feet southerly from said under-grade crossing.

It was contended on the part of the Boston & Maine Railroad that the proposed grade crossing ought not to be permitted because of the obvious danger attendant upon such crossings, and because the crossing was not necessary.

The town of Barton claimed that the public good, as well as the convenience and necessity of individuals, required and warranted the establishment of said crossing.

If established, the crossing would be a convenience to a few inhabitants of the village, and possibly might divert from either of the two existing crossings some travel, but it is not, in the judgment of the Board, a public necessity and ought not to be at grade. For obvious reasons sound public policy dictates the abolishment of grade crossings as fast as may be, and the Board feels unwilling to give its sanction to their establishment, except in cases where the strongest reasons so demand. The convenience of a few inhabitants is not, in the judgment of the Board, a sufficient reason for exposing the public and the railroad company to the dangers that are attendant upon grade crossings. This crossing can readily be constructed under the railroad.
The town contends that under Sec. 2 of No. 21, Acts of 1888, now Vermont Statutes, Sec. 3842, the Board has authority to order an under-grade crossing in this case, and to apportion the expense. However much the Board might feel inclined so to do, if authorized by statute, it is of the opinion that the statute in question does not confer such authority in the case at bar.

OLIN MERRILL,
O. M. BARBER,
C. J. BELL,

Railroad Commissioners.

Abolishment of Grade Crossings in Ryegate.

In Board of Railroad Commissioners,

Montpelier, Vt., Oct. 22nd, 1895.

In the matter of the petition of M. H. Gibson and nine others for the change of location of the highway, so as to avoid two dangerous grade-crossings in the town of Ryegate.

The decision of the Board states the petition and proceedings, and was as follows:

In the matter of the petition of the citizens of the town of Ryegate for the change of location of a highway so as to avoid two dangerous grade crossings on the Connecticut & Passumpsic Division of the Boston & Maine railroad in said town of Ryegate.

This petition was filed with the Board on the 16th day of September, 1893, and is as follows:

To the Honorable Board of Railroad Commissioners for the State of Vermont:

Messrs: We, the undersigned, legal voters in the town of Ryegate, request you to examine and change the location of the highway in town of Ryegate extending from place of Andrews Millis to the lower crossing on the B. & M. R. R. near Wells River. We wish the highway changed from east side of track to the west side in order to avoid these two
crossings. They are exceedingly dangerous ones. Five persons have come near being killed there within the last two years.

M. H. Gibson and 9 others.

On the 27th day of September, 1895, after due notice to the selectmen of the town of Ryegate, the Boston & Maine Railroad, the petitioners, and the owners of the land adjoining the crossings sought to be abolished, a hearing was had on the premises in said Ryegate. The town of Ryegate appeared by its selectmen and Alexander Dunnett, its attorney; the Boston & Maine Railroad by H. E. Folsom, superintendent, and John Young, its attorney; M. H. Gibson and C. M. Wallace, who were petitioners, appeared and also represented such of the petitioners as were not present. A. J. Millis, one of the adjoining land owners, appeared in person and A. Gale, the other of said land owners, was present during a portion of the time when an examination of the premises was made.

It was conceded by the Boston & Maine Railroad that the crossings were dangerous and that the highway ought to be changed as asked for in the petition. The town of Ryegate conceded nothing.

Evidence was heard and the premises inspected by the Board. The crossings in question are some distance northerly from Wells River depot, are on the main highway extending along the Connecticut river northerly from the village of Wells River to McIndoes Falls and are about 180 rods apart. Several narrow escapes from what likely would have been serious accidents have occurred at these crossings in the last two years.

There are no buildings of any description on the highway between these crossings, and but a very narrow strip of land between the highway and the railroad, and less between the highway and the river. These crossings are blind in their approaches, especially the one nearest Wells River, and at each the highway from the easterly side approaches the crossing at quite a steep grade.

The route on which it is proposed to construct the highway on the westerly side of the railroad seems feasible and
not expensive, and in the opinion of the Board, the public safety requires the alteration to be made substantially as asked for in the petition.

The Board therefore hereby orders that said highway be altered by constructing a new highway three rods wide, the traveled track of which shall be of at least sufficient width to admit the passage of two teams going in opposite directions, and that when such alterations are made as hereinafter provided the highway extending between said crossings be closed and said two crossings abolished. Such new highway to extend from the present highway, beginning thereon at a point a short distance westerly of the Millis crossing, thence extending southerly along the westerly side of said Millis' meadow and to include within its limits as much of the bank that bounds the meadow on the west as is consistent with a reasonable grade and a reasonable expense in construction, and so on southerly across other land of said Millis and land of said Gale on substantially the line pointed out to the Board by the parties at the time of hearing, and to intersect the present highway a few rods westerly of the first crossing at substantially the point shown the Board as the point where such intersection is contemplated.

If disagreement arises as to the precise route upon which such highway can best be constructed, application may be made to the Board for a more specific location, but, in view of the spirit which seems to prevail among the parties, more specific directions in that respect are at present deemed unnecessary.

Such highway is directed to be so constructed by the Boston & Maine Railroad, and to be completed, ready for the acceptance and approval of this Board, on or before the 15th day of December, 1895, and the expense of such construction, including the land damages lawfully paid to A. J. Millis and A. Gale, shall be paid two-thirds by said Boston & Maine Railroad and one-third by said town of Ryegate. The said town of Ryegate to pay its proportion of such expense whenever
said highway is altered in compliance herewith and the same has been approved by this Board.

OLIN MERRILL,
O M. BARBER,
C. J BELL,

_Railroad Commissioners._

On the 18th day of December, 1895, the Boston & Maine Railroad notified the Board that the new highway had been completed pursuant to the foregoing order. Upon the 28th day of said December, Commissioner Bell on behalf of the Board inspected said highway, and on the 7th day of January, 1896, the written report of such inspection having been filed with the Board by Commissioner Bell, the Board accepted and approved said highway.

**Location of Street Railway in Bennington.**

_In Board of Railroad Commissioners,_

Montpelier, Vt., January 7th, 1896.

*In the matter of the petition of the Bennington & Woodford Railway Company for permission to lay its track upon certain streets in the village of Bennington.*

The petition was filed with the Board on the 23d day of October, 1895, and was as follows:

_To the Board of Railroad Commissioners:_

Comes your petitioner, the Bennington & Woodford Electric Railway Company, and respectfully represents:

That the said Bennington and Woodford Electric Railway Company is a corporation organized and existing under and by virtue of Act No. 240, passed by the general assembly of the state of Vermont and approved November 28th, 1894, and entitled “An Act to incorporate the Bennington & Woodford Electric Railway Company”

That soon after the passage and approval of said act your petitioner decided to build, equip and operate a section of
electric railway between the Bennington and Rutland passenger depot in the village of Bennington to a point opposite Camp Comfort in the town of Woodford, passing along River and North streets in said village to the Bennington and Glastenbury Railroad Company’s track, thence along said track of the Bennington and Glastenbury Company to their destination. The right to use said track being given to your petitioner by section 1 of said act.

That under section 1 of said act your petitioner must have completed its track along said River and North streets to the intersection of North street and the Bennington and Glastenbury Railroad track on or before July 1st, 1895, and upon failure so to do application must be made to the trustees of said village of Bennington for the purpose of using any streets in said village.

That your petitioner fully equipped said section of railway from North street in the village of Bennington to a point opposite Camp Comfort in the town of Woodford and that said railway was completely furnished and your petitioner started to operate the same as an electric railway on or about July 27th, 1895, and has ever since managed and operated the same.

That immediately after the said section of railway was opened for public travel your petitioner was desirous to fully complete its said railway in the village of Bennington, following from the intersection of its track with North street along North and River streets to the Bennington & Rutland passenger depot on Depot street, believing that it would be for the benefit and convenience of its patrons so to do.

That your petitioner in compliance with section 6 of said act immediately filed with the clerk of the trustees of said village of Bennington a statement and petition that your petitioner be allowed the privilege to lay its track on said two streets and operate the same by electric power, no other company having laid or started to lay or asked permission to lay a track along said two streets or either of them.

That this statement and petition was delivered to the clerk of the trustees of said village and presented at the regular meeting of said trustees for the month of August, 1895, but said trustees took no action thereon.
That just before the regular monthly meeting of said trustees of the village of Bennington for the month of September, 1895, another petition and statement as above mentioned was filed with the clerk of said trustees and when brought before said meeting the trustees of said village of Bennington refused any action on the said petition and statement.

That thereupon your petitioner filed with the clerk of said trustees the following statement:

To the Trustees of the Village of Bennington:

In accordance with section 6 of its charter granted by the legislature and approved November 28th, 1894, the Bennington and Woodford Electric Railway Company asks for permission to lay its track and operate the same by electricity, in accordance with its charter, from the Bennington and Glastenbury crossing on North street along North street and River to Bennington and Rutland Railway station on Depot street provided such work is commenced within six months time.

Bennington and Woodford Electric Railway Company,

by C. W Crispell, President.

H. W Martin, General Manager.

That at the next regular meeting of said trustees held October 7th, 1895, the above mentioned petition was presented to the trustees but no action was taken thereon and said trustees adjourned their meeting until October 14th, 1895, when the above mentioned petition was brought before the meeting of said trustees and said trustees of the village of Bennington voted not to allow your petitioner to lay its track on said two streets in the village of Bennington.

And now comes your petitioner and respectfully represents:

That your petitioner has failed to agree with said trustees of the said village of Bennington as to the location of its track on said two streets, as provided for by section 6 of said act, No. 240.

And your petitioner avers that in accordance with section 7 of said act the railroad commissioners shall have full
power to settle all disputes that may arise as to location, manner of construction or use of said railway, and that having failed to agree as to the location of its track on said two streets in the village of Bennington, it respectfully requests that your Board grant permission to lay its track from the intersection of the Bennington and Glastenbury Railroad Company's track with North street along North and River streets to the Bennington and Rutland passenger depot on Depot street in accordance with the provisions of the aforesaid act, and that your Board grant a hearing on this petition and that a notice of said hearing be given to all parties in interest.

Dated at Bennington, Vt., October 17th, 1895.

Bennington and Woodford Electric Railway Company,

By its attorney,

Charles A. Maurer.

The answer of the village of Bennington and the other material questions involved in this case are stated in the decision which was as follows:

DECISION.

In the matter of the petition of the Bennington & Woodford Electric Railway Company, praying for the permission of the Board to lay its track through and upon certain streets in the village of Bennington.

This petition was filed with the Board on the 22nd day of October, 1895, and after due notice to the trustees of the village of Bennington, a hearing was held at the village rooms in said Bennington on the 21st and 22nd days of November, 1895.

The Bennington & Woodford Electric Railway Company was represented by James K. Batchelder, Charles H. Mason and Charles A. Maurer, its attorneys, and the village of Bennington appeared by Edward L. Bates, the corporation attorney, and with him were associated, also representing said village, Charles H. Darling and William B. Sheldon.

The petition contained many allegations that are unnecessary to be stated here, and in addition thereto alleged
in substance that the petitioner had failed to agree with the trustees of the village of Bennington as to the location of its tracks on North street and River street in said village, and requested permission of this Board to lay its tracks along said streets to the Bennington & Rutland passenger depot.

At the opening of the hearing the village of Bennington moved to dismiss the petition on the ground that the same did not set forth sufficient facts to warrant any action being taken thereon by this Board. In support of the motion the petitionee urged that under section 1 of the petitioner's charter, No. 240, Acts of 1894, the petitioner having failed to construct its road on North and River streets before the 1st day of July, 1895, it was incumbent upon the petitioner to get the permission of the trustees of the village to lay its tracks in the streets in which the petitioner desired to construct its road, and that the refusal of the trustees to grant such permission wholly deprived the petitioner of the right to construct its road in any street in the village, and further that after such refusal this Board has no jurisdiction to grant the petitioner the permission asked for.

The Board held that such was not a fair construction of the charter, taken as a whole, and over-ruled the motion to dismiss.

The petitionee then filed with the Board its answer to the petition, therein in substance denying the material allegations in the petition, and especially denying that the petitioner had ever failed to agree with the trustees of said village as to the location of its tracks along said two streets in said village.

It appeared from evidence then introduced by the petitioner that prior to October 7th, 1895, a petition was handed to one of the trustees of said village by the petitioner, which in words and figures was as follows, viz.:

"To the Trustees of the village of Bennington:

"In accordance with section 6 of its charter granted by "the legislature and approved November 28th, 1894, the Ben-"nington & Woodford Electric Railway Company ask for "permission to lay its tracks and operate the same by elec-"tricity, in accordance with its charter from the Bennington (6)
"& Glastenbury crossing on North street along North street "and River to Bennington & Rutland Railway station on "Depot street, provided such work is commenced within six "months time.

"Bennington & Woodford Electric Railway Company, "by C. W. Crispwell, Pres. 

H. W. Martin, General Manager."

That at a regular meeting of said trustees, held about October 14th, 1895, the said petition was taken up and dis- cussed by the trustees, and that thereupon said trustees voted not to allow the petitioner to lay its tracks on the two streets named in said petition. This petition was then, at the re- quest of H. W. Martin, who had appeared before the Board at said meeting in behalf of said Bennington & Woodford Railway Company, delivered to said Martin, and by him taken away and never returned, and never had been filed with said trustees except as hereinbefore stated.

Section 6 of the charter of the petitioner provides among other things that said company shall file with the selectmen of the town or towns and the trustees of the village in which said railway is to be located, a statement defining the streets and highways and the portions thereof in which said railway is to be located, the tracks, turnouts and switches to be placed therein, the culverts and bridges that the same is to cross, the manner of improving and strengthening the same, the kind of power to be used in operating the road; and that such statement shall be made and the permission of the said selectmen or trustees obtained for the building of said rail- way in said streets and highways before beginning the construction thereof. Section 7 of said charter, among other things, provides that if said company fails to agree with said selectmen or trustees as to the location, manner of construc- tion, or use of said railroad, they may apply to the railroad commissioners.

The Board is of the opinion that the requirements of said section 6 are mandatory, and that in order to establish the fact that the petitioner has failed to agree with the trustees of the village as to location, manner of construction, or use
of the railway in contemplation of that portion of section 7 hereinbefore referred to, it is essential that the statements provided for in section 6 must have been filed with the trustees as in said section required. An examination of the petition that was handed to one of the trustees of the village, as before stated, discloses that in several respects such statement or petition is deficient in that it does not contain the specific matter required; and it is also doubtful, even if the petition were to be accepted as a sufficient statement, whether it was filed with the Board of trustees as required by said section 6. The Board is therefore of opinion that upon the facts contained in the petition, as supported by petitioner's evidence, there has been no failure to agree with the trustees of the village as to the location, manner of construction, or use of said railway.

The petitioner after having introduced such evidence as it desired in support of its petition, asked leave to amend the petition made to this Board by inserting therein allegations in substance that on two other occasions it had made an application to said board of trustees for permission to construct its track upon the same North and River streets and other streets in said village of Bennington, which said application said trustees had either refused to grant or had failed to take action upon.

An examination of the amendments proposed showed that in respect of filing the same with said trustees, or the sufficiency of the statements therein contained, said two applications failed to comply with the provisions of said section 6 in like manner as did the petition or application referred to, as embodied in the original petition to this Board, and upon inquiry of the petitioner by the Board it was conceded that no further or different evidence as to the substance of any application, statement or petition to said trustees by the petitioner, or failure to agree with said trustees, could be shown than in effect had been already shown with reference to the petition refused by said board on or about the 14th day of October, 1895. In view of this concession and of the holding of the Board upon the sufficiency of the petition so acted upon by said trustees, and of the filing of the same with said trus-
tees as hereinbefore stated, this Board refused to allow the petitioner to amend its petition as asked for.

For the reasons hereinbefore stated the petition now pending before this Board is dismissed without prejudice. The motion of the petitionee that costs be taxed and allowed it against the petitioner is denied.

OLIN MERRILL,
O. M. BARBER,
C. J. BELL,

Railroad Commissioners.

GRADE CROSSING AND DEPOTS AT MCINDOES FALLS.

In Board of Railroad Commissioners,

MONTPELIER, VT., FEB. 29TH, 1896.

In the matter of the petition of A. B. Perry and 45 others against the Boston & Maine Railroad and the petition of the Boston & Maine Railroad relating to the same subject matter

The respective petitions are as follows:

August, 1895.

To the Honorable Board of Railroad Commissioners within and for the State of Vermont:

Respectfully represent the undersigned, citizens of the towns of Barnet, Vt., and Monroe, N. H., that the crossing at McIndoes Falls village in said town of Barnet across the tracks of the Boston & Maine Railroad is a blind and very dangerous one; that the officials of said road have been repeatedly requested to change said crossing or station a flagman there.

And your petitioners further represent that the station at said McIndoes Falls is located in a dangerous place; that the same is not suitable for the accommodation and safety of the public.

Wherefore they request you to make an examination of the premises and make such orders or order as you deem the condition of affairs require.

A. B. Perry and 45 others.
To Olin Merrill, O. M. Barber and Chas. J Bell, Railroad Commissioners:

The Boston & Maine Railroad respectfully represents to your Honorable Board that the inhabitants in the vicinity of the railroad station at McIndoes Falls claim that the highway crossing near said station is dangerous and that the station is insufficient, and said corporation is informed that they are circulating a petition to your Honorable Board asking for a flagman and a new station to be ordered at said point.

The Boston & Maine Railroad are now operating the Connecticut and Passumpsic Rivers railroad under a long term lease and are interested in said matters, and respectfully submit that if any change is made at said point the crossing should be changed to an under crossing and a new station, if built, should be placed at a different point from where the present one is.

The corporation are considering the matter of building a new station and desire to have all questions of difference between the corporation and inhabitants settled before anything is done at said place.

The Boston & Maine Railroad, therefore, respectfully request your Honorable Board to investigate this whole matter and determine the location of a depot or station and of said crossing, and if you find said crossing to be a dangerous one, that you order an under crossing at the most suitable place, and apportion the expense of the construction of such under crossing as may be ordered, in accordance with the provisions of the statutes in such case made and provided.

Lyndonville, Vermont, August 3rd, 1895.

Boston and Maine Railroad,

By its attorneys,

Dickerman & Young

The petition of the Boston & Maine Railroad was filed with the Board on the 6th day of August, 1895, and the petition of A. B. Perry et al.s., who were citizens of Barnet, Vt., or Monroe, N. H., was filed on the 13th day of August, 1895.
Omitting a recital of the substance of the petitions, the decision was as follows:

**DECISION.**

In the matter of the application of the Boston & Maine Railroad, and of the separate application of certain citizens of Barnet, Vt., relating to an underground crossing, and the location of a depot in McIndoes Falls.

On the 27th of September, 1895, after due notice to the selectmen of the town of Barnet, the Boston & Maine Railroad, the petitioners, and the owners of the land adjoining the crossing, a hearing was had at McIndoes Falls in said Barnet.

The town of Barnet was represented by W P Stafford, its attorney; the Boston & Maine Railroad by H. E. Folsom, superintendent, and John Young, its attorney; the petitioners were many of them present in person and were represented by C. H. Hosford. The owners of the land adjoining the crossing were present. The petitions were heard together; the Board examined the premises and heard the evidence.

The crossing in question is just south of the present station in the village of McIndoes Falls, is at grade, and is in the line of the main highway extending from Monroe, N. H., to the village of McIndoes Falls, Vt., nearly all of which village lies westerly from the railroad. The present station is on the east side of the railroad track.

There is quite a grade in the highway leading over this crossing from the east, and at a point several rods easterly from the crossing there are, on either side, buildings and other obstructions intervening, so that until one approaches within a short distance from the crossing the view of the railroad is somewhat intercepted. Approaching the crossing from the west, the view of the railroad toward the north is comparatively clear, but toward the south it is intercepted by a building of the Connecticut River Manufacturing Company, which is erected nearly, if not quite, to the west line of the railroad lands, and by its size and location materially obstructs the view of the railroad track toward the south and,
so far, at least, as north bound trains are concerned, renders the crossing blind and dangerous for an east bound traveler.

There is considerable travel over this highway and in the summer months some 25 or 30 trains daily pass over the railroad, not more than half of which are scheduled to stop at McIndoes Falls. In the winter the number of trains is less.

The element of danger at the crossing will be very much lessened if the passenger station is constructed on the west side of the railroad, and but for the fact that the building of the Connecticut River Manufacturing Company would still, standing as it does so near to the tracks and thereby preventing a view of the same, remain a menace to the traveling public, would perhaps render the crossing so safe comparatively that no order relating thereto would be necessary, but in view of the strenuousness with which its owners insist on its being kept where it stands, and what the Board believes to be the danger arising therefrom it is deemed advisable to make some order that will remove or obviate this source of danger.

The Board is aware of no authority vested in it that enables it to order the removal of this building, without further order in the premises. The location of the railroad and the highway are such that an under-pass, either in the present highway or southerly therefrom, is perfectly feasible and on the whole it is deemed best, in view of the fact that all danger at the crossing will be thereby obviated, and perhaps accidents that the whole vicinity would regard as calamitous be averted, to order an underground crossing.

Two locations for this crossing were suggested, one in the present highway and the other in the rear of said building of the Connecticut River Manufacturing Company. The authorities and inhabitants of Barnet strenuously objected to either, claiming the former would be a great disfigurement to the street and would render the highway so constructed liable to wash, and that the latter was impracticable by reason of the proximity to a small brook, the waters of which it was claimed would frequently render the under-ground crossing impassable.
It appeared that the expense of constructing the under-crossing at either location would be about $4,800.00, not including the damage to abutters, concerning which no evidence sufficient to warrant a finding relating thereto was introduced before the Board.

To meet, to some extent, the objections of the town of Barnet and its inhabitants, render the damage to abutters as slight as possible, and at the same time accomplish the change judged best by the Board, it is believed that the removal of said building of the Connecticut River Manufacturing Company toward the north at least so far that its south end will rest upon its now present northerly foundation, and then changing the location of the highway so that it will pass to the south of said building when so removed, and therein constructing an under-pass, offers the most satisfactory solution of the whole question.

It is therefore hereby ordered that the said highway be changed to the southerly as follows, viz: Beginning in the southerly line of said highway, as it now exists, at a point one hundred feet westerly from the point where the south line of said highway intersects the west rail of the middle track of the Boston & Maine railroad, thence southeasterly upon such a degree as will intersect the line of the westerly foundation of said Connecticut River Manufacturing Company's building at a point that is twenty-four and three-fourths feet southerly from the northerly end of said westerly foundation, thence easterly to and across the lands of the Boston & Maine Railroad upon such a course as will intersect the south line of the said highway where it now exists at a point not more than twenty-five feet easterly from the easterly line of the lands of the Boston & Maine Railroad, and said last named point of intersection may be less than twenty-five feet easterly from the easterly line of said railroad company's lands if equally feasible for the purposes desired; the line hereinbefore described to constitute the center line of the highway as changed, and such changed highway is to be one and one-half rods in width on each side of said center line.

An under-pass shall be constructed where such changed highway crosses the Boston & Maine railroad and in such a
manner that the north abutment of said under-pass shall be on
the north line of said changed highway, and shall not be less
than eighteen feet wide in the clear, and shall have an unob-
structed depth below girders or bridge that will support the
tracks of the railroad of not less than eleven feet in the clear;
the abutments and the approaches on either side of the under-
pass shall be of masonry constructed in a substantial and per-
manent manner, and the changed highway, throughout its
whole extent, shall be so constructed that the grade shall be
as uniform as reasonably may be.

Said building of the Connecticut River Manufacturing
Company shall be moved toward the north, not to exceed
eight feet from the south face of the northerly abutment of
the under-pass and toward the west so that it shall not inter-
fere or obstruct the use of the tracks of the railroad, and so
much of said highway as will be occupied by said building
when so removed shall be discontinued.

If the limits of the present highway do not extend far
enough to the north to admit of said building being placed
thereon, so much of the land of the Boston & Maine Railroad
to the north of said highway shall be taken as is necessary to
carry out this order and to give full and free access to the
north side of said building when so removed, and in the event
that said building when so removed occupies so much of the
land of the railroad company lying between lands belonging
to the Connecticut River Manufacturing Company and the
tracks of the railroad on the northerly side of the highway
that there is not sufficient room on the railroad company's
land to admit of a highway at least three rods wide leading
from the present highway to the northerly side of said build-
ing when so removed, sufficient land shall be taken from the
southeasterly corner of said lands of the Connecticut River
Manufacturing Company as will, with that portion of the
lands of the railroad company that may be used for such pur-
pose, constitute a highway three rods wide leading along the
westerly and to the northerly side of said building when so
removed, and a highway three rods wide leading from the
present highway to the northerly side of said building shall
be so constructed.
The entire expense of the changing of the highway to the south, the removal of said building and the placing of the same upon a foundation as good and permanent as that upon which it now rests, the constructing of the highway leading to the northerly side of said building when so removed, and the construction of said under-pass, as hereinbefore provided, shall be borne and paid seventy five per cent. thereof by the Boston & Maine Railroad and twenty-five per cent. thereof by the said town of Barnet; and the work shall be done by the said Boston & Maine Railroad and all completed on or before the first day of October, A. D. 1896 to the approval and acceptance of this Board.

The said Boston & Maine Railroad shall forever maintain the abutments and walls necessary to keep the under-pass in good condition, and shall maintain the highway therein.

All damages to abutting owners arising from the changes hereinbefore ordered shall be paid and borne, fifty per cent. thereof by the Boston & Maine Railroad and fifty per cent. thereof by the said town of Barnet.

The Board finds that the passenger depot now in use is not suitable or adequate to the necessities of the public, and it was practically conceded at the hearing that such depot ought to be upon the westerly side of the track.

The Board considers that it will better conserve the safety of the public and the interests of all parties to have both depots on the same side of the railroad, and therefore recommends that said Boston & Maine Railroad erect upon the westerly side of its track a new depot for both passengers and freight suitable for the convenience and accommodation of the public. If deemed advisable by said Boston & Maine Railroad the present depot may be removed to the west side of the track and used for a freight depot, in which event the new depot need only be adequate for passenger purposes. The depots to be so constructed as to be readily accessible to the public, and to be completed on or before the 1st day of October, A. D. 1896, to the approval and acceptance of this Board.

If the changes herein ordered in respect to the laying out and construction of the new highway are not stated with
sufficient accuracy, either party may apply to the Board for a more definite order as to such highway

OLIN MERRILL,
C. J BELL,
_Railroad Commissioners._

I am somewhat in doubt as to whether the crossing in question, when the passenger depot is constructed upon the westerly side of the railroad, will at present be so dangerous that an under-ground crossing ought to be ordered, but concur in the other findings of the Board.

O. M. BARBER,
_Railroad Commissioner._

Since making the foregoing order, the Board is advised that the Boston & Maine Railroad have instituted proceedings for the condemnation of the property necessary to be taken by it to comply with such order, and have caused the same to be appraised in manner provided by law; and that said railroad is ready to pay its share of the land damages so appraised and carry out on its part the order of the Board.

The town of Barnet refuses to pay its proportion of such land damages, and now denies the authority or jurisdiction of the Board to make the foregoing order.

The attention of the Board will soon be given to this case.

Returns as to Bridges.

In Board of Railroad Commissioners,

Montpelier, VT., April 1st. 1896.

_In the matter of the application of the Central Vermont, Boston & Maine, Montpelier & Wells River, and St. Johnsbury & Lake Champlain Railroad Companies requesting that the Board dispense with the verification of the information in the report as to bridges._

This application came on for hearing before the Board subsequent to correspondence between it and some of the companies interested, and was heard at the office of the Board in Montpelier.
At the time of inspecting the various railroads in 1895, the Board became convinced that, to enable it to make an intelligent examination of, or report as to bridges, it should have certain information relative to the bridges, and which it was not practicable to obtain at the time of the inspection.

It accordingly asked for certain information deemed essential, and requested the management of the respective railroads to cause the same to be verified by the oath of some employee having knowledge in the premises.

An extended reference is made to this matter in Chapter I. The decision of the Board, which states all that is material in this connection, is appended hereto.

**DECISION.**

In the matter of the application of the Central Vermont, Boston & Maine, Montpelier & Wells River, and St. Johnsbury & Lake Champlain Railroad Companies requesting that the Board dispense with the oath of the engineer or superintendent of bridges to the bridge report which the several roads have been directed to return to the Commission.

After careful consideration of the reasons alleged why the requirement of the Board that the return asked of your road relative to its bridges should be under oath, be dispensed with, the Board is unable to see any sufficient reason why the verification should be omitted.

The blank in question asks for information to which the Board deems itself lawfully entitled, and which it is the purpose of the Board to use solely for the interests of the state, and the road furnishing such information. The Board considers it is entitled to require persons having knowledge of the facts asked for in the report to make oath thereto before the Board, upon proper proceedings, and feels that in permitting it to be verified by an oath attached to the report itself your road is rather accommodated than inconvenienced. It seems, on the whole, to be the easiest method, both for you and the Board, to get the desired information in the proper manner. Of course, if some person, other than the employee named in the blank oath, is better qualified to make oath
thereto, the Board will not object to the report being verified by such person. Attention is called to the direction upon the back of the report, that you will observe your employees are not asked to make oath to data they are unable to furnish, and to the further fact that the oath is upon “information and belief.” The Board believes that if you will examine the matter once more you will see the propriety and reasonableness of its request, that it will save you, as well as the Board, much time and expense in getting such information verified in another way, and that you will cheerfully comply therewith.

Your application to be allowed to fill in the blank and omit the making oath thereto is denied.

OLIN MERRILL,
O. M. BARBER,
C. J. BELL,

Railroad Commissioners.

Grade Crossing of Electric and Steam Railways in Rutland.

In Board of Railroad Commissioners,
Montpelier, Vt., August 20, 1896.

This was a petition for permission to lay an electric railway track across a steam railroad track at grade.

The petition was as follows:

To the Honorable the Board of Railroad Commissioners for the State of Vermont:

Your petitioner, the Rutland Street Railway Company, a corporation duly existing under the laws of the state of Vermont, and located in the city of Rutland in said state, respectfully represents that it owns and operates by electricity a line of street railway in said city, the southern terminus of which is now on Park street, opposite the fair grounds; that it desires to extend said railway along said Park street, across the tracks of the Bennington & Rutland R. R. Co. at grade near the northwest corner of said fair grounds; that it has the per-
mission of the proper authorities of the city of Rutland to make said extension, and that it also has the consent of said Bennington & Rutland R. R. Co. to make said crossing. Your petitioner, therefore, requests the permission of your Honorable Board for such grade crossing, and that a public hearing before your Honorable Board, in accordance with the provisions of section 3939 V S., may be appointed for an early date.

Rutland Street Railway Co.,
by Frank C. Partridge, its Attorney

The decision of the Board sufficiently states the proceedings and was as follows:

DECISION.

In the matter of the application of the Rutland Street Railway Company for permission to cross at grade the tracks of the Bennington & Rutland Railway Company at the highway grade crossing near the fair grounds in the city of Rutland.

This petition was presented to the Board on the second day of July, 1896. The petitioner, the Bennington & Rutland Railway Company, and the city of Rutland were each duly notified of the time and place of hearing, and pursuant to such notice a hearing upon the petition was had at Rutland on the 7th day of July, 1896; further hearing was also had upon the 29th day of July, 1896.

The Board examined the premises and heard the parties. The petitioner was represented by F. C. Partridge, its attorney, the Bennington & Rutland Railway Company by E. D. Bennett, its superintendent, and the city of Rutland by P. F. McManus, the city attorney

The petition and proceedings are under V. S. §3939.

The Bennington & Rutland Railway Company objected to the crossing being allowed at grade as asked for in the petition; the city of Rutland did not object.

It appeared that on the 7th day of September, 1894, the petitioner applied to the city council of the city of Rutland for permission, among other things, to construct, maintain and operate its road in certain streets in said city, including
that portion of Park street which is between Granger and Main streets. The proposed crossing is at a point where Park street crosses the main line of the Bennington & Rutland Railway Company. At the time such application was made to the city council, Park street, as now, crossed the tracks of the Bennington & Rutland Railway Company at grade.

On the first day of October, 1894, the said city council granted to the Rutland Street Railway Company the permission asked for.

A short time before making the petition to this Board, the Rutland Street Railway Company had constructed its track along Park street to the line of the Bennington & Rutland Railway Company and had also laid its rails beyond the proposed crossing nearly to Granger street; in so doing it had relied on the assurance of the last named company that it did not object to the proposed crossing of its tracks by the petitioner.

The route proposed by the street railway company, as specified in its petition to the city council, will, when completed, make a line extending from Main street to the westerly side of the Bennington & Rutland Railway Company's tracks; thence along Granger, South, Forest, Pine and West streets to intersect upon Merchants Row with its line now in operation there. This proposed line would also cross at grade the track of the Clarendon & Pittsford Railroad. It would accommodate quite a populous section, lying to the west of the Bennington & Rutland Railway Company's track, and would undoubtedly be a great convenience to the citizens of Rutland and a profitable line for the street railway company. It also appeared that at the hearing before the city council upon the application of September 7th, 1894, a large number of the owners of land abutting the proposed line had, by petition, requested and consented to the construction of the line as asked for at that time.

The proposed crossing is within the yard limits of the Bennington & Rutland Railway Company, and would cross a side track as well as the main line of the latter company. There are now ten passenger and four freight trains that regularly run over the line of the last named company and
there is also more or less switching necessarily done at this point. The proposed crossing is substantially at right angles. The track of the street railway company is laid along the southerly side of Park street, only a few feet distant from the high board fence that bounds the northerly side of the fair grounds, which fence extends to the easterly line of the right of way of the Bennington & Rutland Railway Company.

The question raised by the petition to this Board is important. The policy of the law, as well as sound public policy, prohibits the establishment of highways at grade over railroads, or vice versa, except where it is clearly a necessity. The crossing of one railroad by another at grade is at best hazardous, and our attention is frequently directed to this fact by casualties involving great loss of life. To combine the dangerous elements of the highway grade crossing and a grade crossing of two railroads, at the same place, ought only to be allowed in extreme cases where the necessities of the public are imperative and the physical conditions such that no other solution of the question is reasonably possible. The use of electricity in the operation of a railroad is not yet in such a state of perfection that the continuous application of the power, or the control thereof when in use, can be relied upon to propel a car with the certainty that attaches to steam power. Cars so driven sometimes become unmanageable and sometimes the power ceases without warning. If either of these conditions should ensue when the electric car was crossing the track of the steam road an appalling accident might result. The high fence above referred to would render the crossing a blind one, when approached from the east, and would increase to no inconsiderable degree the element of danger at the crossing.

It is urged on behalf of the petitioner that, with such safeguards as the Board would naturally require, the crossing would not be especially dangerous and certainly no more so than others in the state.

No precaution that the Board might suggest can be relied upon to avoid accidents that happen from unknown or uncontrollable causes, nor can any be taken that with certainty will prevent occasional instances of carelessness on the part of
employees. There are in the state other instances of a highway and electric railway crossing a steam railroad at grade at the same point, but with the exception of one which crosses a spur track, that is not frequently used at Fort Ethan Allen, there are none, except two upon the line of the petitioner, and these existed before the law was enacted under which these proceedings are had. To permit the one asked for and the one across the Clarendon & Pittsford Railroad, which will be the natural consequence of allowing this, will give the petitioner four such crossings to about ten miles of its road.

The Board is unwilling to seem to take a position, the result of which may be for the present to deprive the inhabitants of a part of the city of Rutland of the facilities for transportation that are enjoyed by other portions thereof, or to hinder the street railway in any proper and remunerative extension of its line or service, yet the safety of the public traveling by rail upon either of the railroads must first be considered, and, having this in view, the Board declines to grant to the Rutland Street Railway Company permission to cross at grade the track of the Bennington & Rutland Railway Company.

O. MERRILL,
O. M. BARBER,
C. J BELI
Railroad Commissioners.

Grade Crossings in Barre.

In Board of Railroad Commissioners,
Montpelier, Vt., May 13th, 1896.

In the matter of the petition of the Barre Railroad Company to construct side tracks across the highway at grade.

This petition was filed with the Board on the 25th day of February, 1896, and alleged in substance that the petitioner desired to lay two side tracks at grade across the highway, in the village of East Barre; that one of these side tracks was for the purpose of accommodating a new stone shed erected close to the main track of the petitioner, and would cross the (7)
highway twice, and the other, which would cross the highway once, was for the convenience of the opera house block for the unloading of bulk freight.

The petitioner at the same time filed with the Board the written consent of H. I. Cheney, William W Nye, L. I. Cheney, Wm. M. Carnes, R. M. Minard and J L. Dix, abutting land owners, to the laying of such side tracks and waiving any hearing before the Board; also the consent in writing of Lewis Keith, Charles F W. Gazeley and A. C. Reed, selectmen of the town of Barre in which the proposed crossings are located, for the laying thereof.

The decision was as follows:

In the matter of the petition of the Barre Railroad Company for permission to lay side tracks at grade across the highway

This was a petition for permission to lay two side tracks at grade across the highway, in the village of East Barre, in the town of Barre.

The petitioner having filed with the Board the consent of all the abutting land owners and of the selectmen of the town of Barre, to the laying of said tracks as asked for in the petition, the Board without notice to the other parties proceeded to inspect the premises on the 13th day of May, A. D. 1896. The petitioner was present. It appeared that the side tracks in question were to be laid close to the main line, at points where the same already crossed the highway at grade, so that no additional grade crossings would thereby be required, except that the highway would in three places be crossed by two tracks, instead of one as now

It appeared that the danger to the public would not be materially increased by permitting these tracks to be laid as requested, and it is therefore ordered that the prayer of the petitioner be granted, and permission is hereby given to lay said side tracks as asked for in said petition.

OLIN MERRILL,
O. M. BARBER,
Railroad Commissioners.
Change of Water Tank at Greensboro Bend.

In Board of Railroad Commissioners.

In the matter of the petition of D. W. Stevens and 29 others vs. the St. Johnsbury & Lake Champlain Railroad Company.

This was a petition for the removal of a water tank, belonging to the St. Johnsbury & Lake Champlain Railroad Company, from the limits of the highway near the depot at Greensboro Bend, and was filed with the Board January 6th, 1895. After some correspondence relative to the matter and upon due notice to all parties, the Board, by Commissioners Merrill and Bell, with the clerk, met the parties for hearing upon the premises, May 3rd, 1895.

On motion of the petitioners, upon the suggestion of the railroad company that it contemplated making changes in the water tank that practically attained the end sought by the petitioners, the hearing was continued to the time of the annual inspection of this road for 1895, with the understanding that if, in the meantime, no sufficient assurance for such change had been made by the railroad company, the hearing should be proceeded with. At the time of the annual inspection on the 20th day of September, 1895, the petitioners, by their counsel, Taylor & Dutton, and the St. Johnsbury & Lake Champlain Railroad Company by its counsel, Harry Blodgett, and its superintendent, H. E. Folsom, appeared before the Board and an examination of the premises was made and a hearing had. Before decision the parties filed with the Board an agreement in words as follows:

In the matter of the petitioners at Greensboro Bend against St. Johnsbury & Lake Champlain Railroad Company, pending before the Hon. Board of Railroad Commissioners for the state of Vermont:—

Application for an order for the removal of the company's water tank at Greensboro Bend from its present location:

It is hereby stipulated on the part of the said St. Johnsbury & Lake Champlain Railroad Company, that it will on or before two years from date of November 1st, A. D. 1895, take down and remove its present water tank, used for watering its
engines, at Greensboro Bend station, on its line of railroad, and will locate the same at some point convenient for said railroad company, and not nearer the highway crossing at the easterly side of the passenger station, than just west of the freight station as now located. And on the part of the said petitioners, it is hereby stipulated that said proceedings before the railroad commissioners are discontinued and ended.

Executed in duplicate this 11th day of November, A.D. 1895.

St. Johnsbury & Lake Champlain Railroad Company, by
H. E. Folsom, Superintendent.

Taylor & Dutton, Attys. for Petitioners.

This agreement was filed with the Board on the 24th day of January, 1896, and pursuant thereto no further proceedings were taken in the case by the Board.

Depots at Highgate and East Highgate.

In Board of Railroad Commissioners.

In the matter of the petition of C. G Austin and 42 others against the St. Johnsbury & Lake Champlain Railroad Company.

This petition alleged that the depots at Highgate and East Highgate were in a dilapidated condition and unfit for use, and asked the Board to inquire into the matter and, after hearing, make such order and recommendations as to justice shall seem meet.

The petition was filed with the Board on the 20th day of January, 1895, and was duly referred to the St. Johnsbury & Lake Champlain Railroad Company. The petitionee, on February 4th, 1895, filed its answer with the Board, by which it in substance averred that it was the intention of said St. Johnsbury & Lake Champlain Railroad Company to build a new depot at Highgate during the season of 1895 and a new depot at East Highgate during the season of 1896. The answer of the petitionee was duly referred to the petitioners and thereupon, on April 15th, 1895, the petitioners filed with the Board their request to have the petition lie with the Board to await the action of the company.
During the season of 1895, said St. Johnsbury & Lake Champlain Railroad Company erected at Highgate a new depot and are engaged the present season in erecting one at East Highgate, and, in view of this action of the company, no renewal of the application has been made by the petitioners and it is considered that no further action on the part of the Board is required.

**Grade Crossing in Walden.**

*In Board of Railroad Commissioners.*

_in the matter of the petition of M. L. Utley and 104 others against the St. Johnsbury & Lake Champlain Railroad Company._

This was a petition by citizens of the town of Walden setting forth that a certain grade crossing in the line of said railroad company, located in the said town, on the highway leading from Walden to South Walden near the dwelling house of George Jefferson, was in its then present condition dangerous; and that public safety required the highway at said crossing to be changed and to pass under the track of the railroad company and requested the Board to examine the premises and make such order as justice and the public good required. Pursuant to notice to all the parties in interest, the Board on the 20th day of September 1895, examined the premises and heard the parties and their witnesses. J B. Rogers, one of the selectmen, appeared for the town of Walden and Taylor and Dutton, attorneys, appeared for the petitioners. The St. Johnsbury & Lake Champlain Railroad Company was represented by H. E. Folsom, superintendent, and Harry Blodgett, its attorney.

The crossing in question appeared to be a dangerous one, and ought to be replaced by an underpass. To do this, and make the necessary changes in the highway would entail a considerable expense. The town of Walden is poor and unable, as it appeared to the Board, to pay a just proportion, or in fact any part, of the expense of so doing, and the Board hardly felt warranted to place the entire expense of such underground crossing upon the railroad company.
Before any decision had been made in the case, the petitioners asked and were granted leave to withdraw their said petition without prejudice.

**Flagman at Crossing in Fair Haven.**

In Board of Railroad Commissioners,

Montpelier, Vt., Oct. 2, 1895.

_In the matter of the petition of George M. Fuller and 10 others against the Delaware & Hudson Canal Co._

This was a petition to the Board to order a flagman stationed at the highway grade crossing in the south part of the village of Fair Haven at a point where the Delaware & Hudson Canal Company's track crosses the highway leading from Fair Haven to the village of Poultney.

The petition was filed with the Board on the 25th day of March, 1895.

Upon due notice to all parties the Board met to consider the petition at Fair Haven on August 14th, 1895.

There were present G. M. Fuller, attorney, representing the petitioners, and R. H. Brown, engineer, appearing for the Delaware & Hudson Canal Company; the premises were inspected by the Board.

The petitioners introduced no evidence relating to the matter in question and upon the suggestion of Mr. Fuller as one of the petitioners, and as counsel representing the other petitioners, the case was held open pending the production of such evidence as petitioners desired to bring before the Board. At this hearing the Delaware & Hudson Canal Company objected to an order requiring a flagman to be stationed at this crossing at its expense. Since August 14th, 1895, the petitioners have made no application to the Board for further hearing or examination of the premises nor asked it to hear evidence or in any manner renewed their application and it is considered that no further action on the part of the Board is required.
PETITIONS AND DECISIONS.

GRADE CROSSING AT WEST PAWLET.

In the matter of George R. Pratt and 38 others, citizens of Pawlet and vicinity, vs. the D. & H. Canal Company.

This was a petition setting forth in substance that several narrow escapes from what might have been serious accidents, had happened at the grade crossing near the depot in West Pawlet; that said crossing was a very dangerous one and that some precaution to guard against accidents and loss of life at such crossing was required, and asking for an examination of the premises and such order as was found to be necessary.

The petition was filed with the Board on the 16th day of October, 1895.

The usual steps preliminary to the hearing had been taken, but before the same was had, the buildings near the crossing, and which principally caused the crossing to be a blind and dangerous one, were destroyed by fire and on the 30th day of December, 1895, the petitioners asked that the petition might be discontinued, and it was so ordered.

HEATING PASSENGER CARS WITH WOOD OR COAL FOR FUEL.

In Board of Railroad Commissioners.

On October 5th, 1895, an application was received from H. E. Folsom, division superintendent of the Boston & Maine Railroad, for the permission of the Board to use, during the winter, cars equipped with the Baker heater upon freight train No. 87 between Wells River and Lyndonville and upon the return passage of the same cars to Wells River upon local passenger train No. 14; and also to use a car equipped with said heater upon a mixed train between Newport and the Canadian line on the run between Newport and Sherbrooke, P.Q.

And on November 7th, 1896, the same company requested permission to be allowed to use a Baker or Johnson heater in cars received from the Central Vermont Railroad at Windsor for the run over the Vermont Valley Division; these cars being taken from a Central Vermont mixed train at Windsor and having some fire in the heaters, although they would be
heated with steam on the run over the Vermont Valley Division. Also, on the same day, an application was received from Mr. Folsom in behalf of the St. Johnsbury & Lake Champlain Railroad Company for the permission of the Board to use cars equipped with the Baker or Johnson heater upon mixed trains Nos. 6 and 7 between Swanton and Cambridge Junction.

On November 23rd, 1895, written permission to heat the cars mentioned in the application in the manner described was granted, the privilege not to extend to a date later than June 1st, 1896.

On November 29th, 1895, President Dewey and Superintendent Porter of the Woodstock Railroad appeared before the Board at Montpelier seeking to obtain permission from the Board to use coal and wood for fuel in heating passenger cars over said railroad from White River Junction to Woodstock. It appeared that freight cars were attached to this train very frequently and that it was impracticable to heat the passenger cars with steam from the locomotive.

On December 2nd, 1895, the desired permission was granted for the period ending June 1st, 1896, unless sooner revoked by the Board.

Street Railway Crossing at Rutland.

In Board of Railroad Commissioners,

Montpelier, Vt., March 12th, 1896

This was a petition by the Rutland Street Railway Company and the Central Vermont Railroad Company stating that the track of the former company crossed that of the latter at grade upon Main street in the city of Rutland; that the cars of the railway company heretofore had passed over the top of the rails of the Central Vermont tracks; that the said railway company were proposing to run heavier cars than it had before been accustomed to run and that it was a question whether the track crossing ought not to be improved, and if so, what further safeguards should be introduced for the reasonable safety of said crossing, and the petitioners requested
the Board to examine the crossing, hear the suggestions of the petitioners with respect thereto and make such order in the premises as might be deemed necessary and proper

This petition was filed with the Board on the 18th day of June, 1895. Upon its receipt a communication was addressed to the petitioners asking them to point out to the Board the statute that conferred upon it jurisdiction of the subject matter of the petition and suggesting that possibly the municipal authorities were parties in interest and should be notified if any proceedings were taken upon the petition. Subsequent to this communication the matter was held in abeyance at request of the petitioners and on March 4th, 1896, the petitioners asked leave to withdraw their petition, which was granted, and no further proceedings were taken by the Board in the premises.

Depots at Alburgh Springs.

In Board of Railroad Commissioners,

Montpelier, Vt., Feb. 7th, 1895.

In the matter of the application of the Central Vermont Railroad Company for an extension of the time in which to make repairs on the depots at Alburgh Springs.

On April 4th, 1894, the Railroad Commissioners of the state of Vermont, upon petition and hearing, recommended that the Central Vermont Railroad Company overhaul and repair its passenger depot at Alburgh Springs and build a new and suitable freight house and make other repairs in and about said depots, said work to be completed on or before July 1st, 1894. At a later date, upon application by the Central Vermont Railroad Company, the time for completing the work was extended to Nov 1st, 1894.

Upon the written request of F W Baldwin, superintendent of the Central Vermont Railroad Company, made to this Board on the 2nd day of January, 1895, the time for making and completing the repairs referred to was, by vote of the Board, again extended to June 30th, 1895.

Within that time the repairs recommended were made and completed to the satisfaction of the Board.
Landon Grade Crossing in Rutland.

In Board of Railroad Commissioners.

Montpelier, Vt., March 7th, 1895.

In the matter of closing the Landon grade crossing in the City of Rutland to public travel.

By an order of the Board of Railroad Commissioners, of date Sept. 21st, 1891, the Landon grade crossing in the city of Rutland was abolished and closed to public travel. By an informal inspection, made in the month of February, 1895, by this Board, it appeared that said crossing was still being used, to some extent, as a public way. In view of this fact, it became evident that a substantial fence ought to be erected in order to effectively restrain the use of said crossing by foot passengers and thereupon the Board suggested to the Central Vermont Railroad Company that a fence be built, barring the public from access to said crossing.

In response to this suggestion a fence was erected and travel over said crossing thereupon ceased.
CHAPTER IV.

PUBLIC INVESTIGATIONS OF ACCIDENTS AND ACCIDENT INQUIRIES.

As hereinbefore stated, there have been reported to the Board during the biennial term ending June 30th, 1896, one hundred and thirty-one accidents, of which fifty-two were fatal. Of these fatal accidents, thirty-five occurred to persons walking or being on the track or at highway crossings. Other fatalities were much less numerous and no person on any train regularly carrying passengers received fatal injuries during the entire two years covered by the report.

The following table presents a concise classification of all railroad accidents within the state resulting in death or injury to any person during the two years from July 1st, 1894, to July 1st, 1896.

**Accidents, July 1st, 1894, to July 1st, 1896.**

RAILROAD COMMISSIONERS' REPORT.

Fatal Accident at Newport.

Montpelier, Vt., February 7th, 1895.

In the matter of the fatal accident to Allien Pelkey, on the tracks of the Boston & Maine Railroad at Newport, Vermont, July 2nd, 1894.

The report in this case was made to, and a preliminary inquiry into the same, and public investigation thereof ordered, by the Board of Railroad Commissioners whose term expired December 1st, 1894. Such investigation had not been held when the present Board assumed its duties, and to close up the unfinished business it was ordered by this Board that a public investigation of the case be held at Newport on the 24th day of January, 1895, at two o'clock p. m. The parties in interest were duly notified thereof and the case heard pursuant to the notice. The state of Vermont was represented by O. S. Annis, Esq., state's attorney for the County of Orleans. The Canadian Pacific Railway Company was represented by assistant superintendent F P Brady, and F E. Alfred, Esq., counsel. There was no appearance on behalf of the Boston and Maine Railroad.

It appeared that Allien Pelkey, who was about 16 months old, lived with her parents in a dwelling house standing very near the tracks of the Boston and Maine Railroad at Newport; that the employees of the Canadian Pacific Railway Company, with the knowledge and permission of the Boston and Maine Railroad had run a switch engine upon the tracks of the latter company, for the purpose of getting a car that stood upon a spur track leading to a granite shed, which spur track passed within six or eight feet of the Pelkey dwelling house; that when these employees went down with the engine there were children playing on the track near the switch where the spur track diverged from the main track; these children were driven away by the man in charge of the crew operating the engine. The engine then passed upon the spur track and was coupled to the car standing near the granite shed and immediately started out toward the main track. In the interval that elapsed after the switch engine
passed down upon the spur track, and before it reached
the switch in its course back to the main track, the child,
Allien, unseen by anyone, strayed upon the track near the
switch, and as the engine passed along at that point was run
over and instantly killed. It appeared that no one had charge
of the child at the time, except a little girl some ten years
old, and she could give no information as to how Allien got
upon the track. There is no fence along the railroad track at
this point, and between the Pelkey house and the building
next north there is a passage way leading to the railroad
tracks that is used by persons desiring to cross the railroad
tracks in the vicinity. This was known to the employees of
the Canadian Pacific Railway Company and they also knew
that children were in the habit of playing upon the track at or
near the place of the accident.

The Board finds that the said Allien Pelkey was a tres-
passer upon the tracks of the Boston and Maine Railroad, and
that her death did not result from the fault of the Canadian
Pacific Railway Company.

From the evidence introduced and an examination of the
premises it appeared to the Commissioners that the public
safety requires the construction and maintenance of a good
and sufficient fence along the westerly line of the premises of
the Boston and Maine railroad for some rods each side of the
place where the accident occurred; the attention of said com-
pany has been called to the matter and the Board now have
the same under consideration.

OLIN MERRILL,
O. M. BARBER,
C. J. BELL,

Railroad Commissioners.

The Boston and Maine Railroad afterwards asked that the
Board permit the building of the fence only between the
buildings where the line of its right of way is unoccupied,
treating the buildings as a fence for so much of the space as
they occupy. It was voted to grant the request and the
recommendations were thereupon modified to that extent.
RAILROAD COMMISSIONERS' REPORT.

ACCIDENT AT WHITE RIVER JUNCTION.

White River Junction, VT., May 9th, 1895.

In the matter of the personal injury to David Paine on the Central Vermont Railroad at White River Junction, December 22, 1894.

Pursuant to a vote of the Board, of date March 7th, 1895, and continuances from March 28th to May 2nd and from May 2nd to this day, Commissioners Barber and Bell, with the clerk, met at the Junction House in White River Junction, for the purpose of investigating the causes of the accident to David Paine, which occurred in the yard at White River Junction on the evening of December 22nd, 1894. A preliminary inquiry into the causes of this accident was made by the clerk of the Board on February 6th, 1895. At the public hearing J. C. Enright, state's attorney for the county of Windsor, appeared for the state of Vermont, David Paine appeared for himself, and the Central Vermont Railroad Company was represented by C. W. Witters, counsel.

The testimony disclosed the following facts:

At about 8.30 o'clock on the evening of December 22nd, 1894, Henry Moore, who was in charge of the night gang of car repairmen, took with him Thomas Farrell and David Paine, both workmen of experience under his charge, and proceeded to what is called "No. 4" track, where they all entered upon the business of putting in a new draw-bar on Central Vermont car No. 2475, standing near the north end of said No. 4 siding. This siding was filled with cars from a point near the north end down to the highway crossing, where a gap of some three rods was open, and some ten or twelve cars occupied about half the length of the siding south of said crossing. While at work putting in the draw-bar, No. 13, a freight train from the north with eleven cars, passed down by the workmen and Moore sent Farrell to inspect it. Farrell went down past the crossing and found No. 13 train setting in on No. 4 siding. In doing this the cars standing on No. 4 track south of the crossing were struck and pushed over the crossing, where they came in contact with the cars north of said crossing, moving them, and the car under which Moore
and David Paine were still at work, some twenty or thirty feet. Paine was thrown down and severely injured about the shoulder, arm and head; Moore escaped unhurt.

The testimony developed the fact that Fred Hatch, the foreman of yard inspectors and repairmen, had repeatedly instructed Moore to make use of a red flag by day and a red light at night to protect himself and men under his charge from accident while engaged in making repairs upon cars standing upon tracks liable to be used for any purpose, and it appeared that such flags and lights had been furnished by the company for the use of its employees in doing this work. Moore admitted having received these instructions, and further that he had not followed them on the evening when this accident occurred. A red light and flag were kept in a cupboard with other tools, and keys to this cupboard, which was kept locked, were in the possession of Hatch and Moore; Paine and Farrell had no keys. It was the custom of Moore to open this cupboard and take out the light as necessity required, and it appeared that Moore removed it from the cupboard that night when he went on duty. All the witnesses agree that if care had been taken to hang the red light at the south end of the line of cars occupying this side track, the accident would have been averted, as it would doubtless have been seen by the trainmen of No. 13, and taken by them as a caution against moving any cars on that track.

The Board therefore finds that the cause of the accident is directly attributable to the disregard of the orders of Mr. Hatch by Henry Moore, foreman in charge of the night gang, in neglecting to hang out the red light as a signal to all that the cars upon No. 4 track should not be moved.

At the hearing the further fact was developed that the printed rules of the Central Vermont Company contain no regulation imposing upon its employees the duty of protecting themselves by placing a warning signal, either by day or night, when engaged in the work of repairing cars upon side tracks. It appeared that the only knowledge of such a duty possessed by the workmen who gave their testimony before the Commissioners was gained from such instructions as had been given by Foreman Hatch from time to time. Feeling
that some measure of the danger, always attendant upon work of this particular character, might be removed if direct instructions were given employees through the medium of the printed rules of the company, to the effect that in no case should the placing of signals be omitted, the Commissioners feel called upon to recommend that the Central Vermont Railroad Company publish and thoroughly circulate among its employees a rule embodying such provisions as will impress upon them the imperative duty of protecting themselves from like possible danger so far as lies within their power.

OLIN MERRILL,
O. M. BARBER,
C. J. BELL,

Railroad Commissioners.

FATAL ACCIDENT AT BARRE.

BARRE, VT., MAY 28TH, 1895.

In the matter of the fatal accident to Robert Harvey, which occurred on the track of the Central Vermont Railroad Company at Barre, on the 19th day of April, 1895.

Present, Commissioners Merrill and Barber, and the clerk.

The state of Vermont was represented by Z. S. Stanton, state's attorney for the county of Washington, the Central Vermont Railroad Company appeared by C. W. Witters, its attorney, and W. B. Boyce appeared for Mrs. Robert Harvey, the widow of the deceased.

A preliminary inquiry into the cause of this accident was made by the clerk of the Board on the 9th day of May, 1895, and upon vote of the Board a public investigation was ordered to be held on May 28th, 1895, and, upon seasonable notice, the parties interested appeared as above stated.

The testimony disclosed the following facts:

Robert Harvey was an employee in the granite works of Marr & Gordon, through whose yard runs a spur track of the Central Vermont Railroad, leading to this and other sheds
farther south. On the 19th day of April, engine No. 229, a shifter engaged in doing yard work, backed down this spur track and coupled to a train of seven cars, two of them loaded, and conductor Kanally gave engineer Stebbins the motion to draw out on to the main line, the intersection of which with this spur track is some twenty rods or more north of where said cars were standing. The greater portion of this spur track is nearly in a straight line until it passes a point midway in Marr & Gordon's yard where it curves quite sharply to the left and up a considerable grade to the main line. Just as the engine reached a point nearly midway of Marr & Gordon's yard, Robert Harvey, who was returning from the blacksmith shop near by and walking on the track, was struck by the engine and killed. At this point the train was running about six miles an hour and the engineer and fireman were both on the left hand side of the cab, and on the inside of the curve, engaged in looking for the target of the main line switch through the cab windows. The bell was not rung near this point and no warning was given of the approach of the train. Harvey was employed on a granite base some fifty feet north from where he was struck and some fifteen feet away from the track on the east. In passing from the blacksmith shop to his work he might have passed along to the right of a long granite spire, which lay nearly parallel with said spur track, instead of upon the track, although such a course would not have been quite as direct or as easy.

The evidence disclosed that the men working in this vicinity were in the habit of crossing and recrossing the spur track very frequently not only at this point, but also along nearly its entire length, and this custom was known to the engineer and to the conductor in charge of the train; and also disclosed that it was not the custom of the fireman or engineer to ring the bell at this point or at any particular place along this spur track, except when the engine was started. The two or three crossings near the place where the accident occurred were private crossings, used for the accommodation of the workmen employed in the yards.

The Board is of the opinion that Robert Harvey was a trespasser upon the railroad track and that his carelessness
was the primary cause of the accident which resulted in his death; and further that if the engineer had been at his post of duty, instead of on the left side of the cab, it is probable that the accident might have been averted. For the better protection of workmen employed in this and other granite yards in the city of Barre, the Board is of the opinion that, by automatic mechanical device or otherwise, the bell upon the engine ought to be rung continuously while the engine is in motion, to the end that every means of caution be employed to warn the workmen of approaching danger

OLIN MERRILL,
O. M. BARBER,
C. J. BELL,

*Railroad Commissioners.*

---

**Modification of Order in Above Case.**

**Montpelier, VT., April 1st, 1896.**

In the matter of the application of the Central Vermont Railroad Company for a modification of the recommendation of the Board in the case of the fatal accident to Robert Harvey, at Barre, April 19th, 1895, relative to the continuous ringing of the bell upon the engine by automatic mechanical device or otherwise, due notice of which application and opportunity to be heard thereon having been given to the state's attorney of the county of Washington.

It is hereby ordered that said recommendation of the Board be so modified that said Central Vermont Railroad Company is not required to equip its engines in the yard at Barre with an automatic mechanical device for the continuous ringing of the bell and that said bell need not be rung continuously as is directed in the report and finding of the Board in said case; it appearing, upon further consideration, that the continuous clanging of the bell might operate as a source of danger rather than of safety to workmen in said yards.

OLIN MERRILL,
O. M. BARBER,
C. J. BELL,

*Railroad Commissioners.*
FATAL GRADE CROSSING ACCIDENT AT POWNAL.

POWNAL, VT., AUGUST 30TH, 1895.

In the matter of the fatal accident to Edward Chaput, Oliver Daudelin, Jerry Trudeau and Edward Roque, which occurred near Pownal on the Fitchburg Railroad, July 21st, 1895.

Pursuant to seasonable notice to all the parties in interest, the Board met at Pownal on the 30th day of August, 1895, to investigate the causes of the fatal accident to Edward Chaput, Oliver Daudelin, Jerry Trudeau and Edward Roque, which occurred on the Fitchburg Railroad, one and a half miles south of Pownal station, on the 21st day of July, 1895.

The state of Vermont was represented at said hearing by E. L. Bates, state's attorney for the county of Bennington, and the Fitchburg Railroad Company appeared by its attorney, James K. Batchelder; A. N. Gelineau appeared for the relatives of Edward Chaput, Oliver Daudelin, Jerry Trudeau and Edward Roque.

The evidence introduced by the state was fully heard and the Commissioners visited the premises where the accident occurred. No testimony was introduced by the other parties in interest. It appeared that on Sunday afternoon, July 21st, the said Edward Chaput, Oliver Daudelin, Jerry Trudeau and Edward Roque were driving from North Adams, Mass., to Pownal, Vermont. Just before reaching the State Line House, so called, situated some two miles south of Pownal, they took into the carriage with them Clarence H. Prindle. At the State Line House they found Edward White, and there they stopped some ten or fifteen minutes and each one of the party drank two glasses of lager beer. They then proceeded on their way to Pownal and stopped for a short time at the Exchange Hotel, where, with one exception, they all drank one more glass of lager beer and then started on their return to North Adams, accompanied by Prindle and White. They drove the distance between Pownal and the place where the accident occurred in a reasonably careful manner. In the immediate vicinity of the accident, the highway crosses the tracks of the Fitchburg Railroad at two points, distant from
each other about one thousand feet. The party made the first, or westerly, crossing just ahead of a freight train, regularly scheduled to pass over the line from Rotterdam Junction, N Y., to North Adams, Mass., on that day. After passing this crossing the highway runs parallel with the railroad, and about three hundred feet distant therefrom, until it again crosses the tracks at the point where the accident occurred. Soon after passing over the first crossing White alighted from the carriage with the expressed intention of boarding the moving freight train; the other members of the party proceeded along their way to the second crossing, over which, as they approached, the freight train was passing. Immediately upon the clearing of this freight train, Chaput, who was driving, started his horses over the crossing, just in time to be struck by a west bound and regularly scheduled passenger train on the other track. Prindle jumped from the carriage unhurt. Chaput, Daudelin, Trudeau and Roque were instantly killed.

The testimony developed the fact that the passenger train was a regular train from Boston, Mass., to Troy, N. Y., due at this point at about the time of day the accident occurred, and that as it approached the crossing the engineer blew the regular crossing whistle; the bell was also rung in accordance with the usual custom. The engineer of the freight train knew of the approach of the passenger train and by way of warning to the party in the carriage blew several short blasts of the whistle and waved his hand to them; but the noise of the moving freight train prevented the approach of the passenger train being heard and the rank growth of small trees, together with the long freight train, obstructed any view of the track toward the east. As the team approached the second crossing, and just before he jumped from the carriage, Prindle, who had been a railroad employee and understood the warning signals given by the engineer of the freight train, warned Chaput that there was danger ahead, but to this warning Chaput paid no attention.

The Board is of the opinion that the accident was occasioned solely by the neglect of Chaput to observe ordinary prudence in attempting to cross the tracks. The situation at
this crossing, with the double track line and the passing freight train obstructing the view, should have impressed upon Chaput the necessity of exercising especial care in crossing the tracks. The Commissioners conclude that the Fitchburg Railroad Company was in no fault, so far as the proper operation of its trains was concerned. These two crossings, located within one thousand feet of each other, while not blind in their approaches, are confessedly dangerous and the Board strongly recommends that this portion of the highway be discontinued and a new road laid out and suitably prepared for public travel along the bank on the northerly side of the railroad.

OLIN MERRILL,
ORION M. BARBER,
C. J BELL,
Railroad Commissioners.

Abolishment of the two Grade Crossings near Pownal.

The following communication relative to the improvements at the scene of the foregoing accident will sufficiently describe the abolishment of the two grade crossings, in response to the recommendations of the Board:

To the Board of Railroad Commissioners of Vermont:

Gentlemen:—In reply to your favor of February 6th, 1896, requesting a statement of the change in the location of the highway at Pownal, Vermont, where the two railroad crossings were abolished, I would say:

The two crossings referred to were located, the one six rods and thirty four links northerly from the company's iron railroad bridge across the Hoosick river in Pownal and near the Dunn House; the other sixty-three rods and ten links northerly from said bridge, and the main traveled highway between them was, before the change, upon the southerly side of the railroad.

The changes made were these:

The town of Pownal discontinued the highway at each of these crossings and laid out and constructed another highway from a point nearly opposite the northerly crossing along the north side of the railroad, and part of the way nearly parallel
with and quite close to it, to a point nearly opposite the south crossing and several rods from it. This new piece of highway forms a connecting link in the highway leading from Pownal to Williamstown, Mass.

The old highway on the south side of the railroad between the crossings has not been discontinued, except those portions immediately at and near the crossings, and from this old highway another short piece has been laid out by the town northerly across the railroad track and intersecting with the new highway constructed on the northerly side thereof as above stated.

This last piece across the track was laid out to accommodate the tenement house of Daniel F. Bates located near to and just south of old highway, and also to accommodate those persons who live south of and who cross the river at the ford just below said iron bridge, and this piece of road crosses the railroad thirty rods and ten links northerly from said iron bridge.

Both of said pieces of new road have been built and opened for travel for nearly three months and the two old crossings have been closed and fences erected on the line of the railroad for about the same length of time.

This new arrangement gives, I think, general satisfaction to both the railroad and the traveling public.

February 13, 1896.

Respectfully submitted,

J. K. Batchelder,
Atty. for Fitchburg Railroad Co.

Head Collision near Waterbury.

St. Albans, Vt., Feb. 5th, 1896.

In the matter of the head collision between special north bound freight from Montpelier Junction to St. Albans, engine No. 235, and special south bound freight, engine No. 94, which occurred on the Central Vermont Railroad about three miles south of Waterbury station, November 11, 1895

Upon seasonable notice to all parties interested, a public investigation into the causes of said collision was held at the Waterbury Hotel in the village of Waterbury on the 16th day of January, 1896, at which were present Commissioners
Merrill, Barber and Bell and the clerk of the Board. The state of Vermont was represented by Z. S. Stanton, state's attorney for the county of Washington; the Central Vermont Railroad Company appeared by C. W Witters, its attorney. From the testimony of the witnesses produced the Board finds the following facts:

When said special north bound freight arrived at Montpelier Junction, conductor S. F. Kimball and engineer F. A. Hall went into the depot and the operator, Mr. Flannery, read to them aloud the following telegraphic train order:

"Central Vermont telegraphic train order No.

St. Albans, November 11th, 1895.

To conductor and engineer No. Eng. 235 train at Mont. Jnc. Meet engine ninety-four (94) and one twelve (112) at Middlesex.

25 O. K. MAGIFF, F. F
Time received. M. MAGIFF, Supt. Tel.
7:42 A. Time O. K. given."

Engineer Hall read the order aloud, signed his name to it and conductor Kimball also signed his name. The order was then repeated to St. Albans and O. K'ed. The train then proceeded to Middlesex where it met the south bound mail train and engineer Hall pulled his train upon the siding past the depot. When the van came opposite the depot at Middlesex, conductor Kimball, supposing that his train would immediately stop, stepped off and went inside the station; engineer Hall drew out on to the main line at the north switch and proceeded with his train toward Waterbury, leaving conductor Kimball behind.

It appeared from the testimony of engineer Hall that when he read his order at Montpelier Junction, he read and understood it to meet engine No. 94 at Williston instead of at Middlesex; that he afterwards handed it to his fireman to read, and after drawing out on the main line upon leaving Middlesex, he looked back and received a motion from the rear brakeman Cole that the switch had been thrown for the main line and to go ahead. Cole did not appear before the
Board and it appeared that he was and for some time had been out of the employ of the Central Vermont Railroad Company and out of the state.

The collision occurred about half way between Middlesex and Waterbury stations, engineer Hall being slightly injured and considerable damage to the rolling stock sustained.

The Board finds that the collision was caused by the careless and negligent manner in which engineer Hall read and apprised himself of the contents of his order which he received at Montpelier Junction. The rules of the company, the instructions to train employees and the practice of train men, so far as it was developed before the Board, are proper and such as would, if carefully observed, have prevented this accident. It appeared that engineer Hall had been in the employ of the company as fireman and engineer for the period of about six years, and that previous to the accident he had been, in all respects, a competent and efficient man.

It is not considered that at this time any recommendations by the Board respecting the manner of sending, receiving and the interchange among trainmen of train orders is advisable. The necessity of strongly impressing upon trainmen the importance of a close and intelligent inspection of train orders cannot be too strongly urged upon the officials having such matters in charge; the increased care on the part of trainmen which will naturally follow, should render less frequent accidents of this nature.

ACCIDENTS.

Accident at St. Albans.

St. Albans, Vt., Feb. 5th, 1896.

In the matter of the accident to W. H. Bronson, which occurred on the Central Vermont Railroad at the Lake Street crossing in the village of St. Albans, on the 13th day of October, 1895.

Upon seasonable notice to all parties in interest, and after a continuance of the hearing in this case from the 17th day of January, 1896, to this day, a public investigation into the causes of said accident was held at the office of the clerk of the Board in said St. Albans on the 4th day of February, 1896, at which were present Commissioners Merrill and Bell and the clerk of the Board. The state of Vermont was represented by Isaac N. Chase, state's attorney for the county of Franklin; the Central Vermont Railroad Company appeared by F. W. Baldwin, general superintendent, and C. W. Witters, its attorney; W. H. Bronson was represented by his attorney, Charles D. Watson.

From the testimony introduced before the Board it appeared that on the morning of October 13th, 1895, Mr. Bronson was on his way from his home to the creamery in the village of St. Albans; he approached the Lake street crossing, so called, from the west at about 7:15 o'clock and while the north bound mail train, one and a half hours late, was approaching from the south. The morning was dark and foggy and at this point some twenty-five or more tracks cross the highway at grade. The passenger depot is located just north of the crossing and within a distance of eighty feet of it. At a point between the sixth and seventh tracks, counting from the east, is a tower, some twenty feet in height, in which is stationed an employee whose duty it is to signal the approach of all trains by means of an electric bell and red signal disk operated from said tower by the moving of an electric switch; a standard, carrying the bell and disk, is located at either end of said crossing, the twenty-five or more tracks lying between.

The testimony tended to show that Bronson had reached a point nearly opposite the tower without hearing the bell or seeing the disk displayed in the target and at that point his attention was attracted by some one shouting to him; his horse at
once became to some extent excited and unmanageable and at almost the same instant the passenger train on the east or main line reached the crossing, and in trying to avoid it Bronson's horse turned to the left and ran into the engine between the buffer beam and the cylinder. The wagon was struck by the tender, tipped over and partially demolished; Bronson was thrown violently out and considerably bruised and injured.

The testimony of Mr. Bronson tended to show that a line or block of freight cars standing on the side tracks, which extend across and to the south from the crossing and parallel to the track upon which the passenger train approached, intercepted his view of the incoming train. He also testified that he heard no whistle blown or bell rung as a warning to travelers. But from the testimony of numerous witnesses the Board finds that the engineer blew the regular crossing whistle at a point about twenty rods south of the Welden street crossing, which is eighty-one rods south of the Lake street crossing. Engineer George Taylor testified that it was his custom to blow the whistle for both the Welden street and Lake street crossings at a point about twenty rods south of the Welden street crossing and that he did so on the morning the accident occurred. It also appeared that the bell was rung continuously between the two crossings and until after the accident occurred.

From the testimony of C. C. Patterson, who was stationed in the tower, it appeared that while he heard the train approaching when it was at or about a point opposite the south end of the freight house, yet he did not signal its approach until the train was at point too near the crossing to be of much value as a warning to travelers approaching the crossing from the west. The Board is inclined to the belief that upon this occasion Patterson was negligent in not maintaining a careful watch for the approach of trains and giving timely warning to travelers over the crossing. The dullness and fog of the morning should have prompted him to increase his diligence and yet it is apparent from the testimony of Mr. Bronson and the attendant circumstances that Patterson did not sound the warning which he was there to give until Mr. Bronson was well along on his way over the crossing.
Mr. Bronson's age was about eighty-six years. While his eye-sight and hearing appear to be good, yet he failed to observe the prudence and caution, in stopping his horse and looking and listening for the approach of a train, that he ought to have observed in his attempted passage of the crossing. These precautions are not especially more exacting than ought to be exercised by any prudent person, and the foggy atmosphere should have suggested increased care on the part of a person whose senses were less acute by reason of extreme old age.

This crossing, with its numerous tracks and frequent trains, is confessedly a very dangerous one; and yet the railroad company seems to have spared no effort to make it as safe as the conditions which obtain there will allow. In the opinion of the Board, nothing short of an overhead pass will yield to the traveling public sufficient protection from danger at this point, but the approaches to the crossing and its extreme breadth are such as will entail upon the town and the railroad company a very large expense in the construction of an overhead pass. It is sufficient to say, in this connection, that the Board is not now ready to impose upon the municipality and the corporation the burden which such a remedy must necessarily carry with it.

It is, however, proper to add that the employee in charge of the tower and signals ought to be frequently impressed with his responsibilities and his personal attention should be directed to the necessity of ceaseless vigilance to the end that life and property may be made secure while engaged in passing over this dangerous crossing.

OLIN MERRILL,
C. J BELL,

Railroad Commissioners.
RAILROAD COMMISSIONERS' REPORT.

DERAILMENT NEAR LUDLOW.

Ludlow, Vt., March 26th, 1896.

In the matter of the derailment to passenger train No. 53 and the consequent injury to D. B. Sexton and seven others on the Rutland division of the Central Vermont Railroad, near Ludlow, on the 18th day of February, 1896.

Upon seasonable notice to the Central Vermont Railroad Company and to D. B. Sexton, E. O. Baker, T. J. Barber, F. C. Blood, Joseph Lapel and W. H. Steele of Rutland, and J. A. Capel of Meriden, Conn., and G. L. Fletcher of Chester, Vt., all of whom received injuries in the wreck, and to J. C. Enright, state's attorney for Windsor county, a public investigation was held at the Ludlow House, in the village of Ludlow, on the 26th day of March, 1896, at 10 o'clock in the forenoon. The Central Vermont Railroad Company appeared by F. W. Baldwin, its superintendent, and by C. W. Witters, its attorney; the injured persons were all present except W. H. Steele and J. A. Capel. J. C. Enright, state's attorney for Windsor county, was present representing the state of Vermont. The evidence of several witnesses was received and the scene of the accident visited.

The testimony developed the following facts: On the morning of February 18th, 1896, passenger train No. 53 left Rutland at 6.20 a.m. The morning was very cold, the thermometer ranging from 20 to 25 degrees below zero. After leaving Summit station the grade rapidly descends and there are numerous sharp curves in the line, as the road winds along the high hills in its course to the valley below. About two miles south-east of Healdville station, and just within the town of Ludlow, the train emerged from a rocky cut, and in rounding a sharp curve was derailed, the entire train, with the exception of the locomotive and tender, being precipitated down an embankment sixty or more feet in height. The lead trucks of the engine and the tender trucks were derailed, and the track was badly torn up. A freight train which preceded No. 53 had derailed a car truck about fifty rods below where this accident happened, and came to a stop a considera-
ble distance further down the mountain. A flagman was at once sent back to stop No. 53, but had not reached it when the accident occurred. The section men were on the spot soon after the derailment, and roadmaster Sheehan and other officials of the road, with a wreck train, arrived in the forenoon of the same day.

The lead trucks to the engine of No. 53 were the first to go off the iron and the first thing that indicated trouble. Engineer Pratt at once applied the air brakes and reversed his engine, bringing it to a stand still a few rods below where the lead trucks were derailed. By this time the remainder of the train, except the tender, had gone down the embankment. For several rods the rails were considerably bent and displaced, and the ends of the ties upon the outer side of the curve pounded and more or less cut up by the wheels. At or about the place where the lead trucks of the engine were derailed, there were found on the inside of the curve two broken rails, with an unbroken one between them. The testimony of the section men and roadmaster tended to show these were fresh breaks. Since the evening of the preceding day some four or five heavy trains had passed over this curve. The rails at this point were of steel, weighing 60 pounds to the yard, were laid in 1883 and were properly spiked and supported with curve braces. It was claimed that the ties around the curve were laid in 1895, but although their condition may not have contributed to the accident, the Board was satisfied that many of them were considerably worn and decayed, and not first-class.

The evidence tended to show that the derailment was caused either by a broken rail or by the spreading of the rails, and the Board is of the opinion that it was much more likely the former than the latter cause. When the rail was broken, whether by train No. 53 or by some train that had preceded it, there seems to be no means of ascertaining. There is no night inspection of the track upon this division of the road, and although it appeared that it was the duty of the section men to daily examine their entire section, it also appeared that the place where this accident occurred had not been inspected since the Saturday preceding the ac
incident. There had been a derailment of one or more car trucks of a freight train in the afternoon of the day before at about the point where the truck in the freight that preceded No. 53 was derailed, as before stated, and it was claimed by the section foreman that by reason of the extra work this accident had required of himself and men, the daily track inspection had been omitted.

The Board is not warranted in finding that this accident would have been prevented by a daily and nightly inspection of the track, still it feels constrained to recommend that daily inspection of the track should never be omitted so long as trains are run over the road, and that a careful observance of this rule should be insisted on by the management of the road. The Board is confident that in order to attain that degree of care and prudence in the operation of a road that the travelling public has a right to demand, a nightly inspection of the track should also be made.

Fatal Accident at Middlesex.

Middlesex, Vt., April 2nd, 1896.

In the matter of the fatal accident to Dwight Darling, which occurred at Middlesex on the Central Vermont Railroad on the 17th day of February, 1896.

Pursuant to seasonable notice to all parties in interest, the Board met at the hotel in Middlesex on the 2nd day of April, 1896, for the purpose of holding a public investigation into the causes of the accident to said Dwight Darling. The state of Vermont was represented at said hearing by Z. S. Stanton, state's attorney for the county of Washington; the Central Vermont Railroad Company by F. W. Baldwin, its superintendent, and C. W Witters, its attorney, and Mrs.
Dwight Darling, widow of the deceased, by her counsel, Fred A. Howland and F. L. Laird. All of the commissioners and the clerk of the Board were present. A large number of witnesses were examined and the scene of the accident visited.

The crossing where the accident occurred is in the village of Middlesex, and just easterly from the railroad station. There is a sharp curve in the railroad track just southerly from the crossing, and the highway crosses it diagonally in such a manner that the view of the track toward the south is very much obstructed by a high bank and wall on the easterly side of the track, this wall ending abruptly within a few feet of the travelled portion of the street. Between this wall and the main line is a side track, also extending across the highway.

It appeared from the evidence that Mr. Darling, who was proprietor of the hotel in Middlesex village, approached this crossing from the north at about 6.20 o'clock p.m., driving a horse and cutter. The day was very cold; Mr. Darling was well bundled up, and had in the cutter with him a bale of hay. It was nearly dark at the time. Mr. Darling approached the crossing with his horse at a fairly brisk trot, and so far as eye witnesses could discover, gave no heed to the fact that he was approaching the crossing, or that there might be danger ahead. Without slackening his pace, he drove on the crossing just in time to be struck by the engine of train No. 74; the sleigh was demolished and Mr. Darling and his horse were instantly killed. This train came from the south and was running from 25 to 35 miles an hour at the time of the accident; it was not scheduled to stop at Middlesex.

The schedule speed of the train over this division of the road is, including the time at stations, over 30 miles an hour, and from Montpelier Junction to Waterbury, a distance of ten miles, the time is twenty minutes, including stops at stations. The evidence fairly established the fact that the engineer blew both the station and crossing whistles and that the bell was also rung for some distance before the crossing was reached. The train was nearly on time and was running at about its usual rate of speed at this point.
From the fact that Mr. Darling lived near to the railroad station and frequently passed and repassed along this street, the Board concludes that he was conversant with the operation of passenger trains at Middlesex, and was aware that this was a dangerous crossing. Had he paused, or partially stopped just before he reached the crossing, to discover if a train was approaching, he could not well have failed to learn that such was the fact. There was a freight train on the side track before mentioned, but the evidence satisfies the Board that it was so far to the south end near the switch that it could not have obstructed the view of the approaching train.

The engineer of train No. 74 was at his post, and so soon as he saw Darling attempting to cross, did all he could to stop the train, but owing to the obstruction of view by the bank and wall before mentioned, he could not see Mr. Darling until his engine was almost at the crossing, and so near that at the rate the train was going it was impossible to stop it in season to avert the accident.

The conclusion of the Board is that Mr. Darling met his death by reason of his own negligence.

Rule eight of the rules and regulations of the train department of the Central Vermont Railroad Company contains a provision that the maximum speed of passenger trains will be fifty miles per hour, and must be reduced to not exceeding fifteen miles an hour while passing stations. In this case this rule was violated, and it appeared that upon this, as well as upon other fast trains, no particular attention is paid to this rule. Such violation must be a matter of common knowledge to the officials of the road. To the Board, it is apparent that the fast trains upon the Central Vermont Railroad cannot make their schedule time between terminal points, if this rule is at all times observed. Modern railroading demands a high rate of speed to be maintained for long distances, and to furnish such service it must frequently happen that there can be no slowing down of trains at small stations. There are practically the same number of grade crossings now as when the roads were first built, while by reason of the increased rate of speed and more frequent trains the danger of such crossings has rapidly increased, so that a
crossing not especially dangerous in the early days of railroading, may now be doubly so.

This accident is one of many that emphasizes the fact that so fast as possible grade crossings must be abolished, and that wherever, by the change of location of a depot or a highway, danger to the traveller upon the highway can be removed or lessened, not only the railroad corporation, but the municipality should each do all in their power to bring about such a result.

O. M. BARBER,
C. J BELL,

Railroad Commissioners.

---

ACCIDENT NEAR BETHEL.

BETHEL, VT., MAY 25TH, 1896.

In the matter of the personal injury to W H Carter, which occurred on the Central Vermont Railroad near Bethel on the 18th day of December, 1895

Pursuant to notice to all parties interested, the Board met at Bethel for the purpose of holding a public investigation into the cause of the accident to said W. H. Carter. Present, Commissioners Merrill and Bell, and the clerk of the Board. The state of Vermont was represented by J. C. Enright, state's attorney for the county of Windsor; the Central Vermont Railroad Company appeared by C. W. Witters, its attorney, and said W H. Carter appeared by W. P. Stafford, his attorney. A preliminary inquiry into the causes of this accident was made by the clerk of the Board on the 1st day of February, 1896, and upon vote of the Board a public investigation was ordered and, for cause, continued from time to time until this day, when the parties interested appeared as above stated.

It appeared from the evidence that said W H. Carter, a peddler, approached a highway grade crossing over said rail-
road at a point about one and three-fourths miles north of said village of Bethel, on said 18th day of December, 1895, at a time when No. 15, a through freight train from St. Albans to White River Junction, was due at said crossing. At this point there are two highway crossings over the tracks of the Central Vermont Railroad Company known as the "Ridley Bridge crossings," and here the track passes through a rocky cut upon a sharp curve to the left. The highway approaches the crossing nearest Bethel, where the accident occurred, upon a line almost parallel to the railroad track and the view in the direction from which the train approached is obstructed by a rocky ledge.

It appeared from the evidence, and the Board so finds the fact to be, that some eighty rods north of the first crossing the engineer blew the regular crossing whistle and also blew the regular crossing whistle for the crossing where the accident occurred, but that said Carter, either by reason of the location of the ledge and hill before described or because of his own inattention, failed to hear or note the approach of the train and passed upon the crossing where his team was struck by the train, his wagon partially demolished and himself quite seriously injured.

The Board finds that the accident occurred without any fault of the railroad company, either in the operation of its train or otherwise. This crossing, from the examination of the premises, is found to be a very dangerous one. The rocky ledge above referred to prevents any change in the highway, by which the crossing may be discontinued; the grade is such as to preclude, without great expense, an overhead crossing, and the river bed is so near the present grade of the highway that an under-grade crossing cannot be effected.

The Board therefore recommends, as the only safeguard against a recurrence of such an accident, the erection at this crossing, and also at the first crossing northerly therefrom, of an electric signal operated automatically by the approach from either direction of trains over the track of said Central Vermont Railroad Company, said signals to be erected and
placed in operation by said company on or before the first day of October, 1896.

OLIN MERRILL,
C. J BELL,
Railroad Commissioners.

Rear Collision at Montpelier Junction.

Montpelier, Vt., July 20th, 1896.

In the matter of the fatal accident to E. J Brown and Isaac Seskind, which occurred upon the Central Vermont Railroad at Montpelier Junction, on the 22nd day of June, 1896.

Pursuant to seasonable notice to all parties in interest, the Board met at its office in Montpelier on the 20th day of July, 1896, for the purpose of holding a public investigation into the causes of said accident.

The state of Vermont was represented by Z. S. Stanton, state's attorney for the county of Washington; the Central Vermont Railroad Company by C. W Witters, its attorney; the estate of E. J Brown was represented by F. L. Laird, attorney, and by W R. Brown. The estate of Isaac Seskind was not represented. James Luke and Charles Papineau, who were also injured in the same accident, appeared for themselves.

This was a rear end collision; the engine of train No. 67 ran into the rear end of train No. 134, a little north of Montpelier Junction and just as the latter train was drawing in upon the northerly end of the side track.

No. 67 was a regular passenger train, south bound, consisting of 7 cars and an engine. This train was due to leave Montpelier Junction at 12.50 a. m., and was on time at each station where it was scheduled to stop, prior to reaching Montpelier Junction. Its regular rate of speed, including stops at stations from St. Albans to Montpelier Junction, was about 29 miles an hour. This train was controlled by automatic air-brakes, which were in good working order
No. 134 was a special freight train, south bound, carrying stock, and consisted of an engine and 26 cars, 16 of which were controlled by air-brakes. This train had orders to run wild from Essex Junction to Montpelier Junction. Brown and Seskind were drovers, accompanying stock carried on the train; they did not pay fare, but were transported by virtue of a statement in the way-bill of their stock which the road recognized as entitling them to transportation; they were in the rear car, which was a van or saloon, and were almost instantly killed.

The rules of the Central Vermont Railroad allow a train that has only one station time given upon the time-table to reach the station five minutes ahead of the scheduled time; this rule was well understood by each conductor and engineer of both trains, and No. 67 had but one schedule time for Montpelier Junction, which was 12.50 a.m., as before stated.

The rules also provide that freight trains shall not be run at a maximum speed exceeding 18 miles an hour, but the management of the road, sometime before the accident, had issued a special rule or circular to the effect that certain freight trains carrying stock of the kind transported by No. 134, must make better time than they had been making. This special rule or circular had been interpreted by the employees of the road to mean that such trains should be run as fast as they safely could be, and it was the habit of the engineers of such trains, where the grade was easy and the track straight, to run from 25 to 40 miles an hour, and the knowledge that they did run at this rate had been brought home to the management of the road.

No. 134 reached Middlesex at 12.26 a.m., took water and left there at 12.31. The distance from Middlesex to Montpelier Junction is 5.2 miles. This train might have waited at Middlesex, but the conductor, Charles C. Sharrow, judged he had time to reach Montpelier Junction before the arrival of No. 67. This, deducting the five minutes which he knew No. 67 had a right to be ahead of time at the station, would give him, as he thought, just 14 minutes to make the 5.2 miles and get out of the way of the train following.
The collision occurred nearly one-third of a mile northerly from Montpelier Junction. It was the duty of the engineer of No. 67, as well as of all trains, to approach the station with his train under control, and the witnesses agreed that to do this the rate of speed of the train ought not to exceed from 8 to 12 miles an hour. At either of these rates No. 67 was entitled to not less than one minute to reach the station from the point where the collision occurred, so that No. 134, assuming No. 67 was run prudently and within the rules, had in fact, not more than 13 minutes to reach Montpelier Junction and to clear the track for it.

It did not appear that Sharrow took this into consideration in determining whether he ought to run to Montpelier Junction, except that himself and his engineer, John W. Alexander, both testified that they had ample time to reach Montpelier Junction and get out of the way of No. 67, and that also while at Middlesex they considered it safe to proceed.

No. 134 came to stand still before going upon the sidetrack, and ran by the switch, so that a delay of about one minute in getting upon the side-track was thereby occasioned.

M. D. Dimick, the night operator at Montpelier Junction, Sharrow, Alexander, and Parker and Shirlock, brakemen on No. 134, each gave testimony which tended strongly to show that No. 134 began to take the side-track at 12.43, and Alexander, the engineer, testified positively that it was just 12.44 when the collision occurred.

On the other hand, James Luke, engineer, Charles W. Papineau, fireman, Clark Remington, conductor and Edward Hobart, baggage-master, all of No. 67, gave evidence which equally tended to show that the collision occurred one minute later, or 12.45.

As the Board views the case, it is not material which of these conflicting stories is true, and it assumes that each witness is honest in his version of the affair. The difference in time may be accounted for by a variation of watches or by the liability to mistake or failure to remember with entire accuracy, in view of the excitement that attended the accident.
No. 67 left Middlesex at 12.39 and travelled at a high rate of speed until just before the collision, and from the evidence and the circumstances, the Board feels warranted in finding that at the time of the collision it was going at the rate of at least 25 miles an hour. The engineer of No. 67 had no instructions to look out for No. 134. The night in question was dark and very foggy, and it was undisputed that the ordinary switch or lantern light could be seen but a very short distance, and it was in evidence that the headlight of the locomotive could not be seen many rods away.

Sharrow, just before his train came to a stop, jumped off and started back to warn No. 67. Before he had gone any considerable distance, the engine of No. 67 came in sight, and, although he swung his lantern and cried out to the engineer of No. 67, he was unobserved, at least in time to prevent the accident. In his haste Sharrow omitted to light a fusee, which he might have used as a warning signal, and the torpedoes that he usually had upon his lantern for a like purpose, were not in place and he had none to use.

The Board concludes that it was negligence on the part of Conductor Sharrow in attempting to run ahead of No. 67 to Montpelier Junction from Middlesex. To do it with safety, he was compelled to run at a very high rate of speed for the kind of train he had. It is obvious he should have sidetracked at Middlesex.

The Board also concludes, that No. 67, if in fact it was not ahead of time, nevertheless approached Montpelier Junction at too high a rate of speed consistent with the degree of diligence required under the circumstances. It was apparent to the engineer that the darkness was so great as to render it almost impossible to see any signal that might be placed for him; he was at least on time; there was no occasion for maintaining such a high rate of speed so near the station, and it was negligence.

The Board deprecates the existence of a general rule that limits the maximum rate of speed for freight trains to 18 miles an hour, and a special rule that permits those having certain freight trains in charge to run as fast as possible, consistent with safety. This substitutes the judgment of the
employee in each particular case, for a general regulation, which experience has taught to be within the limits of safety, and some rule should be adopted which will obviate the difficulty suggested.

O. MERRILL,
O. M. BARBER,
C. J BELL,

Railroad Commissioners.

FATAL ACCIDENT AT DORSET.

Dorset, Vt., August 7th, 1896.

In the matter of the fatal accident to John Quilter and the accident to Mary Bowen which occurred on the Bennington & Rutland Railway about one mile north of East Dorset station on the 8th day of June, 1896.

Pursuant to seasonable notice to all parties in interest, the Board, by Commissioners Barber and Bell, met at East Dorset on the 7th day of August, 1896, at 3 o'clock in the afternoon for the purpose of making a public investigation into the causes of this accident. The state of Vermont was represented by Edward L. Bates, state's attorney for the county of Bennington, and the Bennington & Rutland Railway Company by E. D. Bennett, its superintendent and J K. Batchelder, its attorney. Thomas W Moloney of Rutland appeared as counsel representing the estate of John Quilter, or for parties interested in such estate. Mary Bowen was present in person.

This accident occurred at a highway grade crossing, known as the Friedley crossing in the town of Dorset about one mile northerly from East Dorset station.

The Board examined the premises and heard the evidence introduced on the part of the state; the other parties introduced no evidence. It appeared that at about 4:30 o'clock in the afternoon of June 8th, as train No. 7, which was south bound, approached Friedley's crossing, the engineer, when
about 30 feet from the crossing, saw a team, consisting of horse and wagon, drive upon the track; he immediately reversed his engine and applied the air-brakes, but was unable to stop the train until it had run into the team and thrown it from the track. Mary Bowen, a girl of about 15 years of age, was driving this team and with her was John Quilter, the deceased, who was about 6 years of age. The highway at this point crosses the railroad track somewhat obliquely and upon the westerly side of the track, close up to the westerly line of the lands of the railway company, stands a building used for a storehouse or coal shed belonging to Friedley & Sons. This building stands upon the northerly side of the highway and is so located that it, with other obstructions that intervene, intercepts the view of the railroad track toward the north for the traveler who approaches this crossing from the west and the inspection of the premises by the Board showed that, until one approached within a very few feet of this crossing from the west, a view of the track toward the north could not be had for a distance of more than 30 or 40 feet. There is a siding between the main line and this building, and it appeared that at the time of the accident, a coal car was standing on this siding, the end of which extended as far south as the southerly end of the building; this car would also considerably intercept the view of the railroad track toward the north for an approaching east bound traveler upon the highway. It appeared from the testimony of the engineer, Charles H. Tufts, that he was running at the rate of about 30 miles an hour, which was his usual schedule time, and that the train was on time as it approached the crossing. From his testimony and from that of his fireman, it appeared that the crossing whistle was blown and the bell rung before the train reached this crossing as required by law, and that just before the engine struck the team, he blew an alarm whistle to warn the team from the track. E. R. Harwood, an employee in Friedley's mill, also testified that he heard the crossing whistle blown. From the evidence of Mary Bowen, it appeared that she had been to East Dorset to get the doctor for some member of her family; that she was hurrying to get back home as soon as possible and that as she approached the cross-
ing she did not hear the whistle blown or the bell rung. She had frequently driven this same team over the crossing and usually stopped to listen and ascertain if a train was coming. On this occasion she did not think it was train time and on account of her hurry to get home she took no precaution whatever to learn if a train was approaching, but drove upon the crossing at a trot; the first she did observe was that the engine was almost upon her, and she was then unable to avoid the collision. Upon her way from East Dorset, she had overtaken the boy Quilter and had invited him to ride with her as he lived near her home. The crossing sign is in place at this point as the law requires.

In consideration of all the evidence, the Board finds that this accident happened without fault on the part of the railroad company or its employees.

O. M. BARBER,  
C. J. BELL,  

Railroad Commissioners.

---

**Head Collision Near Northfield.**

The investigation into the causes of this accident was made by the Board of Railroad Commissioners, whose term of office expired Dec. 1st, 1894, and too late to be incorporated in the biennial report of that year; it is therefore inserted here.

In Board of Railroad Commissioners,  
MONTPELIER, VT., Nov 14th, 1894.  

*In the matter of the head collision between a freight and a passenger train at or near Northfield station October 4, 1894, resulting in injury to five persons.*

This accident was inquired into November 7, 1894, by Commissioner Pingree. Testimony was taken and a sketch of the scene of the accident was made. Upon consideration of the same in Board, an investigation was ordered and had
by the Board at St. Albans November 14, 1894. There were present Commissioners Pingree and Bagley, C. W Witters, Esq., representing the Central Vermont Railroad Company; the state's attorney of Washington county, and all known parties receiving injuries in the collision, were notified, but did not attend.

The simple fact that this butting collision was one in which a passenger train was involved, and in which great loss of life and injury to person was narrowly avoided, is the reason why the Board deemed a public investigation on its part to be called for under the law. The circumstances under which the accident occurred are as follows:

The main track of the C. V R. R., extending from the Northfield station easterly, is nearly on a tangent for about 160 rods. There are several side-tracks which are nearly parallel to the main line. A part of this distance, one of which is designated as "The Main Freight Track," which extends easterly and connects with the main line by a standard split switch at a point about 30 rods easterly of the main freight-house.

A freight train, known as the "Dairy Train," pulled out from this main freight siding for the south at about 1:30 o'clock p. m. of the above named day. This train was in charge of conductor M. Carr. His train crew consisted of Melvin Muzzey, engineer, the fireman and two brakemen.

Head brakeman Cunningham set the switch for the main line for this train to pull out, and jumped on his train. The train was going at the rate of about three miles per hour when its rear left the siding for the main line.

Conductor Carr had entered his saloon about four rods before it passed the switch for the main line and went immediately to the work of arranging his way bills, which work occupied him while the train was going a mile or a mile and a half up the line toward Roxbury.

When Carr entered the saloon, rear brakeman Lozell was on the top of the same, at liberty, and apparently ready to climb down, set the switch right and return to the train. He could have done this with facility at the slow rate of speed at which the train was moving.
Conductor Carr assumed that Lozell would set back the switch properly to leave the main line open, as such duty was expected of the rear brakeman, according to a custom in vogue among train crews, under such conditions.

There was evidence in the case tending to show that Engineer Muzzey was motioned forward by his fireman from the gangway of the engine.

The train proceeded to Roxbury, seven miles south-easterly of Northfield. On arriving at Roxbury, brakeman Cunningham came to conductor Carr and inquired who set the switch back at Northfield, and, in the colloquy which ensued, Carr learned that the switch was left wrong behind his train. He thereupon went to the depot and directed the telegraph operator there to notify Northfield that he had left the switch wrong, and to have it set right. This message was seasonably forwarded to Northfield and afterwards, for the greater safety, the Roxbury train dispatcher asked the operator at Northfield what he knew about the switch, and received from Trenneman, the Northfield operator, the answer that the switch was all right on the main line.

Conductor Carr did not wait to get the responses from Northfield, but went forward with his train.

At 5 p. m. of the same day, train No. 66, north bound mail, with eleven cars, entered the Northfield yard running at a speed of about thirty miles an hour.

At the same time freight train No. 9 was standing on the main freight track near by the freight house, having drawn in from the north end to await the passing of the mail train, which it was to meet there. The switch was still open as left by the dairy train.

The mail train took the freight track and collided with the freight train standing on said side-track at a point near the easterly end of the freight house. Engineer Parker, of the passenger engine, was slightly injured in jumping from his engine; mail agent Jones, a young lad of five years of age, who was a passenger, and a lady passenger residing at Ogdensburg, were also slightly injured.

The front trucks of the engine of train No. 66 were demolished and the rear platform of the mail car and the front
platform of the baggage car were also wrecked; also, the freight engine and tender and two freight cars were damaged. The track is straight and the view open for a distance of nearly eighty rods from the point of collision up the track north-westerly, and the view from the misplaced switch in the direction of the approaching passenger engine was also open a distance of some sixty rods.

It was yet daylight, being half an hour before the hour of sunset.

From the testimony before the Board there appears to have been an unusual combination of blunders and acts of negligence, both in regard to the rules governing the movements of trains and the practice among trainmen in relation to the handling of switches, all which combined to produce the results above mentioned.

The findings of the Board are as follows, viz.:

1. That conductor Carr of the dairy train is primarily responsible for this accident. Rule 76 of the book of "Rules and Regulations governing the Movement of Trains" (Edition 1886) of the Central Vermont Railroad Company, provides that "conductors will be held responsible for the proper position and security of the switches changed by them or any man employed on their trains. Whenever trainmen have occasion to open main line switches, the man opening the switch must remain and close it and know personally that the main line is perfectly secure after the trains for which the switch is opened, have passed, either to the side-track or to the main line. No excuse will be accepted for any omission to comply with this rule."

Conductor Carr was familiar with this rule. He so testified, confessing, without any purpose to evade the responsibility resting upon him, that it was his duty to have known that the switch was set right behind him.

Also, upon his arriving at Roxbury and learning the situation in which the switch was left, he ought not to have gone forward until he knew that the operator there had communicated his message to Northfield and had received and reported to him the reply. He started right to correct the error. He should have followed it up to a known certainty
The peril was too great to leave with the operators, as it was also when setting the switch right was left to Lozell. Not being assured of the certainty of the correction of the mistake by this communication, he should have advised the engineer of train No. 66 when he met it, of the situation and warned him to approach the switch cautiously and with train under control.

This thoughtfulness on his part would most likely have served for the correction of all errors.

2. The Board also finds that head brakeman Cunningham and rear brakeman Lozell are, secondarily and as to each other, equally responsible for this collision. The former acted in plain violation of the second clause of the rule above quoted. It was he who opened this main line switch. Had he remained by it till his train pulled over, and then closed it and boarded his train, he would have only did his duty under the rules, and nothing less than doing that could exonerate him from responsibility for all that occurred, or that might have occurred by this neglect. "No excuse can be accepted for an omission to comply with this rule."

Rear brakeman Lozell appears, from the testimony, to have been expected to close the switch and the case developed that this practice of depending on the rear brakeman to close the switch used by his train, has obtained to some degree among the trainmen of this road and that Lozell understood by this custom that he was expected to attend to the same in this case.

The testimony tended to show that he was a brakeman of experience and understanding the rules and practice. He necessarily knew that Cunningham did not do the duty of setting the switch back under the rule, and he neglected to do it under the practice and suffered his train to depart without giving notice of the breach to the conductor, with whom he rode and conversed in the saloon on the way to Roxbury.

3. The engineer of No. 66, the mail train, cannot be held blameless for this accident. His train approached this switch over a long tangent, in the daytime, and, had he been observant as required by the plain terms of rule 13 of the
book of rules above cited, he would have directed his eye to the switch target and would have discovered that it stood against him in season to have slowed down and probably to have nearly stopped his train. Engineer Parker should be held blameworthy, therefore, for running his train over a misplaced switch, having had ample opportunity, if observant, to discover it.

4. Telegraph operator Trenneman of the Northfield station is also found to share in the carelessness and neglect of duty so general among the crew of the dairy train. The testimony tended to show that to the inquiry as to the switch being left wrong, his first reply was almost instantaneous that it was right. It is clear that he either assumed this (as he took no time to examine and know), or that he stupidly took the inquiry to refer to some other switch, which would indicate extreme heedlessness on his part, as he was advised that conductor Carr, engine 234, who had just passed east, wanted it looked after. If there could be doubt as to what switch was meant, he should have taken the safe course and have ascertained at once, by inspection, if necessary, that all main line switches were right and have wired Roxbury accordingly.

By the Board,

ALFRED E. WATSON,

Clerk.

ACCIDENT INQUIRIES.

The following are accidents, into the causes of which the Board has made inquiry either by personal interviews or correspondence with the interested parties or by taking ex parte affidavits of persons having knowledge of the circumstances attending such accidents; in each case the Board has determined that a public investigation was not necessary.

November 7, 1894.—Mrs. Henry Rock, struck by end front beam of engine while walking between tracks in railroad yard in Bennington; not seriously injured.
December 5, 1894.—Patrick Summers, a trespasser, run over and killed near South Shaftsbury. He was lying on the track and was not seen by anyone until his remains were found.

December 23, 1894.—Arthur Robinson, attempting to make a highway crossing ahead of train at East Richford, was struck and killed.

January 9, 1895.—Edwin M. Porter of Barton Landing was struck on the highway grade crossing at that place and received injuries about the face and chest.

January 14, 1895.—E. H. Brown, a repairman, went between cars at Rutland to do some work without notifying trainmen; while he was there the train was backed and he received injuries about the head.

February 2, 1895.—Harry Willey, a brakeman on the Barre Railroad, fell from a car and had his ankle crushed.

February 6, 1895.—D. Goyette, J. Malloy, F. Malloy and H. Herbert, employees on a snow plough on the Canadian Pacific Railway, were all slightly injured by the plough running off the track at a switch in the yard at North Troy.

February 16, 1895.—Chris. Olsen, a trespasser, was struck by a Delaware & Hudson Canal Company's train near Rutland and fatally injured.

February 23, 1895.—Arad Jackson and A. J. Dewey, struck at a grade crossing on the Montpelier & Wells River Railroad near Barre. Mr. Jackson was seriously injured about the back, head and shoulders and Mr. Dewey was slightly injured by being bruised and scratched.

March 12, 1895.—J. H. Campbell, a brakeman on the Canadian Pacific Railway, was slightly injured while coupling cars at Newport.
March 28, 1895.—J. H. Murphy, a brakeman, on the Delaware & Hudson Canal Company's Railroad, was struck by an overhead timber used for shafting by the Vermont Marble Company at West Rutland. He was not seriously injured. The shaft is less than twenty feet in clear height above the rails and since the accident a tell-tale warning has been erected on either side of it.

March 29, 1895.—G. C. Dotey, a fireman on the St. Johnsbury and Lake Champlain Railroad, had his hand crushed while attempting to board a moving engine at Lunenburgh.

April 8, 1895.—Joseph Fleming, a trespasser, stepped upon the track in front of a train on the Delaware & Hudson Canal Company's Railroad at Rutland; he was fatally injured.

April 9, 1895.—C. Donavan, a fireman on the Central Vermont Railroad at St. Albans, was on the pilot of his engine and was caught between the draw-bars as the engine struck a freight car; he sustained quite serious injuries to his right leg.

April 21, 1895.—George Parsons, an engineer on the Grand Trunk Railway. His train broke apart and while he was standing between the tender and engine looking for the tail light, the other cars collided with the tender and he was crushed to death. The accident happened two miles west from Lake station.

April 27, 1895.—John C. Phillips stepped from a moving passenger train at Windsor and was thrown under the car. His right leg was crushed and he was otherwise injured so that he died a few hours later.

May 1, 1895 —E. F. Morse, a brakeman on the Canadian Pacific Railway, fell from a car at Richford and sprained his ankle.

May 2, 1895.—William Riley had his left foot crushed while attempting to board a moving train on the Central Vermont Railroad at Bellows Falls.
May 20, 1895.—William X. Williams was lying upon the track near West Pawlet on the Delaware & Hudson Canal Company's Railroad and was struck and killed by train No. 53.

June 1, 1895.—C. Bacheldor, a section man on the Canadian Pacific Railway, was struck by the buffer-beam of a moving engine and was slightly injured.

June 2, 1895.—Christoff Burnham, struck at Barnet station on the Boston & Maine Railroad, sustained a compound fracture of his right leg.

June 3, 1895.—Charles Allen, walking on the track near Georgia station on the Central Vermont Railroad, was struck by No. 67 passenger train; his leg was cut off just below the knee.

June 8, 1895.—E. Wallen, a brakeman on the Montpelier & Wells River Railroad, was slightly injured while coupling cars at Plainfield.

June 17, 1895.—Antoine Lunderville, walking beside the track near Lyndonville on the Boston & Maine Railroad, was struck and sustained internal injuries; he was an old man and very deaf and did not hear the approaching train.

June 17, 1895.—Frank Carr and Martin McGovern were driving in a road cart near North Bennington on the Bennington & Rutland Railway, when the horse became unmanageable and plunged into a moving engine at a grade crossing; their injuries were not serious.

June 18, 1895.—D. Noyes Burton and Walter Rich were passing over the tracks south of the depot at Burlington in a hotel omnibus and were struck by a train backing through the depot. They received only slight injuries.

June 20, 1895.—Ernest W. Holton, found dead in the yard at Burlington and was thought to have been killed by some train during the night.
June 22, 1895.—Rock Provencial jumped from the door of a freight car in front of passenger train No. 37 on the Bennington & Rutland Railway at Danby and was fatally injured.

July 13, 1895.—Elmer H. Loukes, a trespasser, was killed in the Central Vermont Railroad yard at Rutland.

July 21, 1895.—Albert Morrey, found dead on the track about two miles from Newport on the Canadian Pacific Railway. He was probably stealing a ride and fell from the train.

July 24, 1895.—Jed P. Clark, a brakeman on the Central Vermont Railroad, fell from his train two miles south of Williston, and was instantly killed.

July 24, 1895.—Mrs. Melinda Watts, 95 years of age, attempted to cross the track in front of passenger train No. 74 on the Central Vermont Railroad at North Duxbury and was instantly killed.

August 6, 1895.—Cornelius Crowley, while lying on the track of the Boston & Maine Railroad near Putney was struck by a train and was seriously injured about his head and right foot.

August 10, 1895.—John Brennan, an engineer on the Boston & Maine Railroad, was slightly injured at Bellows Falls. The main line switch was set for the side track by some person not in the employ of the railroad company and Brennan's engine collided with some freight cars standing on the side rack.

September 1, 1895.—William Bowen, a brakeman on the Boston & Maine Railroad, had his right foot crushed while attempting to board a moving train at Lyndonville.

September 6, 1895.—John O'Neil, a brakeman on the Bennington and Rutland Railway, had one foot crushed while uncoupling cars at Rutland.
October 1, 1895.—James Caufield, a section hand on the Brattleboro and Whitehall Division of the Central Vermont Railroad, was struck by a train when attempting to remove a hand-car from the track. The accident happened near Brattleboro, and Caufield was instantly killed.

October 8, 1895.—Patrick Sloan, struck by a night train on the Central Vermont Railroad near Brandon and instantly killed.

October 21, 1895.—Simeon Corbett, an old man, very deaf, was struck by a train on the Bennington & Rutland Railway, near Bennington, while attempting to drive his team over a grade crossing; he was quite seriously injured.

October 23, 1895.—H. P. Choquette, a brakeman on the Canadian & Pacific Railway, had two fingers of his left hand cut off while shunting cars at Richford.

November 6, 1895.—Stephen Dempsey, a trespasser, stepped in front of an engine in the Central Vermont yard at Rutland and was fatally injured.

November 7, 1895.—George E. Doughty, a brakeman on the Central Vermont Railroad, fell between the cars of his train near Healdville station, receiving injuries from which he died November 8th.

November 8, 1895.—Herbert Elmore, a freight brakeman on the Central Vermont Railroad, lost one finger of his right hand while coupling cars at Bellows Falls.

November 8, 1895.—Henry Miles, a freight brakeman on the Central Vermont Railroad, fell from a car at Pittsford and was slightly injured.

November 10, 1895.—John Mulheran, a brakeman on the Central Vermont Railroad, was slightly injured at St. Albans, while coupling cars.
November 11, 1895.—David MaGee, a trespasser, was struck by a Central Vermont train two miles south of Swanton and instantly killed.

November 13, 1895.—Warren Bashaw, a passenger trainman had two fingers jammed while coupling cars on the Central Vermont Railroad at Rutland.

November 15, 1895.—D. Madara, a freight brakeman on the Central Vermont Railroad, was slightly injured at St. Albans while coupling cars.

November 25, 1895.—Thomas McCarty jumped from a passenger train at Montpelier Junction and fell, receiving a severe scalp wound.

November 30, 1895.—Mrs. Sophia Austin, an old lady, age 86, was walking close beside the Central Vermont Railroad track near Rutland and was hit by the crossbeam of the engine hauling passenger train No. 66; she was instantly killed.

December 7, 1895.—W. Lee, a brakeman on the Canadian Pacific Railway, lost the first and middle fingers of his right hand while coupling cars at Richford.

January 2, 1896.—Georgie A. Shephard, alighting from a train on the Canadian Pacific Railroad at Richford, slipped and fell, receiving injuries to her back.

January 2, 1896.—Mrs. Jule Bibbins, a passenger on the Delaware & Hudson Canal Company’s Railroad, fell from the platform of a car at Fair Haven and was slightly injured.

January 5, 1896.—G. L. Blodgett, a brakeman on the St. Johnsbury & Lake Champlain Railroad, while running in front of car at St. Johnsbury, slipped and fell and was fatally injured.

January 8, 1896.—B. G. Sawyer, an engineer on the St. Johnsbury & Lake Champlain Railroad, jumped from his moving engine in the yard at St. Johnsbury and had one arm broken.
January 12, 1896.—James Morris, a trespasser, was found dead near Essex Junction on the Central Vermont Railroad, having been struck by some train during the night.

January 15, 1896.—Thomas Farrell, a freight brakeman on the Central Vermont Railroad, fell from a ladder of a freight car at White River Junction and was fatally injured.

January 21, 1896.—Thomas Williams, jumped from moving Delaware & Hudson Canal Company's train at Castleton and was slightly injured.

January 23, 1896.—Seymour Carey, attempting to drive over a grade crossing at Winooski on the Central Vermont Railroad, was struck by No. 64 passenger train and fatally injured.

February 6, 1896.—William Brown and B. Beattie, engineer and fireman on the Delaware & Hudson Canal Company's Railroad, were slightly injured by the breaking of the side rods on their engine near Castleton.

February 12, 1896.—G. M. Clark, a car checker on the Canadian Pacific Railway, fell from a car at Newport and sprained his ankle.

February 14, 1896.—W. Horsley, a brakeman on the Canadian Pacific Railway, while getting off from engine, was struck by cars standing on the side track at Newport and was slightly injured.

March 6, 1896.—Patrick Spillan, a trespasser, attempted to cross the long bridge over the Winooski river near Winooski and was struck by No. 50 passenger train and instantly killed.

March 12, 1896.—Ephraim Robson, struck at grade crossing on the Central Vermont Railroad at St. Albans and instantly killed.
March 13, 1896.—G. D. Nichols, a freight brakeman on the Boston & Maine Railroad, fell from his train near Bradford and was instantly killed.

April 20, 1896.—F. A. Gile, a brakeman on the Boston & Maine Railroad, was run over by freight train in the Central Vermont yard at Windsor and instantly killed.

April 21, 1896.—Louis Memo, a freight brakeman on the Central Vermont Railroad, fell from a ladder on the end of a freight car at Windsor and was instantly killed.

June 13, 1896.—M. McMahon, a car repairer, stepped in front of moving engine in the depot at Burlington and was fatally injured.

June 24, 1896.—Isaac Hilliker, walking on the track in the Central Vermont yard at St. Albans, was struck by No. 66 passenger train and instantly killed.

June 30, 1896.—Charles Germain, a child 20 months old, wandered on to the track of the Bennington & Rutland Railway near Cold River station and was struck by passing train, receiving fatal injuries.
The Board of Railroad Commissioners whose term of office expired December 1st, 1894, has submitted for publication the account of salaries and expenses from June 1st, 1894, to December 1st, 1894, the same having accrued too late to be published in the biennial report of that year. It is as follows:

Samuel E. Pingree, commissioner,

It is estimated that the services and expenses of the Board, including the printing and distribution of the biennial report for 1896, during the remaining quarter ending December 1st, 1896, will not exceed $1,525, making a total expenditure for the two years of $7,963.99. The appropriation available to the Commission for the two years is fixed by law at $10,000; the unexpended balance is therefore computed to be $2,036.

History.

The Boston & Maine Railroad Company was organized June, 1835, under the laws of the Commonwealth of Massachusetts, State of New Hampshire, and State of Maine.

The Boston & Maine Railroad system is formed by consolidation of several railroad corporations, organized under the laws of Massachusetts, Maine or New Hampshire, and reference may be had to the statutes of these states for particulars as to the laws authorizing such consolidation.

Post-office address of General Office: Boston, Mass.
Post-office address of Operating Office: Boston, Mass.
Name and address of officer to whom correspondence regarding this report should be addressed: William J. Hobbs, General Auditor.
COMMONWEALTH OF MASSACHUSETTS,
County of Suffolk,

We, the undersigned, Lucius Tuttle, President of the Boston and Maine Railroad, and William J. Hobbs, General Auditor of the Boston and Maine Railroad, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers, and records of said company, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts herein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

LUCIUS TUTTLE,
President of the
Boston & Maine R. R.

WM. J. HOBBS,
General Auditor of the
Boston & Maine R. R.

Subscribed and sworn to before me,
this 20th day of February, 1896,
at Boston in said County.

SIGOURNEY BUTLER,
Justice of the Peace.

Post office address of general office, Boston, Mass.

Post office address of operating office, Boston, Mass.

Name and address of officer to whom correspondence regarding this report should be addressed, C. S. Anthony, general auditor, Boston, Mass.
Oath.

COMMONWEALTH OF MASSACHUSETTS,

COUNTY OF SUFFOLK,

We, the undersigned, H. S. Marcy, President of the Fitchburg Railroad Company, and C. S. Anthony, Auditor of the Fitchburg Railroad Company, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers and records of said company, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts herein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

H. S. MARCY,
President of the
Fitchburg R. R. Co.

C. S. ANTHONY,
Auditor of the
Fitchburg R. R. Co.

Subscribed and sworn to before me,
this 4th and 5th days of March,
1896, at Boston, in said County.

EDMUND D. CODMAN,
Notary Public.

Oath.

STATE OF MAINE, \{ ss.
COUNTY OF CUMBERLAND, \}

We, the undersigned, Franklin A. Wilson, President of the Maine Central Railroad Company, and William W. Colby, General Auditor of the Maine Central Railroad Company, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers and records of said company, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts herein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

FRANKLIN A. WILSON,  
President of the  
Maine Central R. R. Co.

W. W. COLBY,  
General Auditor of the  
Maine Central R. R. Co.

Subscribed and sworn to before me, this 5th day of February, 1896, at Portland, Maine, in said County.

HORACE G. PARKMAN,  
Justice of the Peace.

Note.—Rental credited to Delaware & Hudson Canal Co. is interest on construction owned by them on the lines of this division.

Rental paid N. Y. Central & Hudson R. R. Co. is for use of track at Schenectady, N. Y. It was treated as a rental in our report to Interstate Commerce Commission for 1894, but not in 1895. It is so treated here for the sake of uniformity.

Rental paid Rensselaer & Saratoga R. Co., $941,000 00, is made up as follows:
Dividends on stock, $10,000,000 at 8% .................. $800,000 00
Interest on bonds, $2,000,000 at 7% .................. 140,000 00
For maintaining organization .......................... 1,000 00

Total .......................................................... $941,000 00

History.

Name of common carrier making this report: St. Johnsbury and Lake Champlain R. R.

Date of organization: Reorganized January 1, 1880.

If a consolidated company, name the constituent companies: This road is a union of three charters—the Lamoille Valley, chartered in 1867, the Montpelier and St. Johnsbury, chartered in 1866, and the Essex County Railroad Co., chartered in 1864, the same being amended in 1866.

Date and authority for each consolidation: Consolidation was effected by the three roads jointly bonding their property, and failing to pay the interest all went into the hands of receivers Oct. 18, 1877. The road was restored to the stockholders July 1, 1880, and operated as the St. Johnsbury and Lake Champlain Railroad.

### Oath

COMMONWEALTH OF MASSACHUSETTS,

_COUNTY OF SUFFOLK,

We, the undersigned, C. E. A. Bartlett, President of the St. Johnsbury & Lake Champlain Railroad Company, and Myron Taylor, Auditor of the same Railroad Company, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers and records of said company, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts herein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

C. E. A. BARTLETT,

President of the

St. Johnsbury & Lake Champlain R. R. Co.

MYRON TAYLOR,

Auditor of the

St. Johnsbury & Lake Champlain R. R. Co.

Subscribed and sworn to before me, this 13th day of March, 1896, at Boston, Mass., in said County.

EDGAR J. RICH,

Justice of the Peace.

Post office address of corporate office: Bellows Falls, Vt.
Post office address of operating office: Boston, Mass.
Name and address of officer to whom correspondence regarding this Report should be addressed: William J. Hobbs, General Auditor, Boston, Mass.

**Oath**

COMMONWEALTH OF MASSACHUSETTS, ) ss.
County of Suffolk.

We, the undersigned, James H. Williams, President of the Vermont Valley Railroad Company of 1871, and William J. Hobbs, General Auditor of the Vermont Valley Railroad Company of 1871, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers and records of said company, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts herein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

JAMES H. WILLIAMS,
President of the
Vermont Valley R. R. Co. of 1871.

W. J. HOBBS,
General Auditor of the
Vermont Valley R. R. Co. of 1871.

Subscribed and sworn to before me, this 24th day of February, 1896, at Boston, Mass., in said county.

FREDERICK A. CARR,
Justice of the Peace.
### BIENNIAL REPORT

OF THE

MONTREAL & ATLANTIC RAILWAY.

General Balance Sheet.
For Year Ending June 30th, 1895.

**Assets.**

Permanent investments:
- Construction plant, roadway and equipment.  
  \( (\text{Cost}) \) \( \$4,653,328.43 \)
- Bonds. \( (\text{See schedule D}) \) \( 1,065,000.00 \)

Total permanent investments \( \$5,718,228.43 \)
Due from solvent companies and individuals \( 110,088.64 \)

Total assets \( \$5,828,267.07 \)

**Liabilities.**

- Capital stock. \( (\text{See Schedule I}) \) \( \$3,200,000.00 \)
- Funded debt, bonds unsold. \( (\text{See schedules D and L}) \) \( 1,065,000.00 \)
- Interest to July 1st, account other liabilities \( 22,792.53 \)
- Other liabilities. \( (\text{See note}) \) \( 607,701.65 \)
- Government bonuses and municipal subscriptions to shares (Granted to South Eastern Railway) \( 848,991.89 \)

Total liabilities \( \$5,739,386.07 \)
Surplus, or profit and loss balance \( 88,881.00 \)

Total \( \$5,828,267.07 \)

**Note**—This amount represents amount due by the South Eastern Railway Company to the Canadian Pacific Railway and the Boston and Maine R. R., assumed by the Montreal and Atlantic Railway.

**Surplus Balance.**

Total surplus, June 30th, 1895 \( \$88,881.00 \)

**Note**—The Montreal and Atlantic Railway Company is a reorganized company, having been reorganized as from Oct. 3d, 1894. It was hitherto known as the South Eastern Railway, which road was operated for and on account of the trustees for the bondholders by the Canadian Pacific Railway Company. The surplus shown represents surplus from Oct. 1st, 1894, to June 1st, 1895, only.

**Operating Expenses.**

For Two Years Ending June 30th, 1895.

Recapitulation of expenses:
- Maintenance of way and structures \( \$171,991.57 \)
- Maintenance of equipment \( 137,785.19 \)
- Conducting transportation \( 485,708.54 \)
- General expenses \( 56,551.24 \)

Grand total \( \$842,036.54 \)

Percentage of operating expenses to earnings \( 73.72 \)
Leased Lines and Amount of Rentals.—Schedule B.

### Oath

PROVINCE OF QUEBEC, ss.

County of Hochelaga.

We, the undersigned, Sir William C. Van Horne, K. C. M. G., President of the Montreal & Atlantic Railway Company, and Isaac G. Ogden, Comptroller of the Canadian Pacific Railway Company, operating the Montreal & Atlantic Railroad Company, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers and records of said company, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts herein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

W. C. VAN HORNE,  
President of the Montreal & Atlantic R. R. Co.

I. G. OGDEN,  
Comptroller of the Canadian Pacific Ry. Co.

Subscribed and sworn to before me, this fourteenth day of April, 1896, at the city of Montreal, in said county.

R. I. HENEKER,  
Commissioner empowered to receive Affidavits to be used in the Superior Court, Province of Quebec.

## Oath

STATE OF VERMONT,
COUNTY OF WASHINGTON,

We, the undersigned, A. F. Sortwell, President of the Montpelier & Wells River Railroad Company, and F. W. Morse, Cashier of the Montpelier and & Wells River Railroad, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers and records of said company, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts herein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

A. F. SORTWELL,
President of the
Montpelier & Wells River R. R.

F. W. MORSE,
Cashier of the
Montpelier & Wells River R. R.

Subscribed and sworn to before me,
this 2nd day of March, 1896, at
Montpelier, in said County.

S. C. SHURTLEFF, Notary Public,
Justice of the Peace.

RAILROAD COMMISSIONERS' REPORT.

General Balance Sheet.—Continued.

LIABILITIES.

Capital stock. (See schedule I) $1,000,000 00
Funded debt. (See schedule L) 475,000 00

Current liabilities:
Accounts payable and audited vouchers $8,383 23
Wages and salaries due—not paid 7,452 00
Traffic balances, due other companies 4,204 01
Interest coupons, matured, unpaid, including due July 1st 5,541 67

Total current liabilities 25,580 91

Total liabilities $1,500,580 91
Surplus, or profit and loss balance 10,604 98
Total $1,511,185 89

Disposition of Surplus, or Profit and Loss Balances.

Debits.
Deficit, balance two current years, ending June 30th, 1895 $25,110 54
Surplus, June 30th, 1895 10,604 98
Total $35,715 52

Credits.
Surplus, balance from year ending June 30th, 1893$35,715 52

### Operating Expenses—Schedule A.

**For Two Years Ending June 30th, 1895.**

**Maintenance of Way and Structures:**
- Repairs of roadway: $60,096 91
- Renewals of rails *(Steel)*: 2,631 50
- Renewals of ties: 23,442 75
- Repairs of bridges and culverts: 8,517 30
- Repairs of fences, road crossings, signs and cattle guards: 989 17
- Repairs of buildings: 6,879 69
- Other expenses: 3,000 00

**Total** $105,557 32

**Maintenance of Equipment:**
- Repairs and renewals of locomotives: 26,347 51
- Repairs and renewals of passenger cars: 17,447 48
- Repairs and renewals of freight cars: 9,001 10
- Shop machinery, tools, etc: 719 46
- Other expenses: 3,720 00

**Total** $57,235 55

**Conducting Transportation:**
- Wages of enginemen, firemen and round-housemen: 26,089 05
- Fuel for locomotives: 63,587 39
- Water supplies for locomotives: 1,452 88
- Wages of other trainmen: 33,741 48
- Wages of switchmen, flagmen and watchmen: 855 80
- Expense of telegraph, including train dispatchers and operators: 3,955 38
- Wages of station agents, clerks and laborers: 21,526 07
- Station supplies: 2,160 62
- Switching charges—balances: 3,600 00
- Car mileage—balances: 8,641 14
- Loss and damage: 10,451 56
- Injuries to persons: 6,000 00
- Other expenses: 7,082 81

**Total** $189,144 18

**General Expenses:**
- Salaries of officers: 8,640 00
- Salaries of clerks: 3,425 25
- Advertising: 951 34
- Insurance: 2,200 30
- Stationery and printing: 3,455 85
- Other general expenses: 2,707 57

**Total** $21,380 31

**Grand total** $373,317 36

Oath.

STATE OF VERMONT, ss.
County of Bennington. ss.

We, the undersigned, E. D. Bennett, Supt. of the Bennington & Rutland Railway Company, and W. G. Shaw, Auditor of the Bennington & Rutland Railway Company, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers and records of said company, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts therein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

E. D. BENNETT,

W. G. SHAW,

Subscribed and sworn to before me, this 31st day of January, 1896, at Bennington, in said county.

EDW. C. BENNETT,
Notary Public.

Since June 30th, 1895, James S. Newton and William B. McClellan have resigned and Walter H. Draper has been appointed to fill both positions.

Post-office address of general office: Wilmington, Vermont.
Post-office address of operating office: Wilmington, Vermont.
Name and address of officer to whom correspondence regarding this report should be addressed: Walter H. Draper, Auditor, Wilmington, Vermont.

Oath.

STATE OF VERMONT, ss.
County of Windham, ss.

We, the undersigned, John C. Newton, Treasurer of the Hoosac Tunnel & Wilmington Railroad Company, and Walter H. Draper, Auditor of the Hoosac Tunnel & Wilmington Railroad Company, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers and records of said company, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts herein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

JOHN C. NEWTON,
Treasurer of the
H. T. & Wilmington R. R. Co.

WALTER H. DRAPER,
Auditor of the
Hoosac Tunnel & Wil. R. R. Co.

Subscribed and sworn to before me, this 28th day of February, 1896, at Wilmington, in said county.

CHAS. H. PARMELEE,
Justice of the Peace.
BIENNIAL REPORT
OF THE
ATLANTIC & ST. LAWRENCE RAILROAD COMPANY,
UNDER LEASE TO THE
GRAND TRUNK RAILWAY COMPANY.

### Oath

STATE OF MAINE, \( \) County of Cumberland, \( \) ss.

We, the undersigned, Geo. P. Wescott, Vice-President of the Atlantic & St. Lawrence Railroad Company, and W. W Duffett, Treasurer of the Atlantic & St. Lawrence Railroad Company, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers and records of said company and statements received from lessees, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts herein set forth, so far as we know, the statements being given by lessees, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

GEO. P. WESCOTT,
Vice-President of the
Atlantic & St. Lawrence R. R. Co.

W. W. DUFFETT,
Treasurer of the
Atlantic & St. Lawrence R. R. Co.

Subscribed and sworn to before me, this tenth day of February, 1896, at Portland, Me., in said county of Cumberland.

#### Oath

STATE OF VERMONT,)

County of Rutland, ) ss.

I, the undersigned, H. G. Smith, treasurer of the Bristol Railroad Company, on my oath do say that the foregoing return has been prepared under my direction, from the original books, papers and records of said company, that I have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of my knowledge, information and belief, and I further say that no deductions were made before stating the gross earnings or receipts herein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

H. G. SMITH,  
Treasurer of the  
Bristol E. R. Co.

Subscribed and sworn to before me, this 17th day of February, 1896, at Rutland, in said county.

O. F. HARRISON,  
Justice of the Peace.

<td>54,140.24</td>
</tr>
<tr>
<td>Total construction ........................................ $295,900.22</td>
<td></td>
</tr>
<tr>
<td>Real estate, (See schedule H) .........................</td>
<td>16,275.17</td>
</tr>
</tbody>
</table>

Total permanent investments ................................ $312,175.39
### Cash and current assets:
- Cash on hand and in banks: $2,274.97
- Bills receivable: 3,333.33
- Due from solvent companies and individuals: 8,641.92

Total cash and current assets: 14,250.22

### Other assets:
- Materials and supplies on hand: 2,989.71
- Sundries: 271.40

Total other assets: 2,361.11

Total assets: $328,786.27

### Liabilities:
- **Capital stock**: *(See Schedule I)*
  - Common: 74,700.00
  - Subscriptions unissued: 330.00

Total capital stock: 75,030.00

- **Funded debt**: *(See Schedule L)*

Current liabilities:
- Notes payable and loans: 14,635.49
- Accounts payable and audited vouchers: 72,357.98
- Interest due, unpaid, including July 1st: 3,500.00

Total current liabilities: 90,493.47

Total liabilities: 295,523.47

Surplus, or profit and loss balance: 33,263.25

Total: 328,786.72

### Disposition of Surplus, or Profit and Loss Balances.
For Two Years Ending April 30th, 1895.

Sundry credits, two current years, viz.:
- Additions to property accounts previous to June 30th, 1893, subsequently charged to construction, equipment, etc.: $10,467.97
- Surplus balance from year ending April 30th, 1893: 6,276.68
- Surplus balance two current years ending April 30th, 1895: 16,518.60

Total surplus April 30th, 1895: $33,263.25

Note—Amount of $16,744.65 shown in this report as surplus balance from year ending April 30th, 1893, does not agree with the amount of surplus as reported in general balance sheet of April 30th, 1893 report. This discrepancy was an error in omitting from total construction, equipment and real estate account the proper amount of additions these accounts were chargeable with for year ending April 30th, 1893.

BIENNIAL RETURNS.—BARRE R. R.

Oath.

STATE OF VERMONT,}  
County of Washington.}  SS.

We, the undersigned, W. A. Stowell, Vice-President of the Barre Railroad Company, and F. W. Stanyan, Treasurer of the Barre Railroad Company, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers and records of said company, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts herein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

W. A. STOWELL,
Vice-President of the Barre R. R. Co.

F. W. STANYAN,
Treasurer of the Barre R. R. Co.

Subscribed and sworn to before me, this 23rd day of March, 1896, at the city of Montpelier, in said county.

S. C. SHURTEFF,
Notary Public.

For Two Years Ending June 30th, 1895.

Maintenance of Way and Structures:

| Repairs of roadway                   | $2,000 00 |
| Renewals of rails (Steel)            | 2,037 59  |
| Renewals of ties                     | 1,881 45  |
| Renewals of ties                     | 500 00    |
| Repairs of fences, road crossings, signs | 645 00   |
| Maintenance of Equipment:            |           |
| Repairs and renewals of locomotives  | $1,716 98 |
| Repairs and renewals of passenger cars| 100 87    |
| Repairs and renewals of freight cars  | 1,654 09  |
| Total......................................... | $3,471 89 |
Operating Expenses.—Schedule A.—Continued.

Conducting Transportation:
- Wages of enginemen, firemen and round-housemen: $5,506 43
- Fuel for locomotives: 6,041 70
- All other supplies for locomotives: 316 68
- Wages of other trainmen: 11,977 65
- All other train supplies: 852 98

Total: $24,695 44

General Expenses:
- Salaries of officers: $1,070 00
- General office expenses and supplies: 1,147 13
- Legal expenses: 337 46
- Stationery and printing: 107 78
- Other general expenses: 120 90

Total: $2,783 27

Grand total: $38,014 64

Recapitulation of Expenses:
- Maintenance of way and structures: $7,064 04
- Maintenance of equipment: 3,471 89
- Conducting transportation: 24,695 44
- General expenses: 2,783 27

Grand total: $38,014 64

Percentage of operating expenses to earnings, 49.

Leased Lines and Amount of Rentals.—Schedule B.

For Two Years Ending June 30th, 1895.

Name of road: Pittsford & Rutland.
When leased: July 2nd, 1890.
Term of lease: 15 years.
Date of expiration: July 2nd, 1905.

Note—The Clarendon & Pittsford Railroad Company leases the Pittsf ord & Rutland railroad for a term of fifteen years, agreeing to return the same at the end of that period in at least as good condition as when received.

Earnings from Operation.—Schedule C.

For Two Years Ending June 30th, 1895.

Freight earnings:
- Freight revenue: $73,814 22
Other earnings from operation:
- Switching charges, balance: 3,600 00

Total gross earnings from operation: $77,414 22
Capital Stock—Schedule I.

Description: Common.
Total number of stockholders, 26.
Number of stockholders in Vermont, 26.
Amount of stock held in Vermont, $60,000.00.
Number of shares authorized, 600.
Par value of shares, $100.00.
Total par value authorized, $120,000.00.

Fast Freight Line Contracts.

No special contracts with individuals, co-operative fast freight lines and stock companies; the same mileage, viz: 3-5 of one cent per mile being paid on cars of all other companies making mileage on this road.

History.

Name of common carrier making this report: Lebanon Springs Railroad.
Date of organization: March 25, 1852.

If a consolidated company, name the constituent companies: Lebanon Springs R. R., as above, under general laws and special acts of the state of New York covering a period of several years; "New York and Vermont Ry. Co," under an act of the legislature of the state of Vermont, approved Nov. 3, 1865, and being No. 134 of the laws of that year, and several acts supplementary thereto and amendatory thereof.

The Lebanon Springs R. R. and New York and Vermont Ry. Co. were consolidated Aug. 20, 1867.

Oath.

STATE OF VERMONT, ss.
County of Bennington.

We, the undersigned, E. D. Bennett, Superintendent of the Lebanon Springs Railroad, and Wm. H. Hawkins, Auditor of the Lebanon Springs Railroad, on our oath do severally say that the foregoing return has been prepared under our direction, from the original books, papers and records of said company, that we have carefully examined the same, and declare the same to be a complete and correct statement of the business and affairs of said company in respect to each and every matter and thing therein set forth, to the best of our knowledge, information and belief, and we further say that no deductions were made before stating the gross earnings or receipts herein set forth, except those shown in the foregoing accounts, and that the accounts and figures contained in the foregoing return embrace all of the financial operations of said company during the period for which said return is made.

E. D. BENNETT,
Superintendent of the Lebanon Springs R. R.

WM. H. HAWKINS,
Auditor of the Lebanon Springs R. R.

Subscribed and sworn to before me, this 27th day of April, 1896, at Bennington, in said county.

CLEMENT H. CONE,
Notary Public.
